XXXVI 151914
-----------------

DEAR SIR,

It affords us pleasure to hand you our

## New Illustrated Catalogue

the contents of which, we trust, upon perusal, will prove eminently interesting to you and induce a much-increased share of your favors.

PRECEDING  
PRICE LISTS  
CANCELLED

This issue cancels all previous editions. The basis of value set herein **dominates the prices in all our other Catalogues.**

We have endeavoured to make the work of

### Intrinsic Value to the Building and Allied Trades

UP-TO-DATE AND  
ARTISTIC DESIGNS

Extreme care has been exercised in the insertion throughout of designs, embodying the present-day **artistic taste and quite up-to-date**, whilst the prices have been kept **consistently moderate, covering every grade of value**, and in each case the point of **utility** has been studiously conserved, our desire being to place prominently before those intending to engage in the erection of any class of building, the **most advantageous mode of spending their money so as to obtain the very best results.**

SPECIAL PRICES  
FOR LARGE  
QUANTITIES

We solicit enquiries for quotations for **quantities of materials**, selected from the following pages, including **carriage and risk of breakage in transit** to buyer's nearest Railway Goods Station, irrespective of district or distance.

SHOWROOMS

We have displayed in our Showrooms at **Stratford** practically the whole of the designs shown in the following pages. Prospective purchasers intending to favor us with a visit **would by arrangement be met at a London terminus by our private motor car**, accompanied by a responsible member of our staff, and conducted to our Head Establishment, and, if necessary, conveyed back by same medium. We could make such a visit sufficiently interesting to the customer to warrant same.

PATENTS

The Company own or control several valuable patents interesting to the building trade, the most popular of which is the "**Hue**" **Adaptable Barless Grate**, which has become phenomenally, and is deservedly, successful; also, the "**Leadglass**" **Puttyless Glazing**, full particulars of which are given in these pages.

We hope to receive your enquiries and orders, to which we would give our most careful attention.

Thanking you sincerely for your past favors,

We are, DEAR SIR,

Yours faithfully,

**YOUNG & MARTEN, Ltd.**

IMPORTANT × ×  
COMMUNICATIONS

**P.S.—All communications** should be addressed to the Company at Stratford; letters of complaint, or of a confidential character, if addressed to the Managing Director would receive his personal attention.

# YOUNG & MARTEN

## OF TO-DAY

*Vernish & Colory Section*

THE title of this brief sketch, so far as the

### Building World

is concerned, may be termed a "household phrase."

There is scarcely a city, hamlet within the zone of hours' run from London, but the Company have for a

### considerable period

possessed accounts upon their of most of the leading firms engaged in building operations.

### Name and Goods

of the Company, with increasing appreciation, are also known in all the more

### Important Commercial Centres of the Colonies,

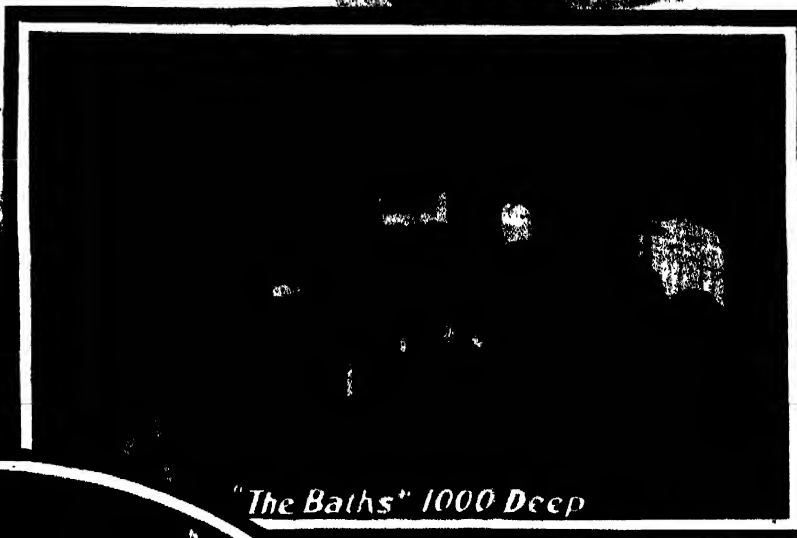

large consignments of goods having been despatched to all parts of the civilized world.

## The Head Establishment

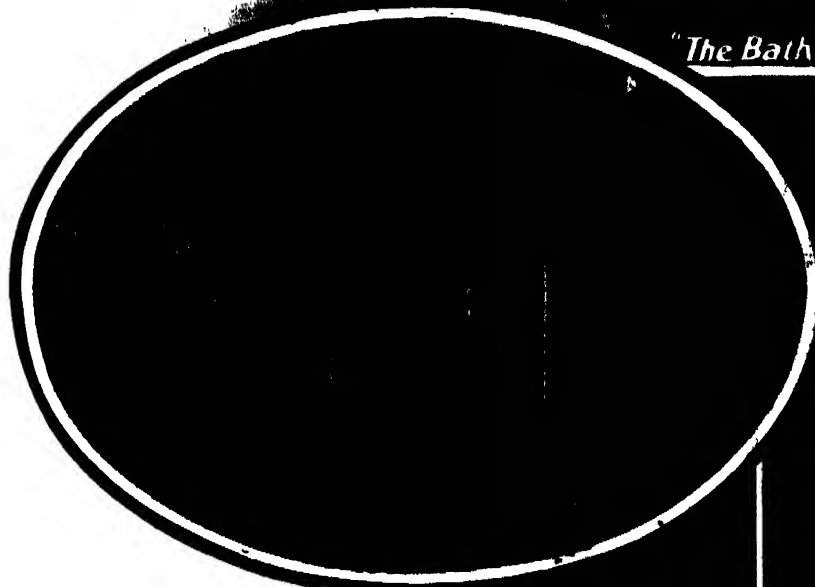

of the Company—a small photograph of which is given next title—is the centre of activity and the main artery infusing vitality into the whole of the

Twenty Departments  
and Branches

and from which their instructions and supplies emanate and maintained, each being connected by private wire.

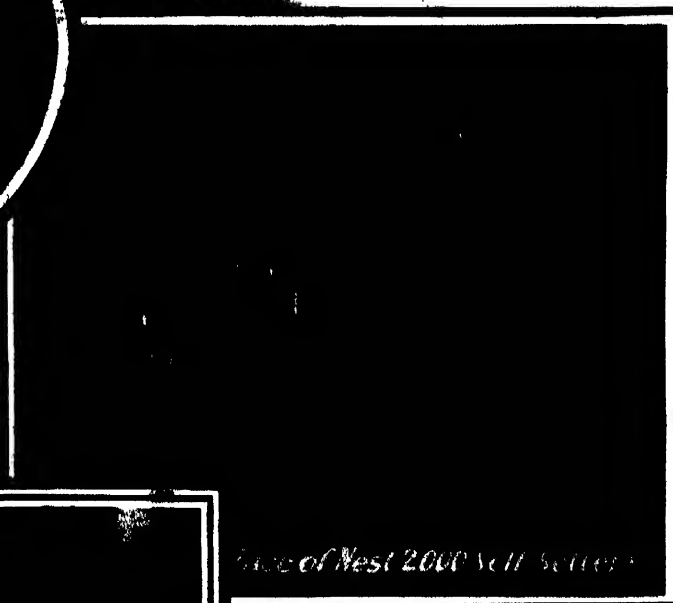

*"The Baths" 1000 Deep*

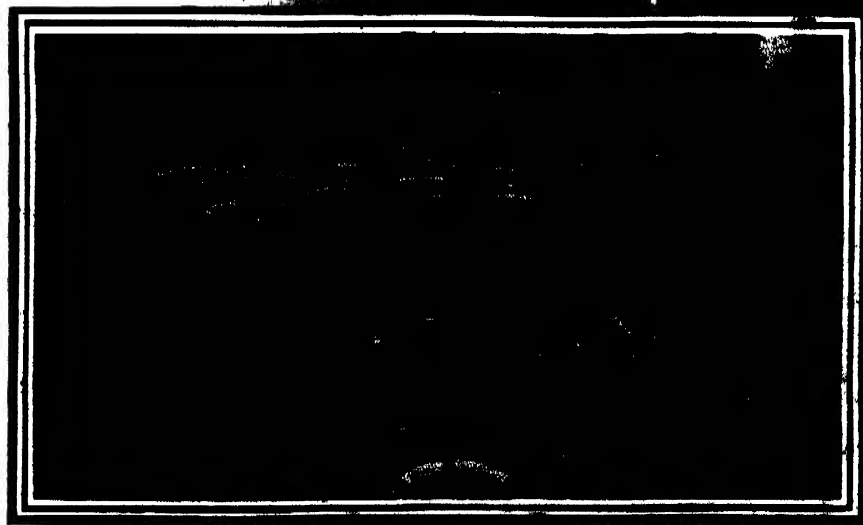

area of the extensive stock of goods in ever demand by the Building and Allied Trades be them in readiness for despatch to all parts upquisition will be obtained from these illustration

The Showrooms, Wharves, Sidings, and Warehouses at Stratford are perhaps the largest of their kind in the world, reserved exclusively for stocking Builders' Goods.

*View of Nest 2000 Self-Setter*

## Trade Ensign

Company has firmly i and persistently maintain about the whole of their business operations embraces the following:

Modern Designs  
Sterling Quality  
Nominal Prices  
Prompt Delivery

STRATFORD, although  
beyond the City  
dary, may with con-  
vency be regarded as an  
integral part of the great  
metropolis. The Company's  
establishments are easily  
accessible from any part of  
City of London by  
Eastern Railway,  
or Omnibus, or Train  
from Aldgate, which  
the Showrooms.

Main Ware-  
house alone possess  
1 floor space of  
half-a-Mile  
the  
loading Dock  
connecting Spur  
junction with  
is capable of  
accommodating  
full-size goods  
trucks with engine.

Warehouses &  
Sidings, Stratford.

Export Window Glass Department

Every obvious advantage offered to  
Town, Country, and  
Colonial Purchasers  
of Building Materials of all kinds is  
the convenience of  
Inspection of  
Every Article  
used in the construction of any  
Building at  
One Visit at the  
Stratford Premises

**I**N addition to the Warehouses and Railway Siding from which goods are despatched to all parts by rail daily, the Company possess

Several  
Freehold  
Wharves

the most important of these being

St. Andrews  
Millwall  
on the Thames

This is utilised as a reserve stocking area. Goods of heavy character are landed here at a much lesser cost than when of necessity same would have to be lightered to smaller wharves located upon creeks or back rivers.

*St. Andrews Wharf*

*Slate Section,  
St. Andrews Wharf*

*Loths & Co. Ltd., St. Andrews Wharf*

*Roofing Slates and Tiles, Cement, and Timber*

The rapidly increasing Departments using this wharf have found it an enormous convenience, and a means of successfully competing for and securing orders from Contractors and Authorities requiring large consignments promptly delivered.

Roofing Slates and Tiles  
Cement, and Timber

are the staple commodities stored at St. Andrews Wharf.

*St. Andrews Wharf, Millwall,  
Thames front.*

# EXPORT

Among the consignments of goods exported recently might be mentioned those sent to the

## Private Sanatorium and Surgical Home, near Gibraltar

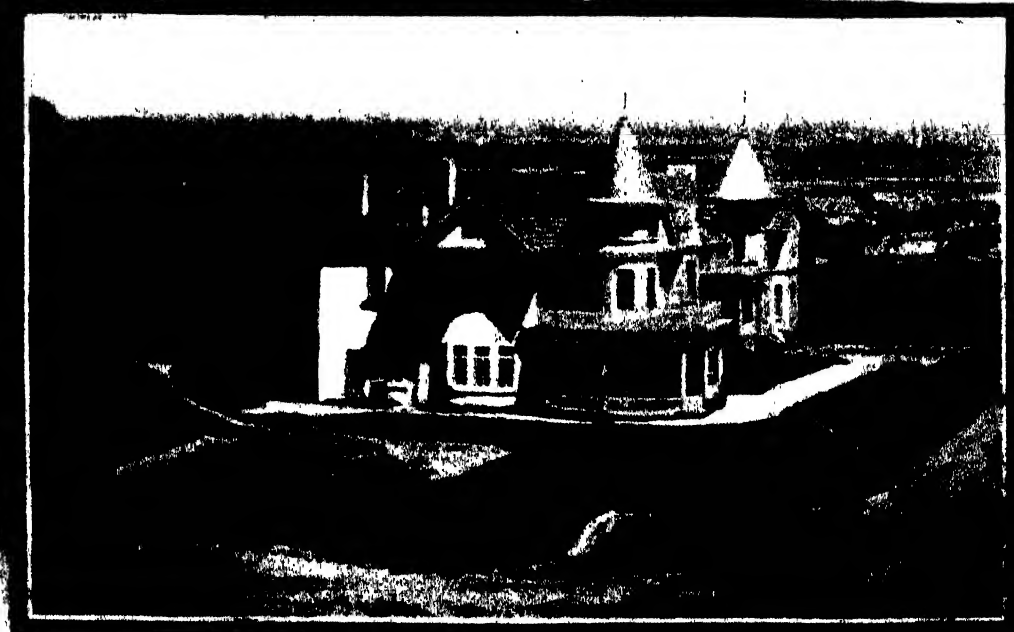

designed and erected by A. H. MORGAN, Esq., of New York City. Practically the whole of the materials (except bricks and timber) were supplied and shipped by the Company for this magnificent building to the architect's specification

Bungalow on the Ivory Coast, W. C. Africa, for which the whole of the goods were supplied including wrought timber

Also all the interior goods used in the private residences of Dr. Mackay and Dr. Macdonald, near Hospital described above

# General Index to Vol. I.

# The "HUE" Adaptable Barless Fire

Patent No. . . . 23223.

Regd. No. . . . 573515.

A FEW OUT OF HUNDREDS OF  
UNSOLICITED TESTIMONIALS  
ARE QUOTED AT PAGE 32 .

## Heat . . . Utility . . Economy

---

---

SHOWING THE APPLICATION OF THE  
LATEST AND MOST ECONOMICAL  
BARLESS FIRE TO EXISTING STOVES.

Also:

AS A COMPLETE FIREPLACE FOR PUBLIC  
INSTITUTIONS, HOTELS, MANSIONS,  
✻ ✻ BUNGALOWS AND COTTAGES. ✻ ✻

---

---

# The "HUE" Barless Fire

(REGD & PATD.)

## Its Adaptability and Special Features

Heat  
Utility  
Economy

It is now admitted generally that a fire low down on the hearth without the obstruction of bars is calculated to produce a more *healthy, natural, cheerful and economical fire* than the usual form of stove (with front bars and bottom) which holds the fuel quite near the chimney, thus allowing wastefully - a very large proportion of the heat generated to escape unused.

Barless  
Fires

¶ Many of the barless stoves on the market at the present time are admittedly fuel-savers, and practically attain the end for which they are designed, but the price in some cases is prohibitive when it is taken into consideration that in the majority of instances before they can be adopted it is necessary to remove the existing chimney piece, frequently injuring same in doing so, scrap the stove, and, in addition, entail the cost of labour and inconvenience, very often no inconsiderable item.

Special  
Feature

¶ The "HUE" Adaptable Fire is designed to give the purchaser all the advantages of a barless fire without the disadvantages mentioned in the last paragraph.

Why it  
always fits

¶ It is manufactured specially to *suit the base area of existing grates*; all that is necessary is to supply a paper template of existing bottom of gratings, with order, to ensure a perfect fit.

Cleanliness

¶ This Fire, moreover, is absolutely clean in use, any small quantity of ash finding its way into specially constructed closed pan under bottom grate. Being portable, this pan can be removed and emptied without dust or inconvenience.

Where it  
excels

¶ For Hotels, Offices, Waiting Rooms and Dwelling Houses, where a bright and economical fire is required at a minimum of expense and inconvenience, the "HUE" fills the need perfectly.

Minimum  
of attention

¶ The Fire will burn from three to four hours without attention.

## The Adaptability of the "HUE"

### Deflecting Back Bricks

¶ In instances where existing grates possess very shallow fires, *i.e.*, under 8 inches from back to front, *we very strongly recommend* that our special heavy brick backs for deflecting the heat be used. The iron backs in the majority of instances can be removed easily, and the new bricks, which are constructed in two sections, inserted quite readily, without taking out the existing stove or touching the mantel piece and surroundings. *The improvement more than warrants the extra outlay.* These remarks also apply where the Fire Brick Back and Sides of grates may be burned through and useless.

### How to Order

¶ When it is decided to fit bricks it is only necessary when ordering to state width of fire. The "HUE" is *stocked* in sizes shown on page 14, but where it is undesirable to remove the back and sides a template of the existing bottom grating should be taken and sent us, when a "HUE" Fire is specially cast to suit. Seven days are required for this operation.

### Section showing Details

- A Solid Deflecting Back Brick  
in two parts
- B Tiled Front.
- C Filling.
- D Brickwork.
- E Glazed Faience Curb.
- F Wood Mantel.
- G "HUE" Fire Basket.
- H Tile Hearth.

# The "HUE" Fire and its Adaptability

THE illustrations on this page will probably be more convincing than pages of letterpress, and the many testimonials received confirm all the advantages claimed for the "HUE" in use.

No. 1. Photograph of old style of Register Grate.

In a recent careful test for 13½ hours this type of stove burned 74 lbs. of Household Coal against 32 lbs. consumed by the "HUE" to produce equal heat.

A Booklet giving a few out of hundreds of unsolicited Testimonials received will be gladly forwarded upon application.

A 24-inch "HUE" Fire was successfully adapted to the very large Register Grate shown. The accompanying testimonial speaks for itself with regard to the alteration. (No Back Bricks were necessary here).

No. 2. The same grate (old bottom and bars shown at side) after "HUE" Fire had been placed in position.

*Fire bright with radiating heat giving full results of fuel. Warming the room and not the chimney.*

87 The Grove, Stratford, Essex.

January 10, 1911.

Gentlemen,

I have pleasure in testifying to the excellent results obtained from the 24 inch "Hue" Barless Hearth Fire which has been fitted for me in my private room at my office here. The room is a large one and previously to consulting you I had been unable to secure any comfort or warmth from the old-fashioned grate which existed, the heat from which, notwithstanding a huge consumption of coal, was entirely dispersed in the chimney instead of my room. Since, however, your "Hue" Barless Hearth Fire has been fixed I have obtained a considerable amount of heat and radiation therefrom with about half the consumption of coal.

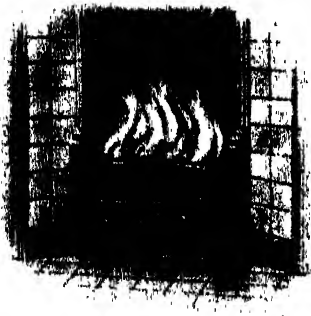

The cost of fixing the "Hue" Barless Hearth Fire, I observe from the account, is quite nominal and, when this and the benefits derived from adopting it are known, I predict for your Company a large increase of business.

Yours faithfully,

S. R. PRESTON-HILLARY.

Messrs. Young & Marten, Ltd.,  
1, 3 & 5 Romford Rd., Stratford, L.

The fire is easily kindled, but in order to stimulate same at the start it is an advantage to open the air regulator or pull forward the fret for a few minutes. There is no need to stir the fuel, which will burn steadily from three to five hours without attention, the sloping sides automatically pushing forward the unconsumed fuel until the whole becomes a glowing mass giving out an intense heat.

No. 1. An Ordinary Tile Grate.

No. 2. The same Grate modernized in less than thirty minutes, the old back being in a good state of repair.

# The "HUE" Adaptable Fire

(REGD. & PATD.)

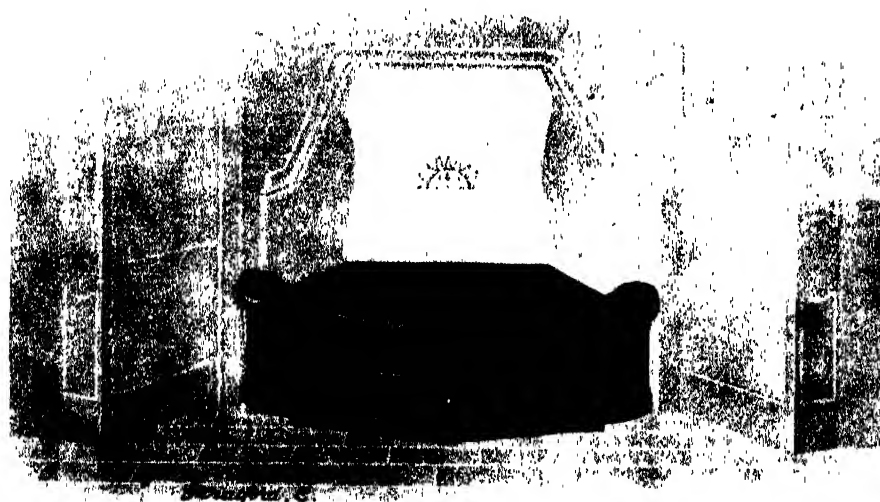

## Modified Pattern for Grates possessing Shallow Fires

**T**HIS form of "Hue" fire, which will be found as satisfactory in working as the earlier model, enables us to supply a thoroughly efficient barless grate to the more modern tile grates and mantel registers, without the necessity or expense of special bricks; a paper pattern of existing bottom grate is all that is necessary to enable us to make a "Hue," which stands on the hearth in the space previously occupied by the bottom grating and bars.

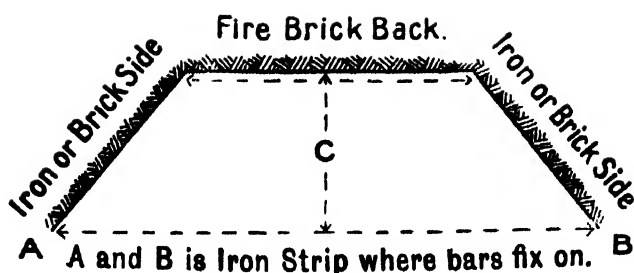

From the price list appended it will be seen that this appliance is within the reach of all, and when it is borne in mind that a very considerable saving in fuel is effected, together with increased cheerfulness and heat in the room, a large demand is sure to result when the "Hue" becomes better known.

The ash pan we supply is a safeguard against fire and obviates the necessity of a specially prepared hearth.

As will be seen in illustration No. 1, the full depth of fire space is utilised for fuel, and the sides and back of existing stove form three sides of the fire basket as shown in Fig. 2.

**Heat**  
**Utility**  
**Economy**

HOW TO TAKE DIMENSIONS OR TEMPLATE.

When the space C is from six to eight inches there is no need to take back away; the new pattern "Hue" answers the purpose admirably.

Fires of greater depth would be fitted with the original "Hue."

With fires less than six inches at C it is *absolutely necessary* to have our Deflecting Bricks after removing back of existing grate.

**In cases where very great heat is required we unhesitatingly advise Deflecting Bricks being used.**

# A Few Unsolicited Testimonials

FROM HUNDREDS RECEIVED IN REGARD TO THE "HUE" FIRE (Patent and Registered)  
IT WILL BE NOTED THAT THE WRITERS ARE ACTUAL USERS OR PRACTICAL MEN

9, 10, 11 Cursitor Street, Chancery Lane,  
London, E.C. December 1st, 1913

Messrs. YOUNG & MARTEN, LTD.  
DEAR SIR,—As I have before had the opportunity of telling you, there is no doubt whatever, that when properly managed, these 'Hue' Fires are able to save quite 80% in the consumption of coal, and moreover I find they burn the cheaper class of coal even better than the more expensive drawing-room kind.  
I have myself had six of these stoves in my own house, and find that not only on the coal consumed, but also in the comparatively small amount of work required in connection with them, they are a very great boon and advantage.  
Yours faithfully,

MONTAGUE ATKINSON.

Tedstone Court, Worcester,  
May 14th, 1911.

"Mrs. Bellville is MOST pleased with the two drawing-room grates, and will now be obliged by Messrs. Young & Marten sending her the bill. Mrs. Bellville hopes to have some more grates later in hall, dining-room, smoking and school room."

Tedstone Court, Worcester,  
February 10th, 1913.

"Mrs. Bellville begs to say in reply to Messrs. Young & Marten's letter of the 4th, she will be delighted for them to make any use they like of her letter of May 14th, 1911. The two 'Hue' Fires she has in the drawing-room have given the GREATEST SATISFACTION, both as regards looks and burning."

6 Lyndhurst Road, Hampstead, N.W.,  
November 18th, 1912.

Messrs. YOUNG & MARTEN, LTD.,  
1, 3, and 5 Romford Road, Stratford, E.  
GENTLEMEN,—Having had five of your 'Hue' Fires put into my house last September, I feel I must write and tell you how thoroughly satisfied we are with them. We find they are in every way what you represent them to be; they give out much more heat than the fire-places we previously had, and are decidedly more economical in fuel consumption. The extra amount of heat we seem to get into the room is, I think, perhaps due to your fire-clay backs, and this, too, I think must be the reason why one of the chimneys in a top bedroom has ceased to smoke. It was not possible at one time to light the fire in that room if there was a high wind, but now it is quite satisfactory. I should like also to express our appreciation of the expeditious manner in which the work was carried out—the five Fires, including the Tiled Fire-place and Hearth of the Savoy Suite, being fitted and ready for use in a day and a half. I am, Yours truly,

R. SWINBURNE.

## FROM PRACTICAL DECORATORS:

70 Upton Lane, Forest Gate.  
DEAR SIR,—We should like to say we have fitted nine 'Hue' Fires during the last fortnight, and we are thoroughly satisfied with them. There is a great future for these, and you are to be congratulated.  
We are sending for two more to day."

PAGE & GARDNER

Messrs. YOUNG & MARTEN, LTD.,  
1, 3, and 5 Romford Road, Stratford, E.

"Jesmond," Theydon Bois, Essex  
October 23rd, 1912.

DEAR SIR,—I have now given the 'Hue' stove a good trial and am exceedingly pleased with it. Good heat and small consumption of coal. You can use my name in recommending it."

Yours faithfully,

A. BURTON WALKER.

88 South Bank Road, Bury,  
January 4th, 1913.

DEAR SIR,—I received your 'Hue' Grate on the 3rd inst., and I fixed it myself in a few minutes. I find that it gives out a lot more heat and it burns the coal right down into a dust. It makes our room look more cheerful, and I cannot speak too highly of it."

Yours truly,

P. CLAYTON.

Queens Road, London, W.,  
27th November, 1913

Messrs. YOUNG & MARTEN  
Stratford, E.

DEAR SIR,—With reference to 'Hue' Fire sent on appo. to Mrs. Fred. Lee of Cheshire, you will be interested to know that same has arrived safely and is in use, giving every satisfaction."

We are, Dear Sirs,

Yours faithfully,

WM. WHITELEY, LTD.

market. PLEASE INSIST  
UPON A "HUE" FIRE  
WITH NAME CAST ON.  
It is the Best and Cheapest.

5 Britannia Terrace, Saltburn-by-the-Sea,  
January 21st, 1913.

"Mrs. Hughes will be glad if Messrs. Young & Marten will send her another 'Hue' Fire. The one they made for her a few weeks ago is a great success. It was put into place with no dirt or trouble and gives twice as much heat as the old grate at from 1 to 4 the amount of coal burnt. Mrs. Hughes has recommended the fire to several people, with every confidence that they will give the greatest satisfaction. The one that Mrs. Hughes now requires is a 22-inch one of the same relative dimensions and shape as the template of the 20-inch fire, which was sent as a guide to Mrs. Hughes some time ago. As this is a stock pattern, Mrs. Hughes hopes to receive it without delay. She encloses 21s. in payment."

## AN ARCHITECT STATES:

101 Evering Road, Stoke Newington, N  
Messrs. YOUNG & MARTEN, January 10th, 1913  
DEAR SIR,—The 'Hue' Fire you recently delivered to 16 Kelross Road, Highbury, was fixed with very little trouble. I have since seen it in operation, and can speak well of its warming capacity and cheerful appearance. It has in this case entirely removed the floor-draught which previously was painfully apparent. I have introduced it to the notice of many of my clients, and shall be ordering some more directly." Yours faithfully,

WILLIAM S. WILSON.

14 Union Court, Old Broad Street, E.C.

November 11th, 1913.  
"I am quite satisfied with the work and the increased heat it gives with very moderate consumption of fuel." Yours faithfully,

J. R. MOORE-SMITH.

## A BUILDER STATES:

"Roseville," High Road, Ilford.  
GENTLEMEN,—The two 'Hue' Fire Baskets with solid brick backs have not only modernized our old stoves, which in itself is a fact worthy of consideration in these days of advanced fashion, but we find as you stated, that we get a great deal more heat at considerably less cost. We have now had them in three weeks and are delighted with them and consequently shall be able to recommend them to our friends with the greatest confidence."

Yours truly,

J. H. LANCE.

YOUNG & MARTEN, LTD.,  
1, 3, and 5 Romford Rd., Stratford, E.

Chapel Lane, Stockton Heath, Warrington.  
DEAR SIR,—In consequence of the increased cost of coal, I felt it necessary to look round to discover a method of reducing the consumption of fuel in my own house. The adoption of a 'Hue' Fire has proved a wonderful economiser at a very little cost in conversion of an old-fashioned grate. Although I have only had one a few weeks, it has saved the initial cost, and its heating capabilities are wonderful."

Yours faithfully,

FRANK WARBURTON.

Greenhow Hill Vicarage, Pateley Bridge,

N. E. Railway, Yorks, Dec. 4th, 1912.  
DEAR SIR,—Your enclosure to hand with many thanks. The width of the 'Hue' Grate (front) is 16 inches, or a trifle over. We want you to send us Bracket Tray Table for this 'Hue' Grate—'All Herlin Black Finish.' Will remit on receipt of account. I should also say how satisfied we are with the 'Hue' Grates in the two important things of much more heat in the room, and a quite appreciable saving of fuel."

Yours faithfully,

S. B. PORRITT

## FROM A DECORATOR:

235 Lewisham High Road, London, S.E.  
Messrs. YOUNG & MARTEN, Sept. 25, 1913.  
Stratford

DEAR SIR,—Enclosed please find order for 2 'Hue' Fire Baskets. I am pleased to inform you I have now fitted 21 of these Stoves in the neighbourhood, and in every case they are giving entire satisfaction. My customers are recommending them to their friends, and I look forward to having a good season with these Fires. Can you supply me with another hundred Booklets?"

I remain Yours truly,

A. W. OUNSTED.

Black Bull Hotel, Morpeth.

February 6th, 1913.

GENTLEMEN,—Re yours of 4th. You are at liberty to print my remarks re your 'Hue' Fire. It has given every satisfaction—a great saver in fuel and throws out the heat INTO the room. Without a doubt it is decidedly in front of the ordinary Bar Grate Fire."

Yours faithfully,

J. CLARK.

166 Broomhall Street,

Sheffield, October 1, 1913.

"I have fixed one of your fires in my own home, and the result has been highly satisfactory; in fact in the first six months it has saved itself in coal; so I can do nothing else but recommend them."

Yours truly,

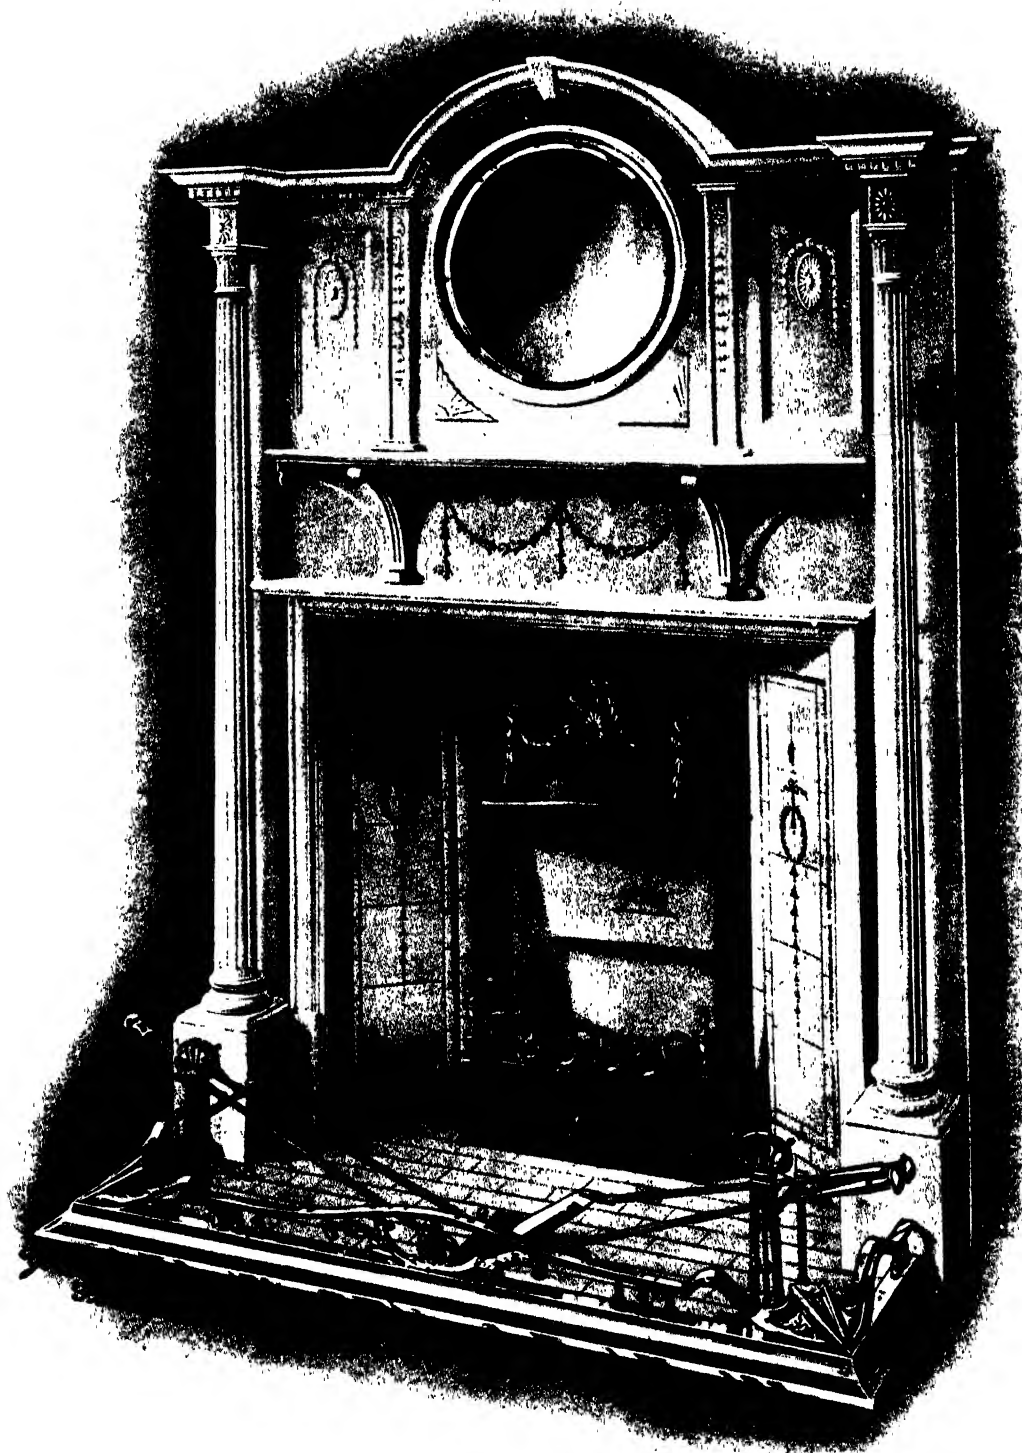

GEORGE A. SIMPSON

Sunny Corner, Hornsea, E. Yorks.

DEAR SIR,—Certainly you may use my remarks praising your Grate which is a little treasure. I have told many people of it, and have been the means of their getting them, and only last month my mother put two in for a tenant in one house."

Yours truly,

M. WALLIS.

# Self-Setting Cooking Ranges

FOR HOME AND COLONIAL USE.

## THE "DOVER"

Latest and most improved Stove in the market.

Fitted with extension hob attachable to either end of stove. Drop-down front bars and iron linings for wood, angle bars and brick linings for coal. Oven door can be opened by means of foot catch; ornamental fret under oven door lifts automatically when oven door is released to level of oven bottom. Nickel-plated nameplate and air-cooled door knobs. Feet, doors, cups, and fittings so constructed that if replacements are wanted the parts fall readily into place without any fitting. Poker, raker, and litter with each stove.

Nos.	Sizes of Hot Plate in Inches.	Sizes of Oven in Inches.	Price, each.
R 5550A	28 x 17½	13 x 12 x 8½	45/-

# The "Castle" Cooking Range

Is the acme of refinement and utility. Substantially constructed throughout. Flues self-contained, bisecting the ovens, ensuring complete results from fuel consumpt. Economical in use—large or small fire at will by raising grate arrangement. Vertical steel fire bars, replaceable in a few seconds. Removable grill over fire box. Asbestos-lined oven doors enamelled inside face. Woodite heat-resisting knobs to doors. Indicating long rod dampers. Upper hot closet with glass inspection slide. Foot pedal opener to oven doors. "Phoolproof" or self contained flues to ovens. Requires no specially skilled labour to set same.

## Instructions for Building-in or Setting our CLOSE, and OPEN and CLOSE FIRE KITCHENERS

### DESCRIPTION OF DIAGRAMS

Diagram 1 shows in perspective the brickwork necessary for a left-hand oven and boiler "Crest," "Foremost," "New Reflex," "Georgian," "Major," "New Dual," "Alberta," "Chancellor," or similar Range when completed, presuming the ironwork were removed. DDD are dampers, OF is oven flue, FF is fire flue, BF is boiler flue, RPRPRPRP are rests for hot plate, PPP are brick piers, OC is oven hot chamber, SBW is solid brickwork, MF is mid-feather under oven, A is brickwork under oven, IB is inlet to boiler flue, BR is rest for side boiler.

Diagram 2 shows the Range in its position, with portions removed to show the purpose of the flues, indicated by the heat travelling from fire over top of oven, down outer side, under oven, round mid-feather to flue; also in same manner over boiler, down outer side, under boiler to flue. O is oven, FB FB are fire-brick cheeks, NB is nozzle side boiler. RBG is brickwork for resting the cast-iron bottom grate.

Diagram 3 is section of Open and Close Fire Arrangement and "Eagle" Patent Adjustable Fire. V is ventilator, D is damper, H is hood, BB is bath boiler, DB is drop bar, BBF is bath boiler flue, RB is patent raising bottom grate (the dotted lines indicate the bottom grate in its raised position), R is special poker for lifting bottom grate, CS is clinder sifter, AP is ashes pan.

Diagram 1.

Diagram 2.

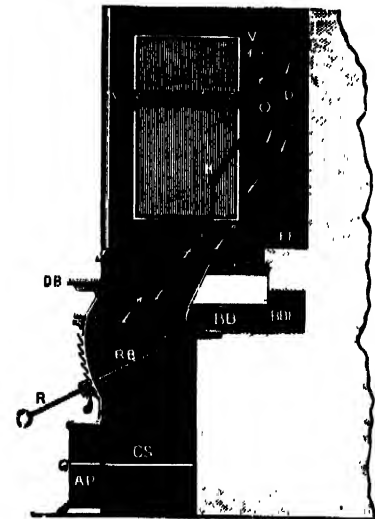

Diagram 3.

The above diagrams and description indicate the arrangement of flues, and show the brickwork necessary in building-in our Close Fire or Open and Close Fire Ranges. The following hints should be carefully noted: Fit the Range in its proposed opening temporarily, and ascertain that it is complete, and that all the parts are at hand, and note their respective purpose.

Prepare brickwork as shown in Diagram 1. This is best done in connection with setting the ironwork. Commence with the oven first. A must be the exact level with bottom of soot plug under oven; the same applies to boiler side. Build up piers PPP to level of hot plate. Leave flues about 4 inches deep, and above hot plate these should be increased to 6 inches deep, and all flues carried at least 2 feet above the height of top of iron coverings, then turned into the main flue or chimney. Build up as follows: two projections BR for boiler to rest upon. RP should project slightly for the hot plate to rest upon. IB shows the inlet to boiler flue. Build up brickwork RBG for rest for bottom grate, and SBW solid brickwork with fire-tile front. In the case of a high pressure bath boiler being used, the latter occupies this space (see Diagram 3), but built up quite close to the fire and to the hot plate. The space OC at back of oven should be as large as possible consistent with the size of oven, so as to give as much heating surface as possible. The flues must not be cramped, but may taper slightly towards the dampers DDD and these should regulate minimum size. In the case of using the open and close fire, as shown in No. 1323, "Alberta," and Diagram 3, the most advantageous method of constructing flue to bath boiler is by arranging heat to pass under boiler into direct flue. With double oven ranges the same process is applied to both ovens as indicated above to the one. The covering-in plate must be perfectly air-tight. In fact, no air should be allowed to pass into the flues but by means of the fire box. Finish off all flues quite smooth and smoke tight, and separate from each other. Give time to allow the mortar to set before lighting the fire, and then only a small fire should be kindled. Before doing this, loosen all screws.

### Instructions for Using our CLOSE, and OPEN and CLOSE FIRE RANGES

To kindle the fire, shut the Range down to a close fire and open the damper to fire flue only. In a few minutes the fire will have burned bright, and the Range will be ready for cooking operations; in the case of the "Eagle" Patent Adjustable Fire, for small service, it will not be found necessary to add fuel after the fire has been once made up, but by raising the bottom grate at intervals one notch on ratchet, an even and equable heat will be maintained, and be an immense saving in fuel, as at end of cooking operations only a very small amount of unconsumed fuel will remain in fire box this also can be used for further necessary culinary purposes.

To heat oven, open damper of oven flue only; the same applies to boiler when specially needed. The small soot plugs, arranged for the purpose of cleaning the flues, must in every case be placed tight in their respective positions. All the flues must be thoroughly cleaned by sweeping with the flue brush and soot raker at least once in every week.

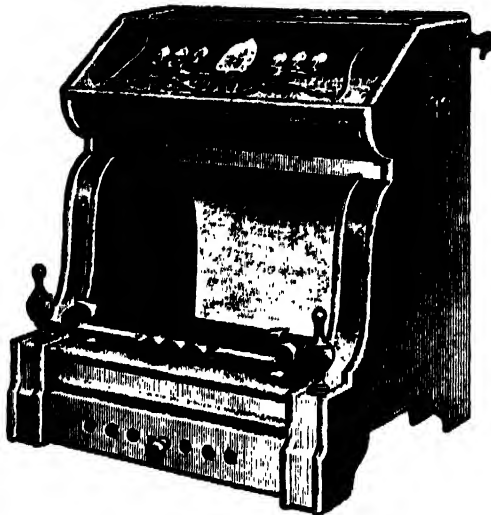

### ADVANTAGES OF THE RAISING FIRE ARRANGEMENT

Which can be applied to our "Crest," "Foremost," "New Reflex," "Georgian," "Major," "New Dual," "Alberta," "Regal," and "Chancellor" Kitcheners. See pages 108 to 117.

It is usual to have the Open Fire Arrangement when the "Eagle" Fire is required; we can, however, apply the latter to Close Fire Ranges. The immense advantage of having a fire of the size required must be obvious to every one. For instance, a fairly large fire is required at first to heat the oven, hot plate, &c., but when hot a very small fire (if in the right place) will keep it so; but with ranges which have the fire box always of one size, the fire must be kept full up, close to the hot plate, or the air will pass over the top of the fire into the flues, instead of through the fire, and in consequence the ovens are cooled down. Now, with the Raising Fire, when the Range is thoroughly heated, the fire can be raised close to the hot plate, so that, with only a handful of coal burning, no air can possibly pass into the flues except through the fires.

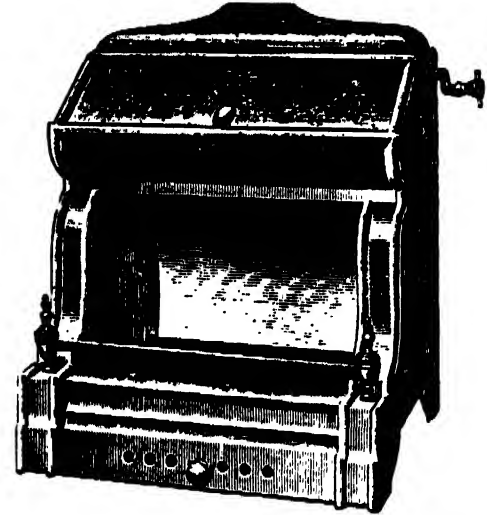

The adjustment of the bottom grate is very simple, and is instantly raised or lowered (when in use) with an ordinary kitchen poker. We can guarantee an enormous saving both in time and fuel by the use of this arrangement of fire box; the fire is lighted very rapidly, burns small coal and of a very inferior quality, and the combustion is so perfect that very little soot is found in the flues.

## Hot Air Stoves

EXTRAS to No. R 5294.  
Brass or Copper Repoussé Panel, 17 3  
With Raised Top, 5 3

### The "ARTESSE"

REGISTERED TRADE MARK.

All sizes of "Artesse" Stoves are now fitted with a Patent Automatic Check Valve which equalises the draught in the chimney and increases ventilation.

Handles and fittings of hopper door, fire door, and ashpan are nickel-plated.

Prices of "Artesse" Stoves in Full Armour Bright Finish quoted on application.

Without Surround—Nos. 2, 3, and 4.

### PATENT "ESSE" STOVES with PRESSURE BOILERS, for Heating Hot-water Pipes or Radiators.

Nos. 3 and 4 "ARTESSE" STOVES can be supplied with Wrought-Iron or Cast-Iron High Pressure Boilers fitted at the back of the Fire-chamber.

This arrangement is most convenient for heating a room adjacent to the one in which the Stove is placed—the hot water circulating through radiating pipes or a Hot-water Radiator. It may also be used in conjunction with a small cylinder (about 20 gallons) for giving a supply of Hot Water for Bath or other purposes.

The Boiler in a No. 3 size Stove is powerful enough to heat radiating pipes or a radiator large enough to keep a room of 2000 cubic feet nicely warm, and the No. 4 size to warm an adjacent room of 3000 cubic feet.

#### TWO ROOMS HEATED WITH ONE FIRE.

The cost of fitting any of the above Stoves with a Wrought-Iron Boiler is £3 8 6 extra to Price Do., do., with a Cast-Iron Boiler is 2 2 0 of Stove. Quotations for Copper Boilers on application.

# Anthracite Coal Stoves

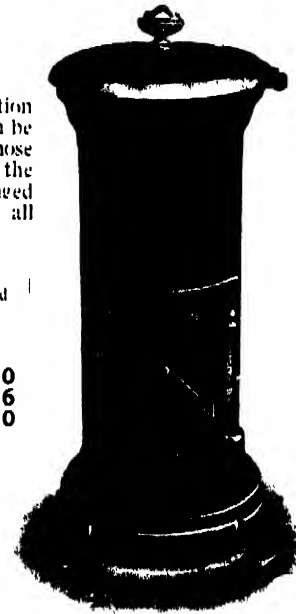

## The "SOLESSE"

REGISTERED TRADE MARK.

An Improved Circular Continuous Burning Stove, fitted with a swinging ornamental top. The upper portion of the body acts as a hopper for the fuel, and the ashpan being fitted with the "Esse" Patent Regulator, it can be kept alight for 8 to 12 hours. Though this type of Stove is not so suitable for sitting-rooms and bedrooms as those shaped like the "Contesse," it will be found very convenient for small Halls and Offices. The body of the "Solesse" is made of Polished Blue Steel Plate, and the inside is lined with fire-brick. It is fitted with Hinged Fire Bars, Fire Door with Mica Panels, Removable Ash Tray, Asbestos jointed Feed Door on top, and has all the mountings nickel-plated. A Key for the Door and a Coal Chute are supplied with all "Solesse" Stoves.

No.	Average Heating Capacity	Width over Feet.	Depth over Movable Tray.	Height over all.	Height to top of Fire Collar.	Plain Finish.	Black Vitreous Enamel.	Majolica Enamel in Various Colors.	Ruby Red Majolica Enamel.

\* Without Tray, Depth is reduced by 4½ inches in all cases.

## The "ORESSE"

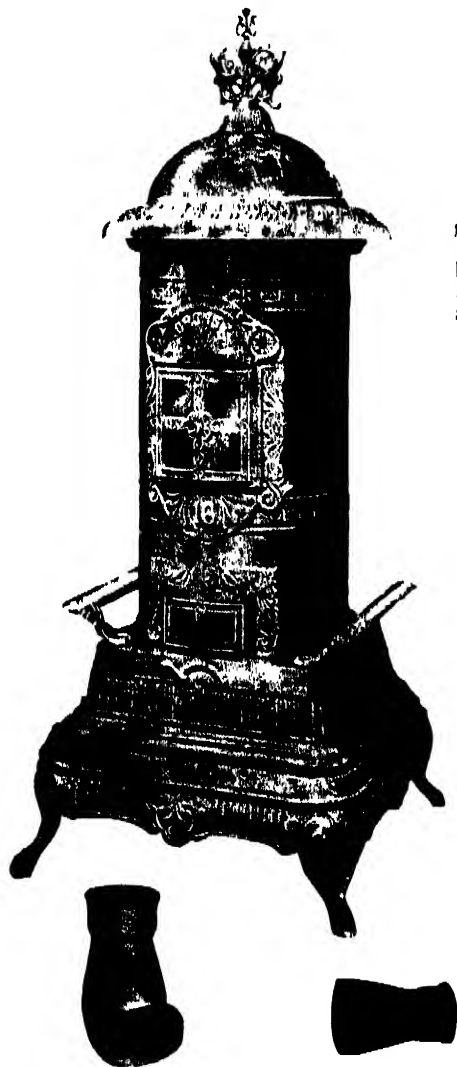

REGISTERED TRADE MARK.

A handsome Cylindrical Hall Stove with Embossed Steel Body. It is fitted with an improved Fire-grate arrangement, and is suitable for use with Anthracite Coal or Coke. "Oresse" Stoves (except No. 10 size) are supplied with the following parts nickel-plated: Top ornament, steel moulding round bottom edge of dome, foot rests at sides, and all handles. No. 10 has smaller nickel-plated top ornament and handles, but is not fitted with steel moulding and foot rests, and is without reversible flue at back.

NOTE.—Suitable for "Contesse" and "Artesse" only, shown on page 129.

# Heating Stoves

## No. R 4319. THE "TORTOISE" RADIATING STOVE

Perfect Combustion Assured.  
No Unpleasant Fumes.

Inlet for fresh air can be underneath the bottom, or on either side, in any position, instead of at back as shown.

PURE AIR FROM OUTSIDE BUILDING

With Horizontal or Vertical Nozzles and Fire Tile Lining and Hearth. Stoves sent Horizontal Nozzles unless otherwise ordered.

It will be seen by the illustrations that this Stove is so constructed that the fresh air enters the Stove at the base through the inlet tube, which is connected to the outside grating by a pipe. The air ascends through the tubes of corrugations, getting warmed as it passes over the cylinder, till it finally passes out at the top, through holes and slots especially constructed for the purpose, into the room as Heated Fresh Air.

Each Stove is fitted with a valve by which the cold air may be excluded when Stove is not in use.

The Stove is adapted in every way to meet the requirements of the Education Authorities.

## No. R 808. THE "QUEEN" OFFICE STOVE

The "Queen" pattern is a general favourite, and is highly commended for bedroom, office, shop, or cabin, as, in addition to its use as a warming Stove, it may be transformed into a Cooking Stove by simply removing the elegant ornamental top, which stands

directly over the two fire covers. This Stove is fitted with fire-brick lining, and the sliding doors in front assist in kindling or deadening the fire as required. It is supplied with cup-lifter and poker.

P 356. Bell Head, ...	1 6	1 6	1 9	2 -	2 3			..

No. P 354.  
Square Pipe,  
with  
Ornamental  
Mountings.

	Sizes, . . . . .	1½ x 1	2 x 1½	2½ x 2	3 x 2½	4 x 3 inches,
P 354.	Square Pipe, . . . . .	3 6	4 -	4 3	4 10½	5 9 per 7-ft. length.
	Sizes, . . . . .				1½	2 inches.
No. 12 Gauge	Square Capping, . . . . .				1 9	2 4½ per 8-ft. length.

O.G. Gutters can be supplied in Nos. 11, 12, or 14 Gauge, to order.

## PERFORATED SHEET ZINC

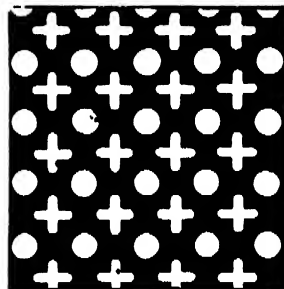

No. 9 Gauge. In Sheets, 8 x 3 feet.

Meat Safe Hole

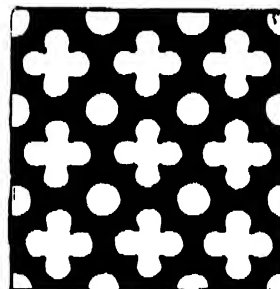

Perforation No. 8.  
Price, 6 6 each.

Bird Cage Pattern

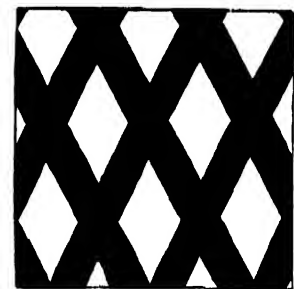

Perforation No. 15 G.  
Price, 7 6 each.

Fancy Pattern

Perforation No. 16 G.  
Price, 7 6 each.

Diamond Pattern

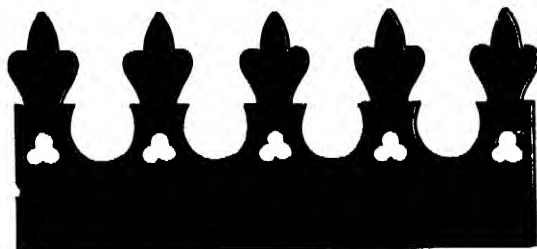

Perforation No. 21 D.  
Price, 7 6 each.

Any pattern cut to sizes, price, 6d. per foot super.

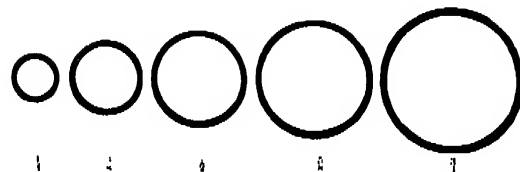

The designs shown are those mostly in demand, but we can supply any other pattern upon receipt of particulars.

## No. P 70. ZINC FRETS

Fret Nos.,	56	70	35	34	28	29
Width, ...	1 1/2	1 1/2	2 1/2	2 1/2	2 1/2	4 1/2 inches.
Prices, ...	1 3	1 9	2 3	2 3	3 4 1/2	3 9 per 8-ft. length.

## ZINC BELL TUBING

Prices, ...	1 1/2 d.	1 1/2 d.	1 1/2 d.	1 1/2 d.	1 1/2 d.	1 1/2 d.
	4 1/2 d.	5 1/2 d.	6 1/2 d.	8 1/2 d.	10 1/2 d.	1 3 per 8 ft. length.

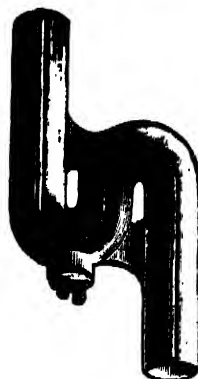

## Lead Traps and Sundries

No. P 1916. Cast Lead P Trap

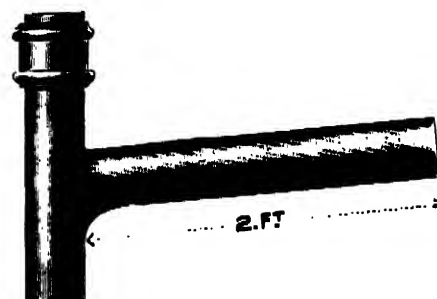

Sizes, 1 1/4 1 1/2 2 ins.  
With Brass Access Screw, 2/6 3/- 4 - each.

No. P 1917. Cast Lead S Trap

Sizes, 1 1/4 1 1/2 2 ins.  
With Brass Access Screw, 2/9 3/3 4/9 each.

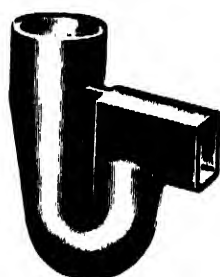

No. P 2199. Cast Lead Junction  
8 lbs. Lead.

With Arm, 9 12 15 18 24 ins.  
Prices, 12/6 13/6 14/9 15/- 18/- each.

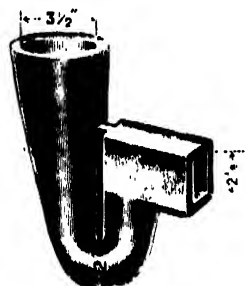

### Hellyer's Patent Cast Lead "Anti-D" Traps

No. P 343.

4 1/2 to 4 inches.  
8 lbs. lead, for water-closets,  
slop-sinks, &c.  
Price, 10 - each.

No. P 344.

3 1/2 to 2 inches.  
9 lbs. lead, for sinks,  
baths, &c.  
Price, 5 6 each.

No. P 345.

1 1/2 inches.  
9 lbs. lead, for lavatories,  
&c.,  
Price, 3 - each.

No. P 346.

1 1/2 inches.  
With enlarged mouth, for  
sinks, baths, &c.  
Price, 3 3 each.

If with Brass Screw-cap to Traps Nos. P 344, P 345 and P 346, 1/6 extra.  
Nos. P 344, P 345, and P 346 will be sent with Brass Screw-cap unless otherwise ordered.

No. P 1640. Lead Pipe Clip

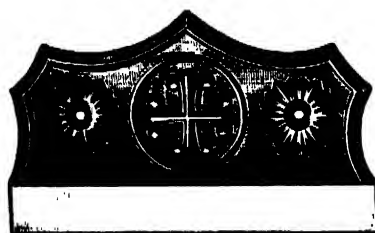

Bore of Pipe,	1	1 1/2	ins.
Prices, ..	2 -	2 9	3 3 per doz.
Bore of Pipe, ..	1 1/2	2	ins.
Prices, ..	4 6	7 6	per doz.

Clips are made to fit external diameter of pipes of the bore given above.

No. P 1630.

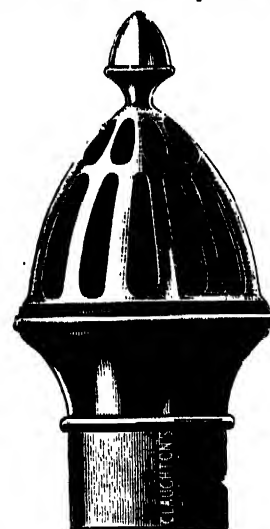

#### Single Cast Lead Tack

Equal to 10 lbs. lead.

For Pipes	1 1/2	2	2 1/2	ins.
Prices, ..	3 -	3 3	5 -	per doz.
For Pipes	3	3 1/2	4	ins.
Prices, ..	7 -	8 3	10 6	per doz.

No. P 3729.  
Patent Lead Soil Pipe Terminal

Sizes,	2	2 1/2	3	3 1/2	4	ins.
Prices,	2/9	3/6	4/6	5/-	5/6	each.

Sizes, 1 1 1/2 1 3/4 ins. diam.  
Prices, 2/6 3 6 5/- each.

Sizes, .. 2 3 ins. diam.  
Prices, .. 7/- 16/9 each.

## The "Perfik" Roof Slate Fastener

No. P 6329.

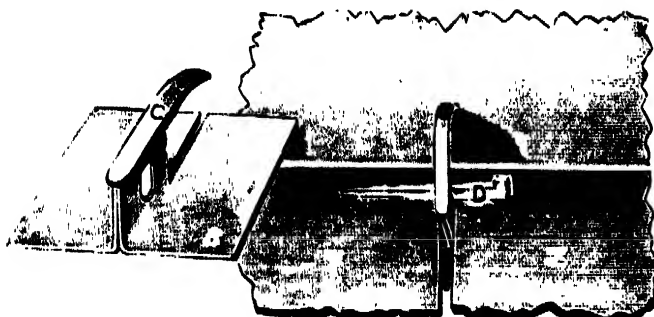

Packed in one gross boxes, complete with Galvanized Wedges.

Price, .. 11/3 per gross.

Not less than Gross Lots supplied.

DIRECTIONS FOR FIXING PATENT FASTENER.

Remove damaged Slate. Replace with new one X. Slip the flanges A B of Strap under the old slates Y Z, the part C standing up between the same. Push the strap upwards until the notch in part C retains the bottom edge of the new slate X. Insert the wedge D into the hole in Fastener, and drive it until sufficiently wedged to secure the slate from slipping.

# Barron's Patent "Anti-Foul" and Accessible Sink Traps

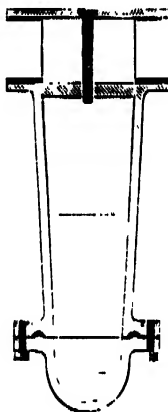

MADE TO L.C.C. REQUIREMENTS AND SUITABLE FOR ALL SINKS.  
AS SUPPLIED TO H.M. GOVERNMENT WORKS.

No. P 6570.

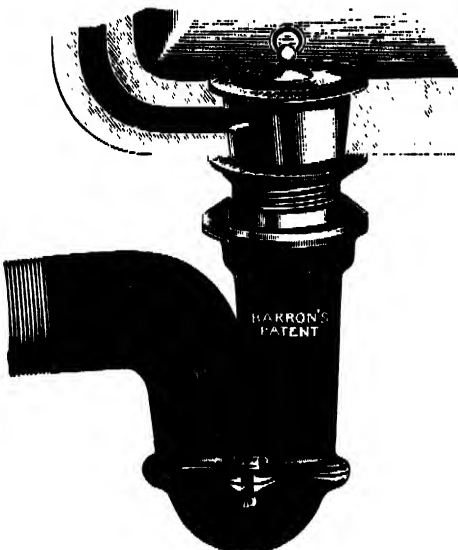

WATER SEAL, 2 Inches.

No. P 6570. Cross Section

- Galv. C.I. Trap with S.P. or Q Plain  
Outlet and Brass Grate, .. 5/-  
Galv. C.I. Trap with S.P. or Q Screwed  
Outlet and Brass Grate, .. 6/3  
Grates are made 2½, 3, 3½, and 4 ins.  
diameter.  
3-in. Grates sent out unless other  
size ordered.

No. P 6572.

- Galv. C.I. Trap with S.P. or Q Plain  
Outlet and Brass Waste Plug  
and Washer, .. 12/6  
Galv. C.I. Trap with S.P. or Q  
Screwed Outlet and Brass Waste,  
Plug and Washer, .. 13/-  
Brass Trap with S.P. or Q Plain  
Outlet and Brass Waste, Plug  
and Washer, .. 24/6  
Brass Trap with S.P. or Q Screwed  
Outlet and Brass Waste, Plug  
and Washer, .. 25/6

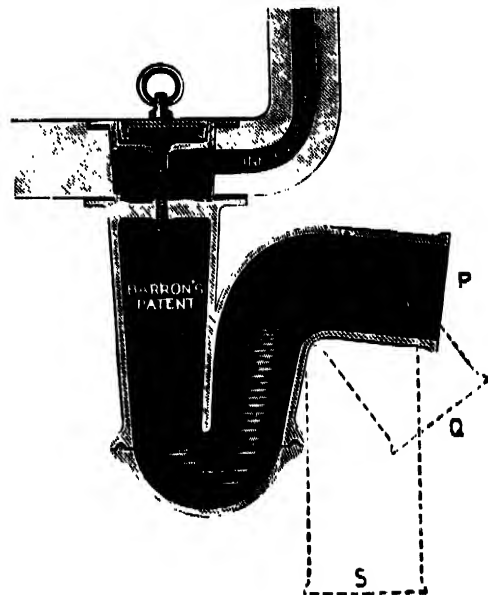

None genuine without this  
Trade Mark.

Observe on Section P 6572, the  
advantages of these Accessible  
and Self-cleansing Traps with  
Grate **below** not above Over-  
flow as hitherto made, ensuring  
a sound connection between the  
2½ to 2 in. tapered Brass Waste  
and Sink at Overflow, also  
access for sweeping.

All Clearing Caps are made  
thoroughly watertight, with  
specially prepared greased hemp,  
forming a perfect seating. Each  
Trap is tested before being sent  
out to customers.

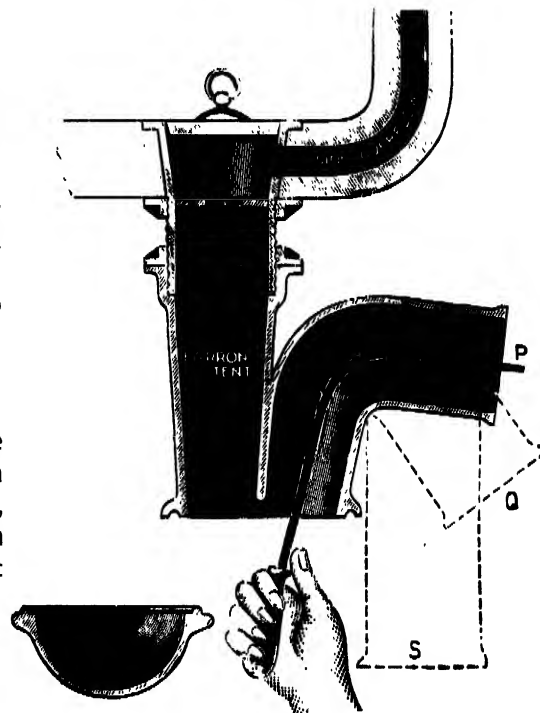

No. P 6571.

- Galv. C.I. Trap with S.P. or Q Plain  
Outlet and Brass Plug and Grate, .. 6/9  
Galv. C.I. Trap with S.P. or Q Screwed  
Outlet and Brass Plug and Grate, .. 8/-

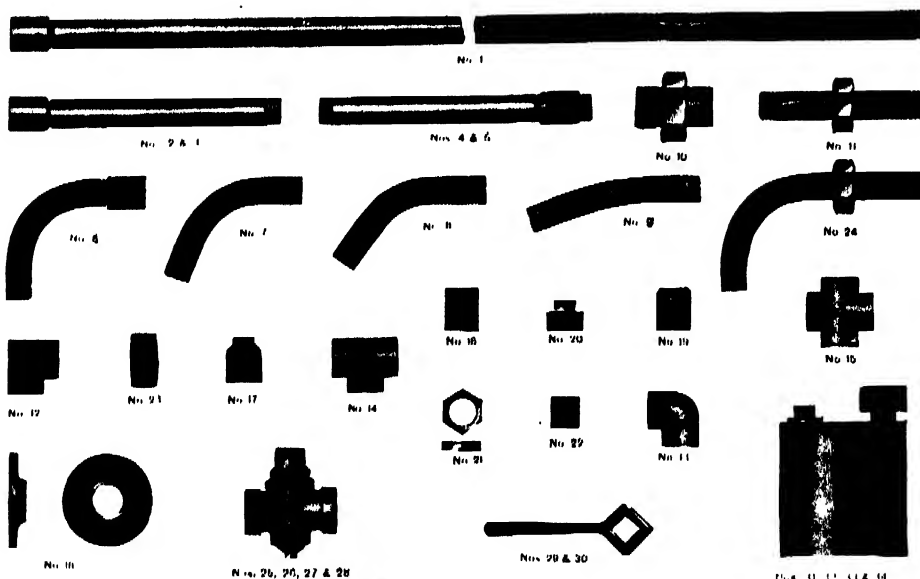

No. P 6572.

# Drain Cleansing and Chimney Sweeping Apparatus and Accessories

No. P 3000. **Drain Cleansing Apparatus**

Complete set with 3-foot rods, roller guide, worm screw, and plunger.

Sizes, 30 40 60 80 100 feet.  
Prices, **22/6 30/ 45/ 57/- 75/-** per set.

Sweep's Head Brush, **4/6** extra.  
6-inch Drain Brush, **3/9** ..

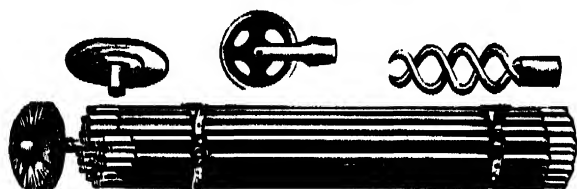

No. P 4419. **Chimney Sweeping Machine**

A very complete and useful Chimney Sweeping Machine at a low price, suitable for builders, farms, hotels, &c., of excellent quality and guaranteed to give satisfaction. Each Machine consists of specially-tested red malacca canes fitted with interchangeable brass screws, steel-riveted 16 or 18 inch chimney brush, hand brush, soot shovel, best hair flue brush, chimney cloth to cover fire-place, with cloth slide stretcher for same, and straps.

Prices 40 feet, **57/6**; 60 feet, **75/6**; 80 feet, **96/-**; 100 feet, **111/-** per set.

No. P 6328. **The Contractor's Machine**

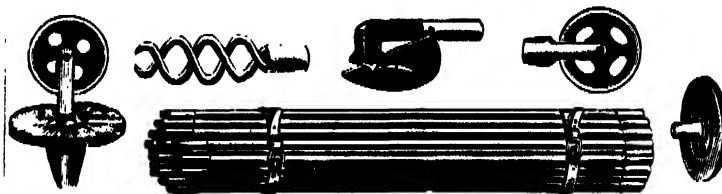

Consisting of red malacca canes, brass clearing wheel, double worm screw, 4-inch water-closet stout rubber plunger in brass fittings, for unstopping water-closets. Drain brush and straps.

Sizes, .. 30 40 50 60 70 feet.  
Prices, .. **33/- 39. 45- 54 - 60/-** per set.

Sizes, .. 80 90 100 150 200 feet.  
Prices, .. **69/- 75 - 81 - 117/- 150/-** per set.

No P 6135. **The "Council" Machine**

Fitted with Interchangeable Brass Screws.

This is a high-class machine, the canes used being a special tough and sound malacca. Only best whalebone, iron forgings and best brass castings used. Supplied in 36-inch lengths, including 4 or 6 inch whalebone head, double worm screw, 4-inch drop scraper, 4-inch rubber plunger, and brass clearing wheel.

Sizes, 30 40 50 60 70 feet.  
Prices, **42/- 49/6 60 - 66/9 75/9** per set.

Sizes, 80 90 100 150 200 feet.  
Prices, **84 - 92/3 100/6 144/- 183/9** per set.

No. P 5118. **Patent Swivel Collar Locking Joint Set, Extra Strong Pattern**

For Drains, Sweeps, Electrical and Telephone Work.

With 6-inch Whalebone Head, Double Worm Screw, 4-inch Drop Scraper, Rubber Plunger and Brass Wheel.

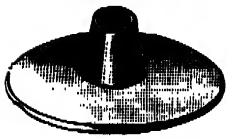

The Joint is made of cast brass and is the simplest and most satisfactory locking joint yet produced, being simpler than the ordinary pattern, but at the same time a perfect locking joint. The locking is accomplished by the square head engaging in a slot in the ferrule. Particular attention is drawn to the fact that there is nothing to get out of order. No springs. No loose ferrules to get lost. No pins. No projections on the outside of ferrules. No space where dirt can collect. Only the best malacca canes used, which are specially selected to fit ferrules without paring down and are free from dry rot.

Sizes, .. 30 40 50 60 70 80 90 100 150 200 feet.  
Prices, .. **51/- 60 - 72 - 84/- 96- 104 - 120/- 130/- 180/- 228/-** per set.

Archimedean Screw.

Price, 2/6 each.

## The "Ferret" Flexible Spring Drain Cleaner

(Showing section of Water-closet Pan  
and Trap with Cleaner passing through.)

No. P6136.

Showing Cleaner passing through  
Gully Trap.

HANDLE.

JOINT.

The Flexible Drain Cleaner is formed of the finest steel wire, closely coiled to transmit the thrust of the handle throughout the whole length.

It is still so flexible that, as will be seen from the illustration, the Cleaner may be passed through such abrupt bends as occur in a gully or water-closet trap - an impossibility with ordinary cane rods.

Any number of lengths may be added as required, and, owing to its spiral formation, the Cleaner can be twisted and turned to right or left in the drain, whereby the screw point can get a grip of and disintegrate an obstruction.

Obstructions can usually be removed by applying the Cleaner at a gully, water-closet, or any other inlet, thus obviating the frequent necessity of opening up the ground and breaking into a drain.

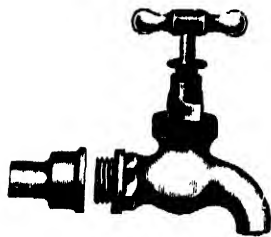

The Cleaner may be applied with advantage to ordinary cane rods, and an adapter joint is supplied with each set for this purpose.

Price per set, 6 feet long (in two 3 feet lengths), including Handle, Adapter Joint for cane rods, and Tool for unscrewing the Joints, without which the Joints cannot be unfastened under any circumstances, ... 15/9

Extra 3 feet Jointed Lengths, 6/- each.

Revolving Head  
New Smoke Conductor

This new Revol-  
ving Cowl is re-  
commended for  
its adaptability  
to the purpose  
intended.  
It is strong,  
being made of  
galvanized iron,  
and is ornamen-  
tally japanned.  
It is fitted with-  
out the usual  
screw, but with  
open vanes  
which project to  
catch the wind.  
It cannot pos-  
sibly choke or be  
damaged by fire,  
or injured by the  
sweep's brush.  
The Hood is  
fitted with great  
nicety and turns  
on a steel centre  
in oil, whilst the  
central shaft  
works in gun-  
metal bearings.  
Height, 4 ft.  
Diameter, 11 ins.  
42/- each.

## No. P 6121. THE "BRITANO"

Made in the new Hygeian Ware.

The "Britano" Cistern has been designed to afford a perfectly incorrodible waste preventing cistern of excellent quality, and at a price hitherto unapproached.

Iron cisterns, whether painted, galvanized, or glass enamelled, when subject to the action of water soon rust, causing a red streak which disfigures and ruins the glaze of closet pan and urinal stall. This is impossible with the "Britano" Cistern. It is made of "Hygeian ware" which is highly glazed, it is hard as iron, and when knocked rings like a bell.

Every cistern is warranted not to "Craze" or "Dunt."

The patent combination valveless syphon fittings, which are made of white metal and brass, are quite simple and strong.

Syphonic action is set up by a delightfully easy pull, and the flush, though rapid, is singularly quiet.

White Glazed outside, .. .. .	Per 2 Gallon, 40/6 each.	Per 3 Gallon, 45/- each.
Cast-iron Painted Cistern Brackets, .. .. .	" 3/- per pair.	
Best Celluloid Handle Pull and Nickel-plated Chain, ..	" 5/3 each.

# Plumbers' Brass Work, Soil-Pipe Ferrules, Sockets and Seat Hinges

No. P 6123. **FERRULE.**

The above illustration shows the most perfect form known for connecting the Lead Pipe and the Brass Ferrule together, and emphasizes the value and importance of the concave head.

The Brass Ferrule, as shown, has a concave head formed upon one end. The Lead Pipe passes through the Brass Ferrule, and it is turned over and staved into the concavity of the head, thus forming a perfectly sound and reliable junction without the aid of solder. The Lead Pipe passing through the Brass Ferrule thoroughly protects it from the deteriorating effects of acids, &c. It is jointed to the Iron Pipe in the usual way by means of Rope Yarn and Molten Lead.

## MACHINE-MADE SOLID DRAWN BRASS SOCKETS

The illustration below shows the Lead Pipe connected to the Earthenware horn of the closet by means of the brass socket and cement. This form of socket enables the plumber to make with Portland cement a firm joint absolutely gas and water tight without the aid of solder. The concave bead forms a key which ensures the efficiency of the joint.

The advantages which the Patent Socket possesses over the ordinary cast socket are highly appreciated by sanitary experts.

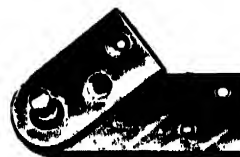

These Sockets are made of solid drawn brass of high quality, and are free from pores and flaws so often found in cast ones.

No. P 2862. **TANK**

Made to be removed from back of Closet.  
With Wheels, holds 36 Charges, .. 39/ each.  
The riser must be 1 ft. 10½ ins. high with a 6½  
inch step. Also made to be removed from  
front or side of Closet.

No. P 2863. **SELF-ACTING CINDER SIFTER**

Amongst the many advantages of this novel and ingenious invention the most noticeable is the almost entire ABSENCE OF TROUBLE AND DIRT.

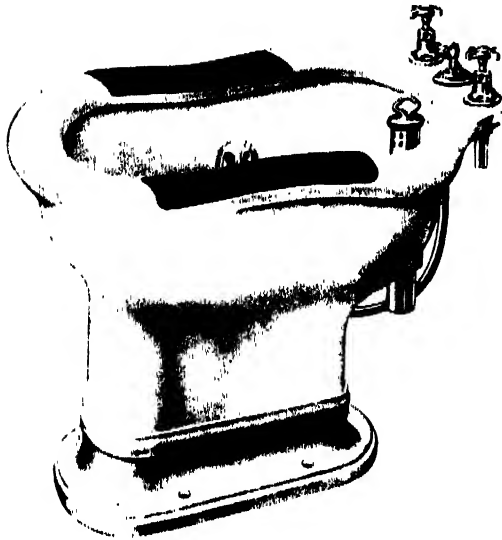

The arrangement of Sifters being self-acting, it is merely necessary to empty the cinders into the hopper, and as they descend they are entirely separated, the ashes passing into the top drawer and the cinders into the lower one.

Price, .. .. 45/- each.

Although designed for use in conjunction with the earth closet system, this Cinder Sifter will be found invaluable for any household.

# Pedestal Bidets and Native Closets

No. P6817. BOMBAY NATIVE CLOSET

WITH TRAP, VENT, AND CIRCULATING RIM.

Height, 18½ ins.  
Overall size on Rim,  
23 × 12 ins.

Also made with Inlet  
at opposite end to that  
shown in illustration at  
the same prices.

		White.	Printed one Color.	Enamelled in Color.
With P or S Trap, ..	.. .. .	Price, 18/9	23/3	28/6 each.
Closet only, no Trap, ..	.. .. .	„ 15/9	18/9	23/3 „

## Pedestal Bidets

These Bidets are furnished with a Circulating Rim, which is warmed by the passage of water into Bidet. A wooden seat is therefore unnecessary, and a most hygienic combination is secured.

No. P 6812. Pedestal Bidet, with Circulating Rim, Fittings for Hot and Cold Water to supply through Rim; Plug and Washer, complete; height, 16 inches; overall measurements on rim, 22 x 15 inches.

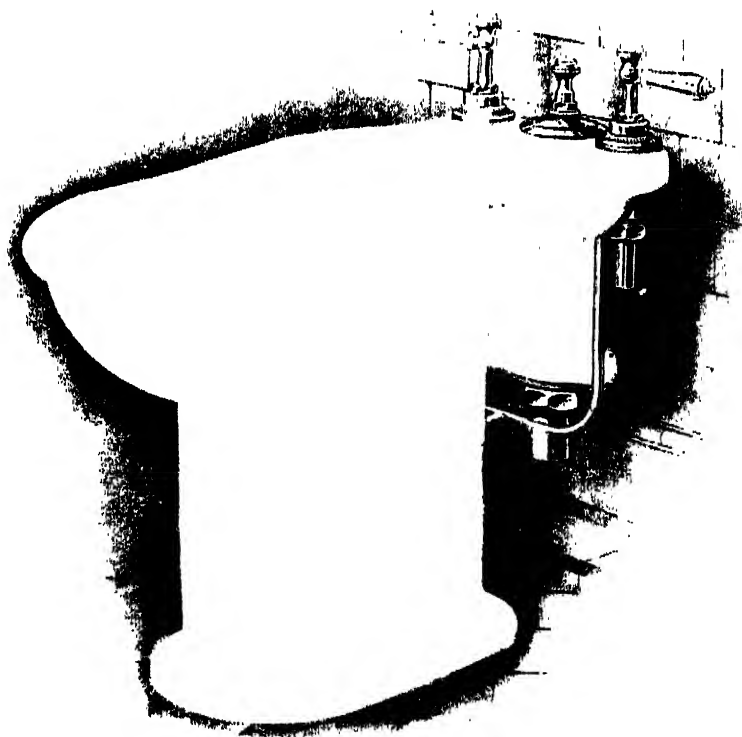

With White Bidet,	Price, <b>57/-</b> each.
With Printed .. ..	<b>64/6</b> ..
Enamelled in Colors Bidet, ..	<b>72/-</b> ..

The Fittings are Nickel Plated.

No. P 6811. Pedestal Bidet, with Circulating Rim, Fittings complete for Hot and Cold Water to supply through Rim or Spray; combined Lift-up Waste and Overflow; height, 16 inches; overall measurement on rim, 22 x 15 inches.

With White Bidet,...	Price, <b>105/-</b> each.
With Printed .. ..	<b>112/6</b> ..
Enamelled in Colors Bidet, ..	<b>120/-</b> ..

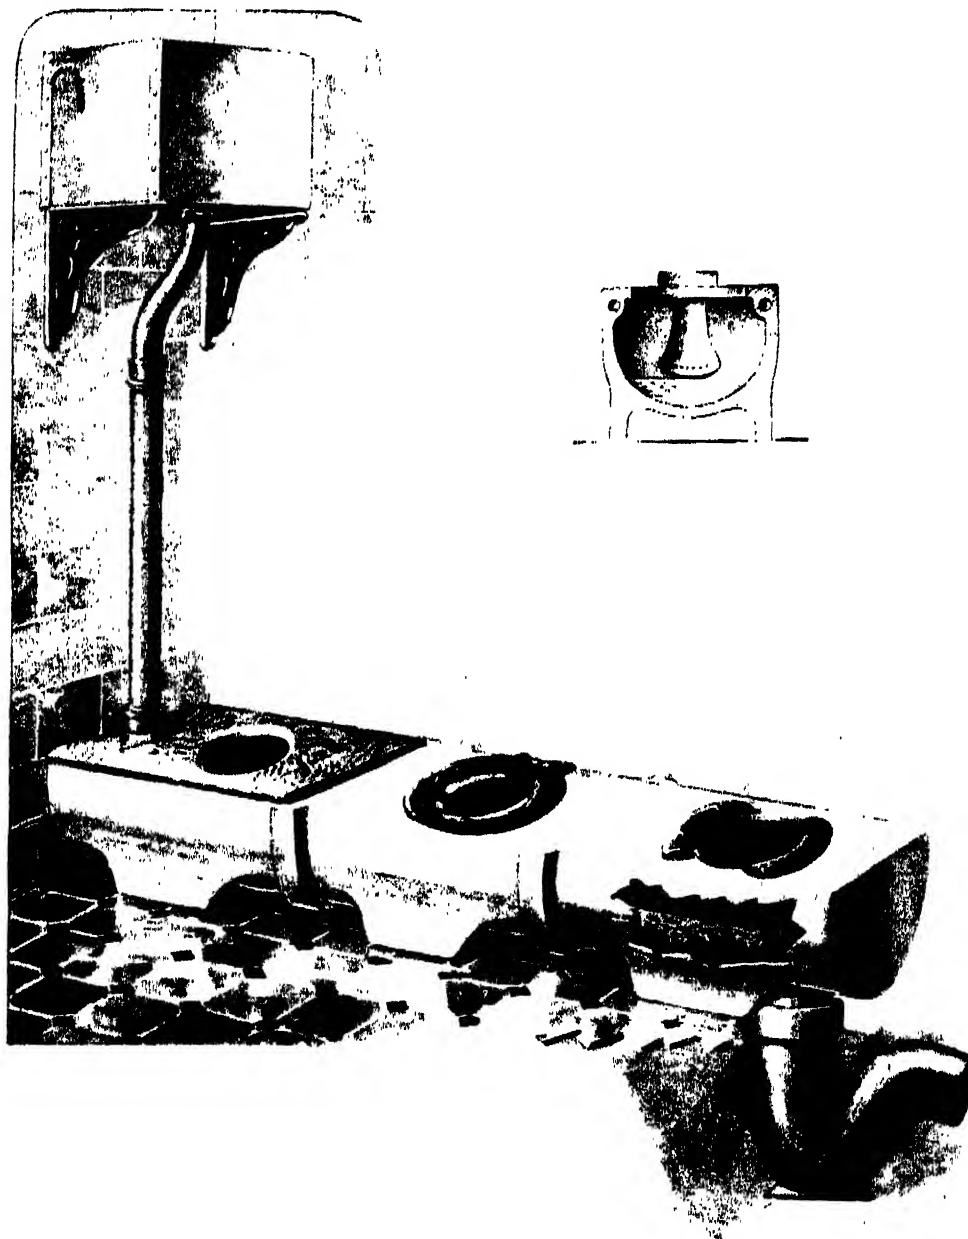

The Fittings are Nickel Plated.

## Reversible Trough Closet Range

No. P 6827. Reversible Trough Closet Range, in buff glazed fireclay, with fan at front and back of openings; galvanized wrought-iron automatic flushing cistern, painted brackets and flush pipe, and 6-inch (15 c/m.) salt glazed trap.

**NOTE.**— The introduction of open fans in these Trough Closets is a decided improvement. At each flush a considerable quantity of water thoroughly washes the sides of the trough, just under the openings, preventing the adhesion of any objectionable matter and keeping the troughs sweet and clean. The fan shape of the inlet also assists in scouring the sides of the troughs. The cistern supplied is nearest stock size to 6 gallons per seat.

Range of 2, 2 ft. 3 ins. centres (68 c/m.),	..	..	Price, <b>£7 10 0</b>	Range of 5, 2 ft. 3 ins. centres (68 c/m.),	..	..	Price, <b>£13 2 6</b>

When more than Five Basins in a Range, Two Cisterns will be supplied.

If Basin white inside and out, add 5/- per basin extra.

Slate Divisions, with Supports as illustrated, 31/3 each.

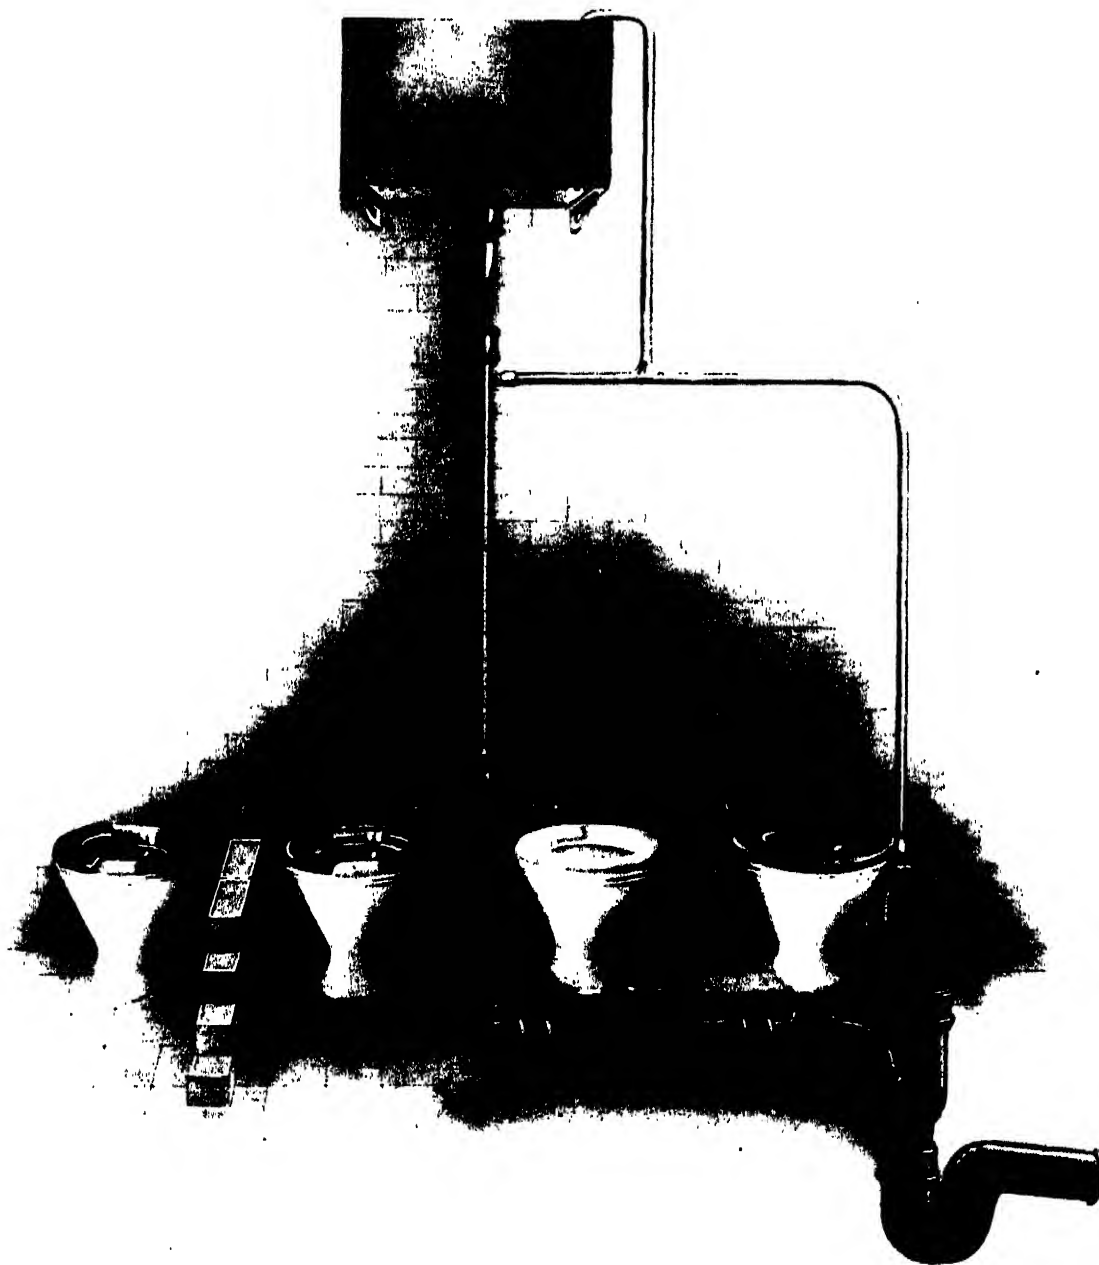

Ventilating Shaft is not included in the above prices.

Orders of £10 net value and upwards are delivered Free to nearest Railway Station.

## Automatic Syphonic Latrine Range

No. P 6828. Range of **Syphonic Fireclay Closet Pans**, white porcelain enamelled inside, buff glazed outside, with "Fixonia" or "Ring" seats; connected to heavy cast-iron soil pipes, with traps, syphon, and access door; lead suction pipe; galvanized wrought-iron automatic flushing cistern; painted cast-iron cantilever brackets; supply and distributing pipes and connections to Closets.

**IMPORTANT FEATURE.**—This latrine is so arranged that syphonic action is started without the water rising in the pans, thus eliminating a fault found in many similar systems.

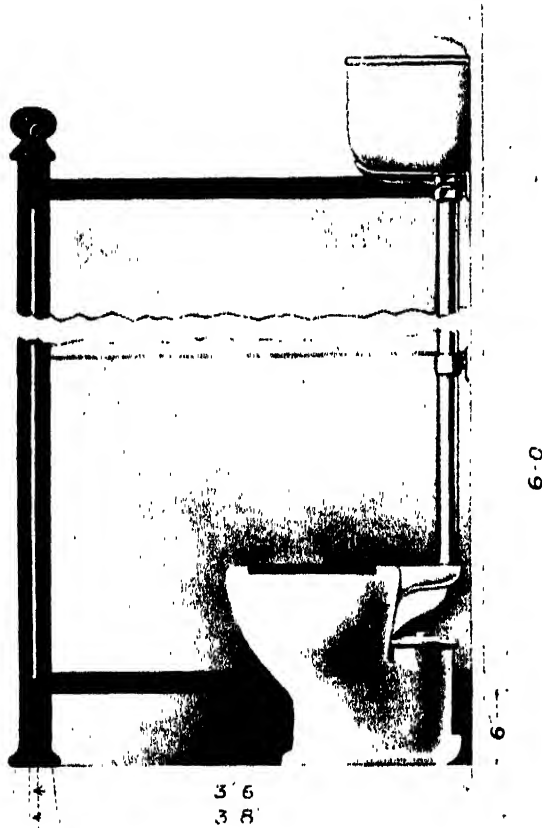

Range of 2, 2 ft. 3 ins. (68 c/m.) centres, ..	Price, £10 12 6	Range of 7, 2 ft. 3 ins. (68 c/m.) centres, ..	Price, £26 17 6

Pedestals suitable for either of the above Sinks, 27/6 per pair.

# Automatic Flushing Cisterns

No. P-441. **THE "TOMATON"**

No increase in water supply is required to start the flush. The last drop does this. Before that drop, the Cistern is sound and watertight. IMMEDIATELY AFTER, the Cistern is flushing at full speed.

## EXPLANATION OF DIAGRAM.

As the water rises in the cistern, the float **A** tries to rise with it, but is held down by the catch **B**. When the cistern is nearly full, float **C** rises and releases catch **B**. Then float **A** instantly rises and opens valve **D**, starting the syphon at full speed. As the cistern empties, the arrangement automatically re-sets itself.

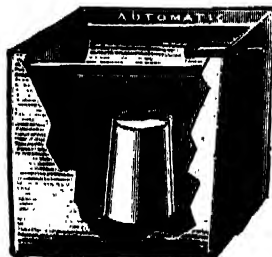

The floats are ABSOLUTELY SEAMLESS and made of sheet copper.

Towel Airers made to other dimensions and designs than shown above, at correspondingly low prices.

# GEYSERS

## THE "EVER-READY" (Patent)

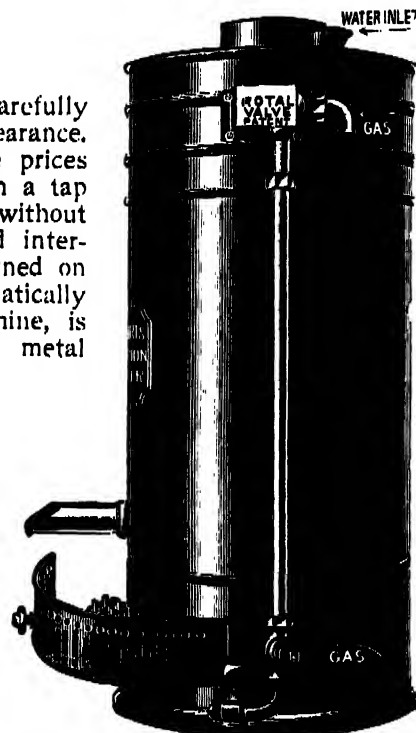

A high-class Geyser constructed with open water chambers of improved design. A splendid bath heater. It is made of strong hardened copper; the water chambers are coated with pure tin. The outside body is splendidly polished and lacquered. The "Ever-Ready" Geyser is made with a fixed burner, which allows the prices to be based at a low figure without reducing the quality of copper used in manufacture.

No.	Description	* Heats per minute. 1½ to 2 galls.	£	s	d
No. P5806A.	With Gas Tap only, ... ..	1½ to 2 galls.	£3	2	6

## THE "CHAMPION" (Patent)

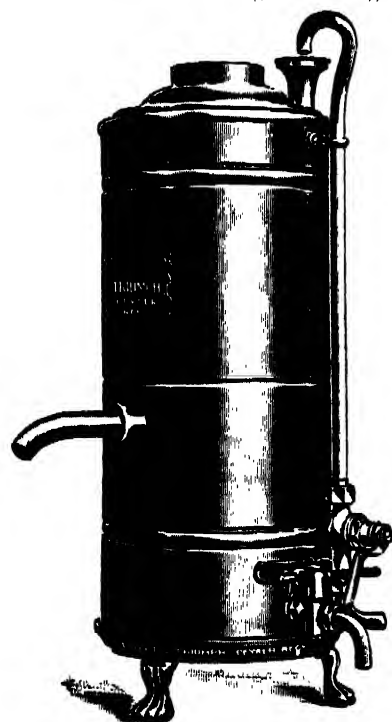

The "Champion" Geyser is made entirely of stout copper, the inside parts are carefully coated with pure tin, the outside polished and lacquered, presenting a handsome appearance. It is complete with swing-out copper burner, ensuring safety in lighting, and the prices include gas tap and union ready for fixing. The water flows into the Geyser from a tap fixed at a convenient height over the machine, which will work equally well with or without water pressure. At slight extra cost it is supplied complete with patent improved interlocking gas and screw-down water taps, so arranged that the gas tap cannot be turned on before the water tap is opened. The addition of the patent "Rotary" Valve, which automatically turns down the gas when the water for any reason ceases to flow into the machine, is strongly recommended. The patent "Rotary" Valve is constructed throughout of metal and is practically indestructible.

No.	Description	* Heats per minute. 2 galls.	£	s	d
No. P1019I.	Not including cold water tap, ... ..	2 galls.	£4	4	0

## THE "TRIUMPH" (Patent)

The "Triumph" Geyser is manufactured to meet the demand for a cheap geyser where first cost has to be carefully considered. It is made of hardened copper throughout (with the exception of the burner). The "Triumph" is well finished, and although low in price it produces good heating results.

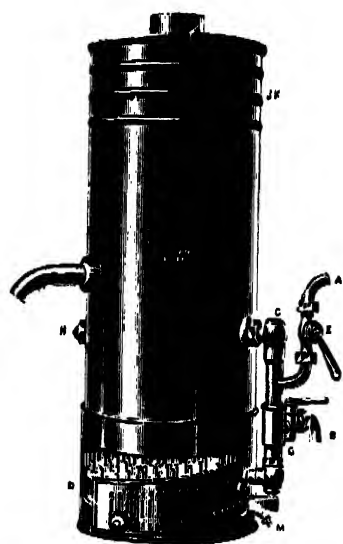

No.	Description	* Heats per minute. 2 galls.	£	s	d
No. P6568A.	With Gas Tap only, ... ..	2 galls.	£2	12	6
" P6568B.	" " " " " " " " " " " "	4 "	4	12	6
" P6569A.	With Interlocking Gas and Water Taps, ...	2 "	3	2	0
" P6569B.	" " " " " " " " " " " "	4 "	5	2	6

\* The temperature of the water flowing at the above rates per minute is raised 40 degrees Fahrenheit above that of the cold supply.

The temperature may be increased or diminished according to the size of the stream.

# GEYSERS

## THE "LIGHTNING" (Patent Registered)

The "Lightning" Geyser is made of stout copper of best quality which is specially hardened, the outside being highly polished and lacquered. In the manufacture of the "Lightning" Geyser a large quantity of copper is used, owing to the special construction of the water chambers. The very large heating surface thus procured, the life of this Geyser is far longer than that of the less expensive patterns. The water chambers are carefully coated with pure tin and sealed, so that the fumes from the burnt gas cannot come in contact with the water.

The "Lightning" Geyser, as well as producing hot water, will also boil water which may be used for drinking or other purposes, as well as for the bath. The automatic valve prevents the gas being turned full on, unless the water is passing into the Geyser. The copper burner swings out for lighting.

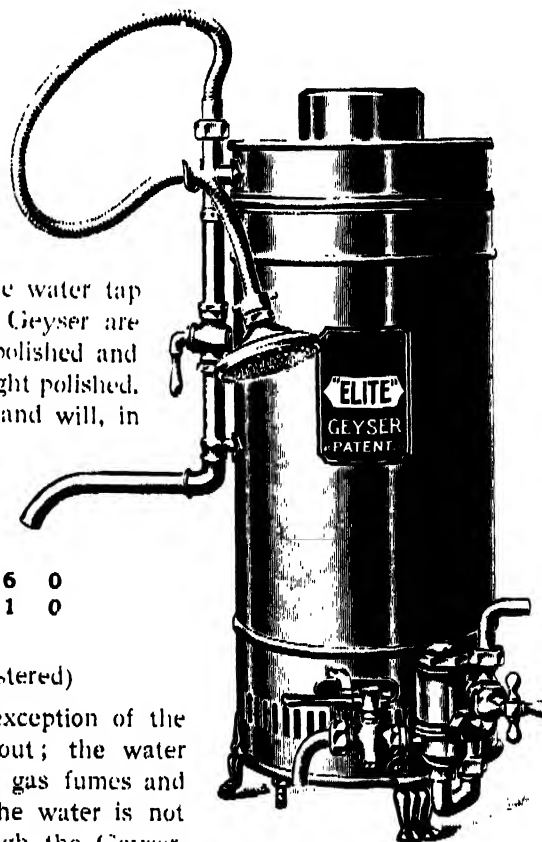

Always sent right hand (as illustrated) unless otherwise ordered.

	Heats per min.	Boils per min.		Heats per min.	Boils per min.	
No. P 1020B.	1½ galls.	3 pints.	£5 5 0	No. P 1020D.	3 galls.	3 quarts. £9 9 0
No. P 1020C.	2 ..	2 quarts.	7 7 0	No. P 1020E.	4 ..	4 .. 11 11 0

## THE "ELITE" (Patent)

The inner chambers of the "Elite" Geyser are strongly made and will withstand any pressure up to 100 lbs. to the square inch. The force of the hot or cold shower, of course, depends upon the pressure of the cold supply.

The "Elite" Geyser is fitted with automatic valve which shuts the gas down to a pilot as soon as the water is turned off, and the price includes patented safety gas tap with pilot for lighting, and high pressure water tap with unions all ready for fixing. The water chambers of the "Elite" Geyser are made of copper throughout; the outside of the Geyser of copper bright polished and lacquered; the valve, gas tap and fittings are of brass, heavily made and bright polished. The "Elite" Geyser will be found a rapid and economical bath heater, and will, in addition, provide hot or cold shower, the temperature of which can be regulated at will. The "Elite" Geyser is not, however, constructed to supply actually boiling water or water for drinking purposes.

	Heats per min.	
No. P 6562A.	2½ galls.	£6 6 0
No. P 6562B.	4 ..	11 11 0

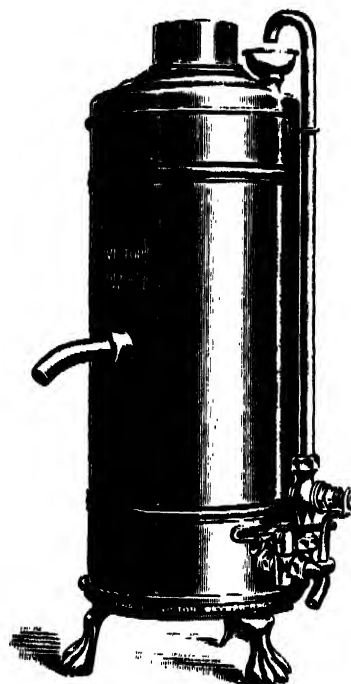

## THE "VICTOR" (Patent Registered)

This Geyser is constructed (with the exception of the burner) of stout hardened copper throughout; the water chambers are sealed from contact with the gas fumes and carefully coated with pure tin, therefore the water is not contaminated in any way in passing through the Geyser, but issues from the spout as fresh and pure as it enters. It will supply actually boiling water, fit for drinking or cooking purposes, as well as simply hot water for bath use.

The "Victor" is strongly recommended to purchasers desiring a really good Geyser at a moderate price, especially on occasions where first cost has to be considered. It is supplied with interlocking taps (as illustration), gas taps only, or automatic gas controlling valve.

	Heats per min.	Boils per min.	
No. P 6563A. With Gas Tap only, ... ..	2½ galls.	2 quarts.	£2 17 6
No. P 6563B. " " " " " " " "	4 ..	4 ..	6 7 6

No. P 6564B. " " " " " " " "	4 ..	4 ..	6 17 6
No. P 6565A. With Automatic Valve, " " " " " " " "	2½ ..	2 ..	4 7 6
No. P 6565B. " " " " " " " "	4 ..	4 ..	7 19 6

\* The temperature of the water flowing at the above rates per minute is raised 40 degrees Fahrenheit above that of the cold supply. The temperature may be increased or diminished according to the size of the stream.

# GEYSERS

"SEALED SYSTEM," Patented and Registered.

Hot Water Under Pressure.

## No. P 6543. THE "SUPREME" GEYSER

The "Supreme" Geyser has been specially designed to meet the demand for a durable and well-made water-heater, at a low price. It is automatic in action, the burners lighting from a single pilot light when water is being drawn from any tap to which it is connected. The "Supreme" Geyser will supply hot water to bath, lavatory and kitchen sinks or other taps as may be required. Where a kitchen boiler has been previously used, the "Supreme" may be easily connected to the existing hot water supply pipes at small cost. The hot water is delivered under the same pressure as that of the cold water service. The "Supreme" may therefore be fixed in any position where the flow pipe is most easily connected to the draw-off taps.

Tested to stand a pressure of 150 lbs. The outer case of copper panelled, polished and lacquered, while all working parts are made of hardened copper, the "Supreme" may be fitted in any house with the knowledge that a thoroughly satisfactory water heating system has been installed. Hot water is produced at the rate of  $2\frac{1}{2}$  to 3 gallons per minute. Made in one size only.

Price, .. .. £9 9 0

## No. P 6544. THE "BRILLIANT" LAVATORY GEYSER (Patent)

The "Brilliant" is specially designed for supplying hot water quickly to lavatory basins, &c. It produces about one gallon of hot water per minute. Made of stout hardened copper, complete with fittings and wall brackets as illustrated; the outside polished and lacquered.

Without Shampoo, £1 11 6; with Shampoo, Fixed or Flexible, £2 2 0

## No. P 6545. THE "RADION" CIRCULATOR (Patent Registered)

For Heating Water for Domestic Purposes, &c.

The "Radion" Circulator can be attached to the hot water pipes at present fixed in any house or flat. It heats the whole of the hot water system, so that by its use hot water may be obtained at any hot water tap in any part of the house or flat. Early in the morning or late at night a match put to the "Radion" Circulator ensures a prompt and plentiful supply of hot water. The installation (which means just connecting up to the present hot water pipes) therefore causes little trouble or disturbance and the expense incurred is usually small.

The "Radion" Circulator is placed in a convenient position (usually fixed on a bracket against the kitchen wall, as shown on the illustration) and connected to the present flow and return pipes.

By this small expenditure one obtains the great convenience - even luxury of an ample supply of hot water at any part of the house connected with the hot water system at any time. The cost of the gas consumed is more than saved in the reduction of the coal bill. The time and trouble in setting and lighting the kitchen fire and the inconvenience (and expense) of keeping the kitchen range alight throughout the long summer days are saved.

In fact, in the warm weather, with the "Radion" Circulator to heat the water and a gas cooker, the kitchen range never need be lit.

The "Ewart" Heat Regulating Valve **automatically** controls the gas supply. The heat of the water by means of the valve raising or lowering the gas flame, thus the hot water is always kept at the pre-arranged desired temperature, and only the minimum amount of gas necessary to produce this effect is consumed.

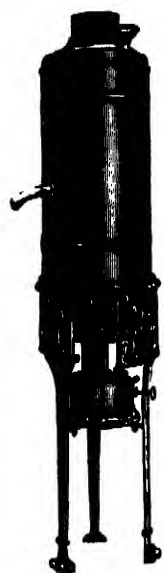

No. P 6545 A A.	* Heats 45 gallons per hour,	.. ..	£3 3 0
No. P 6545 B B.	" 100 " "	.. ..	7 7 0
No. P 6545 A.	With Automatic Heat Valve,	.. ..	4 15 0
No. P 6545 B.	" " " "	.. ..	9 9 0

\* The temperature is raised 40 degrees Fahrenheit.

# Geysers and Accessories

## The "Victor" Oil Geyser

The "Victor" Oil Geyser is made throughout of stout hardened copper, the inside parts are coated with pure tin, the outside bright polished and lacquered. This Geyser is constructed on the "Sealed" system, so that the fumes from the burnt oil do not come in contact with the water. The water issues from the spout as fresh and pure as when it entered the Geyser, therefore it may safely be used for drinking or other purpose, as well as for the bath.

The illustration shows the "Victor" Oil Geyser complete, with wickless Lamp Stove (which burns ordinary paraffin), and also the cast-iron stand.

 Prices, .. **27/-** **30/-** each.  
 Nickel Plated, **6/-** **7/6** extra.

18-in. projection from wall to centre of shower.

# Portable Tip-Up Bath

FOR COTTAGE PROPERTY.

This Bath has been specially designed for modern small house property, flats, workmen's and model dwellings, and all situations where space is limited. The material and workmanship are of the highest standard, and the design is neat. A special feature of the Bath is the round shape, base, sides and rolled edge all being made of one piece. The advantages of this are that less water is required, as there are no useless corners to be filled, whilst the absence of longitudinal seams renders the Bath comfortable to the user and easy to clean. A further advantage due to the rounded form is the prevention of splashing over; there is consequently no need to make the Bath of the same height as the usual old-fashioned Baths with straight sides, and the weight and floor space required for it when tipped up are therefore reduced to the minimum. A Waste Valve of ample size is provided to rapidly drain off the water. Three feet of Flexible Armoured Tubing is supplied with each Tip-up Bath to connect to the nearest Waste Pipe.

The illustration clearly shows the simple and substantial construction of this Bath. For fixing, all that is required is four coach screws to fasten down the floor plate.

MADE OF IRON, GALVANIZED AFTER MAKE.

No. P 6532.	Length, 5 ft. 3 ins.;	width, 2 ft. 2 ins.;	depth, 1 ft. 3 ins.;	..	..	..	..	..	Price, £3 4 6
„ P 6533.	„ 5 „ 7 „	„ 2 „ 2 „	„ 1 „ 3 „	..	..	..	..	..	„ 3 9 0

## Portable Bath

This Bath is of the same construction and finish as the Tip-up Bath but without the tip-up arrangement. When not in use it can be stood on end in any convenient corner, without taking up much room; is therefore especially valuable in houses or flats without bath-rooms. If desired, these Baths can also be supplied with iron or rubber-tyred castors.

No. P 6534.	Extreme length, 5 ft. 3 ins.;	width, 2 ft. 2 ins.;	depth, 1 ft. 3 ins.;	weight about 31 lbs.,	..	Price, 30/- each.

# Porceliron Sanitary Ware

The Porceliron Lavatories, Sinks, &c., illustrated on this and the following pages are constructed of refined iron, well finished and finely enamelled.

NOT AFFECTED BY CLIMATIC CHANGES.

ABSOLUTE PURITY OF THE ENAMEL IS GUARANTEED.

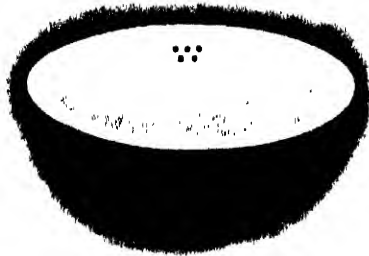

Its superiority, strength, and durability warrants the slight initial extra outlay in cost, as compared with the ordinary form of enamelled goods.

A list of **Porceliron Lavatory Ranges** suitable for Factories, Sports Clubs, etc., sent upon application.

No. P 2656.

# VENTILATORS

No. P 6546. **"EMPRESS" VENTILATOR.** "ARCHIMEDEAN" PATTERN.

This Ventilator differs from the ordinary so-called "Archimedeian" Ventilator in some important points. In the ordinary "Archimedeian" Ventilator the whole of the top revolves, in the "Empress" the cap is stationary and only the fans and screw revolve, thus throwing less weight upon the central point, thereby reducing the friction.

Again, the ordinary "Archimedeian" Ventilator is open to the base of the fans, rendering easy ingress to gusts of wind or driving rain to the discomfort of those within the building. To obviate this serious defect the "Empress" is constructed with an interior cone placed at such an angle, with a flat top plate, so that the wind striking the cone is deflected and escapes at the other side of the fans instead of blowing down the tube.

## Ventilating Wall Tubes and Brackets

Improved Air Inlet Wall Tubes, for the introduction of fresh air into a building without creating draughts, whilst entirely excluding dust. Constructed in a most substantial manner from best galvanized steel, painted one coat. Fitted with regulating valve, with brass handle indicating when open or closed. Brass wire gauze air filter and deflecting shield.

# The "Paragon" Diaphragm Pump

SUITABLE FOR CONTRACTORS AND GENERAL PURPOSES.

In this Pump a rubber diaphragm takes the place of a plunger or bucket in an ordinary pump, which renders it particularly suitable for raising muddy water, sewage, or water containing sand, small stones, chips, or other foreign matter.

Where a Pump is only in occasional use for water, an All-Brass Pump is recommended.

The Suction Pipe of Semi-Rotary Pumps should in all cases be fitted with a Foot Valve and Strainer.

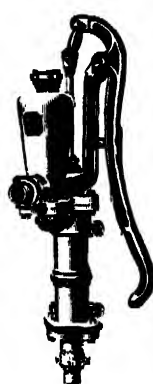

# "Paragon" Colonial Suction and Force Pumps

WITH LUGS FOR BOLTING TO WALL OR PLANK, AND ALSO MOUNTED UPON PLANK.

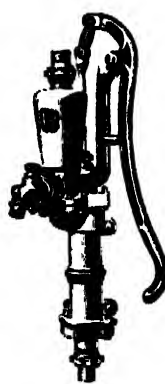

No. P 5441.

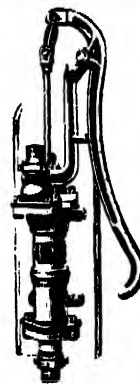

No. P 5443.

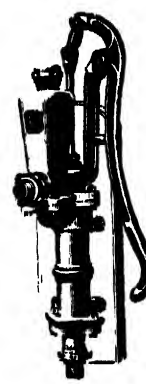

No. P 5445.

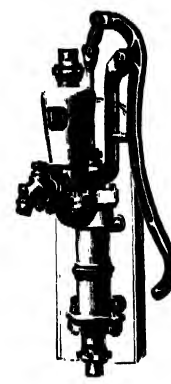

No. P 5442.

No. P 5444.

No. P 5446.

The above Pumps are suited for raising water from shallow wells or cisterns not exceeding 27 feet in depth, and forcing it up to elevated cisterns. Although of moderate cost they are simple and effective, and are thoroughly well fitted and finished. The Handle is reversible, and the Suction and Delivery Chambers are fitted with Brass Union Tails screwed for Iron Pipe. The Piston Rod and Stuffing Box are of Brass. Each Tail Piece is fitted with "Paragon" Brass Valve Seating.

The Brass Cylinder Pumps, Figs. P 5441A, P 5443A, P 5445A, P 5442A, P 5444A, P 5446A have a Solid Polished Brass Barrel, also a Brass Bucket and Valve.

The Brass Pumps, Figs. P 5441B, P 5443B, P 5445B, P 5442B, P 5444B, P 5446B, have all parts Brass except Handle Fulcrum, Top Chamber, Base, and Air Vessels.

By raising the Handle to its full height the Pump Barrel is emptied of water, and breakage by frost prevented.

All parts are made to gauge by special machinery, and are interchangeable, and can be renewed.

## SPECIFICATION.

- No. P 5441. "Paragon" IRON Colonial Suction and Force Pump, with Lugs for bolting upon wall or plank, having Brass Union Tail screwed for Iron Pipe upon Suction and Delivery Chambers.
- " P 5443. "Paragon" IRON Colonial Suction and Force Pump, with Lugs for bolting upon wall or plank, having an Air Chamber upon the Delivery fitted with Top and Side Outlets. One Outlet is fitted with a Brass Union Tail, and one with a Blank cap. These are interchangeable. The Suction is also fitted with a Brass Union Tail.
- " P 5445. "Paragon" IRON Colonial Suction and Force Pump, with Lugs for bolting upon wall or plank, having an Air Chamber upon the Delivery fitted with Top Outlet, and an Iron Draw-off Cock with Brass Plug at side, the nozzle of Cock is screwed for Hose Coupling, both Suction Inlet and Delivery Outlet are fitted with Brass Union Tail screwed for Iron Pipe.
- " P 5442. Is exactly as No. P 5441, but is mounted upon strong wood plank.
- " P 5444. Is exactly as No. P 5443, but is mounted upon strong wood plank.
- " P 5446. Is exactly as No. P 5445, but is mounted upon strong wood plank.

# The "Hercules" Lift and Force Pump

THE PUMP IS A HYDRAULIC PUMP, NOT AN AIR PUMP.

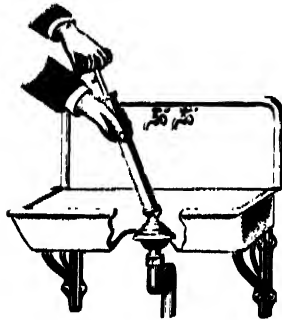

AN IMPROVEMENT ON THE "LITTLE GIANT."

Makes its own connections, does all its work by itself.

EASY TO OPERATE.

With Unique Attachments to fit any ordinary plumbing fixture.

The Pump is made of heavy polished brass with attachments of pure rubber. For its purpose, no pump made to sell at five times its cost can equal it.

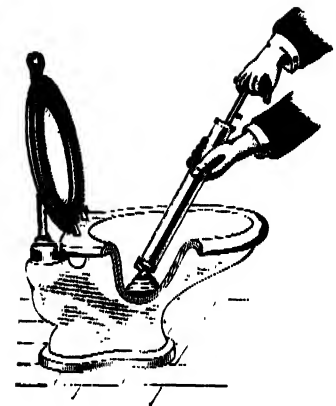

NO SKILL REQUIRED.

Just place Pump over opening of pipe and work piston up and down, and pipe is quickly freed of obstruction. No bucket, hose, or any other tool required.

WILL LAST A LIFETIME.

The "HERCULES" is able to do the work of pumps that cost five times as much, because of its Patent Lift and Force Cup, and an exclusive feature that makes it the only pump having lift and force without a valve. A special feature of this Pump is that it will rapidly withdraw an obstruction if desired.

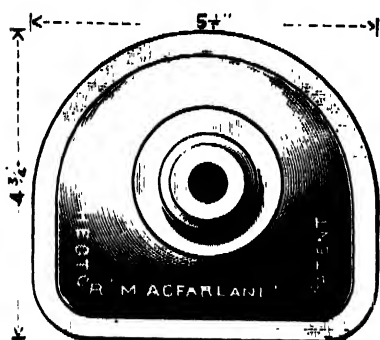

It is both a Lift and a Force Pump, and the only known invention of a pump that both lifts and forces without a valve. The Patent Lift and Force Cup does the work, giving pump a reciprocating force, and with little effort does the work better than any other device known.

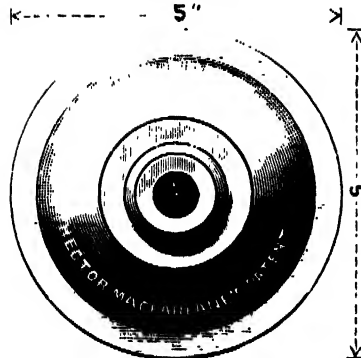

ADJUSTABLE WASHER.

There is no ordinary plumbing fixture to which this Pump is not adapted. Suitable for Lavatory Basins of all sizes.

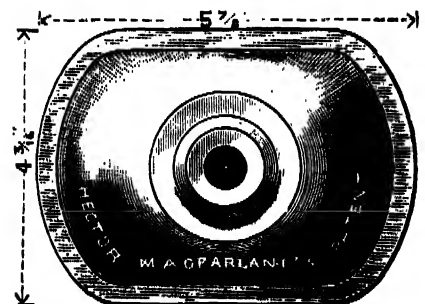

HORSE SHOE

ROUND

OVAL

The Pumps are supplied complete with either of the above pattern cups at 20/- each complete, with Adjustable Washer.

Please state clearly which shape of cone is desired when ordering.

**A UNIQUE FEATURE.**—The New Patented and Registered Oval and D or Horse Shoe Cups have been designed to provide a PERFECT connection for any shape of Closet, and no plumber's outfit is complete without same.

# Decorators' Paint, Color, Varnish and Enamel Section

BRUSHES, TOOLS, AND SUNDRIES  
PAPER, STUCCO & PLASTER ROOM DECORATIONS

"ARTDEC" PURE PAINT MIXING

**O**UR Machinery for Paint Grinding and Mixing is of the most compact and up-to-date description, replete with every modern mechanical device for the handling of colors of all kinds, driven by electric power, thus ensuring cleanliness in all sections

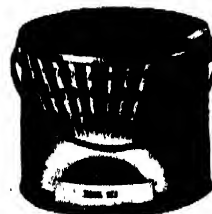

PUGGING AND MIXING

PULP AND STIFF PAINT GRINDING

Separate machines are reserved for dealing with our continually increasing business in "Alpine White" enamels and "Artdec" pure paints, every batch of which is thoroughly tested before storing.

We can deal expeditiously with any quantity of special shades to meet customers' requirements, ground in either Oil, Turps, Gold Size, Varnish, or Water.

**NET PRICES.****VARNISHES****NET PRICES.**

FOR  
 DECORATORS, . . . .  
 PAINTERS, . . . .  
 PAPERHANGERS, &c. .

FOR  
 ENGINEERS, . . . .  
 YACHT AND COACH . .  
 BUILDERS, &c. . . .

The Varnishes enumerated in this list can be thoroughly relied upon to fulfil the purposes for which they are specially manufactured as described to each line. They are well matured, packed in new cans, hermetically sealed, and stored in an equable temperature to prevent the possibility of chilling.

In using Varnishes, whether of the cheaper or finer qualities, it is well to note that in order to obtain the best results, great care must be exercised to remove, before applying the varnish, every particle of solution used in cleaning the work to be treated. Varnish should be poured into a clean utensil some while before using. After the required quantity is taken out the can must again be tightly corked.

PRICES PER GALLON (subject to the variations of the market).

B 1985. "Albion" White Copal, palest Varnish made, . . . . . **18/-**  
 B 161. Superfine Copal Carriage Varnish, is recommended for both interior and exterior work, specially suitable for shop fronts, . . **16 -**  
 B 191. Pale Elastic Copal Carriage Varnish, a shade darker than above, a good useful Varnish, . . . . . **14 -**  
 B 154. Supertine Copal Varnish. This is particularly recommended where only one class of varnish can be used. It dries and wears equally well inside and outside, . . . . **10 6**  
 B 153. Pale Elastic Oak, a thoroughly reliable Varnish for outside work. We have supplied this Varnish to our clients for over 25 years with continuous satisfaction to all users, **8.6**  
 B 125. Pale Inside Oak, a pure Gum Varnish for inside work. The same remarks apply to this as an inside Varnish as to B 153 as one for outside use, . . . . . **7/6**

B 705. Front Door Copal, a high-grade Varnish for outside work, dries with a splendid face, guaranteed to wear well, weather resisting, **14/-**  
 B 170. Special Pale Copal Oak, for jobbing work inside or out, dries well with a good gloss and takes the place of a more expensive Varnish when price is in question, . . **8/6**  
 B 329. Finest Hard Drying White Copal, for inside decorations and wall papers; pale, hard drying, and non-blooming, made from the finest materials, . . . . . **12/-**

 B 156. Fine Crystal Paper, suitable for colored papers, . . . . . **8/6**  
 B 190. Best Pale Copal, will stand any amount of wear and is particularly adapted for shop and bar fittings, . . . . . **12.6**

NOTE. -Special Varnishes not on our Lists will be quoted for on application.

All above prices are for 1-gallon free cans.  $\frac{1}{2}$  galls., 6d.;  $\frac{1}{4}$  galls., 9d.; and pint cans, 1/- per gallon extra.

**NET PRICES.**

B 347. Extra Pale Gold Size, highly recommended for binding qualities, and for preparing the lightest shades of paint, ..	8/6
E 159. Best Japan Gold Size, a better drier than the above, and where color is of no great moment should have the preference in use,	7/6
B 1747. Writers' or Gilders' Gold Size, for sign writing, &c., .. .. .	9/-
B 2463. Durable Oak Varnish, a pure gum varnish for either inside or outside use, its lasting qualities are exceptional. Best value in the trade, .. .. .	7/6

B318. Hard Church Oak, second grade,	..	76
B1836. Cottage Oak (square cans, free),	.	59
B810. Extra Pale Floor Varnish,	.	10-
B2073. Engine Copal Varnish.	..	16/-

**B 192. Black Varnish.** This Varnish is found invaluable for many estate purposes, being more economical and at least as durable as ordinary paint. Its superiority to tar is shown by its facility in application, no preparation or heating being required, whilst it has the advantage of drying with a nice gloss and hard surface, not being softened by the heat of the sun. The Varnish possesses a good body and covering power. One coat is generally found sufficient to produce a good result.

„ B 179.	Methylated Finish, ..	„			
„ B 167.	Best Brown Hard Varnish,	6/- „			

**WOOD STAINS**

No. B 809.	Dry Stains, soluble in boiling water; colors, Oak, Walnut, Mahogany, Rosewood, Satinwood or Ebony, in 1-lb. tins,	4/- per lb., or .. .. .	6d. per oz.
No. B 183.	Water Stains in above shades and Green, put up in 6d. and 1/- bottles, or ¼, ½ and 1 gallon bottles, ..	5/- per gallon.	
No. B 184.	Spirit Varnish Stains, in above shades and Green, put up in 6d. and 1/- bottles, or ¼, ½ and 1 gallon bottles, ..	7/- „	
No. B 185.	Oil Varnish Stains, in above shades, put up in 6d. and 1/- bottles, or ¼, ½ and 1 gallon bottles, ..	8/6 „	

We strongly recommend **Oil Varnish Stains** for general purposes in preference to **Spirit Varnish Stains** generally offered for sale. They are not so liable to crack, and are much easier to apply to large surfaces, such as floors. The chief objection to Spirit Stains is that they set so quickly, that in covering large surfaces dark ridges are observable where the edges of the work are joined. Spirit Stains are, however, very useful for patching worn parts of floors, &c., as they may safely be walked over in two or three hours. Unless otherwise specified in the order, OIL VARNISH STAIN is supplied.

**We Stock HARLAND'S VARNISHES as follows:—**

No. B 2056.	Extra Pale French Oil Varnish, .. ..	24/- per gallon.	No. B 2064.	Church Seat Oak Varnish,	12/- per gallon.
„ B 2057.	Pale Copal Varnish, ..	16/- „	„ B 2075.	Pale Oil Paper Varnish, ..	12/- „
„ B 2061.	Pale Oak Varnish, for outside,	12/- „	„ B 2076.	Hard Crystal Paper Varnish,	10/- „
„ B 2062.	„ „ „ inside,	10/- „	„ B 2065.	Pale Signboard Varnish, ..	16/- „
			„ B 2058.	Decorators' Carriage Varnish,	16/- „

The above prices are in 1-gallon free cans; extra charged if in smaller packages.

**"ARTDEC" ELASTIC FINISH ENAMEL**

FOR USE IN HOSPITALS, MOTORS, CARRIAGES, STEAMSHIPS, YACHTS, &amp;C.

A special finishing enamel paint. Can be used over any surface that has been properly prepared, although we recommend its use over work prepared with our Undercoating. Easy flowing, drying with an enamel face, is permanent and sanitary. Can be used for outside work in exposed positions, and is of great covering power. Unequalled for all classes of decorative work. One gallon will cover approximately 100 square yards.

	1 Gallon.	1/2 Gallon.	1/4 Gallon.	Pints.
In 24 shades, Prices, .. .. .	18 -	18 6	19/-	20/- per gallon, in free tins.
Or in 1/6 tins.				

**"ARTDEC" BATH ENAMEL or ACID PROOF GLOSS FINISH**

Manufactured in 11 shades, suitable for either baths, refrigerators, and wherever soda solutions or chemicals are in use.

	1 Gallon.	1/2 Gallon.	1/4 Gallon.
Prices, .. .. .	18 6	19 -	20 - per gallon, in free tins.
Or in 1/- and 1 6 tins, sufficient for small and large baths.			

**HOUSEHOLD ENAMELS**

In artistic shades. Packed in 6d. and 1/- tins.

**"ARTDEC" ENAMEL UNDERCOATING**

A scientific preparation to be used as a filler or undercoating for all enamels, dries quickly and sets very hard, cuts down with a beautiful flat surface, so that the finishing coats of enamel hold up perfectly.

Prepared in paste form and packed in 7 lb. and 14 lb. free tins. Price, .. .. 48/- per cwt.

*Shade Cards of our Enamels supplied on application.*

# Prepared Paint

**NET PRICES.**

## "ARTDEC" PURE READY MIXED PAINT

This Paint, manufactured by us to a specific formula, contains nothing but the purest ingredients: Pure lead, pure American turpentine and genuine refined linseed oil, and a special liquid drier in sufficient quantity to ensure good drying without detriment to the life of the paint.

Each package bears our guarantee of its purity, and the tins, both 7 and 14 lbs., have handles so that they can be used as paint kettles.

"ARTDEC" is put up in 30 shades, and these may be mixed in any proportion to produce other tints, or may be reduced with white.

A handsome hanging Shade Card will be supplied upon application.

Prices, .. 7-lb. tins, **38/-**; 14-lb. tins, **36/-**; or 1 cwt. drums, **34/6** per cwt.

The drums are charged and are returnable; the tins are free.

*N.B. "ARTDEC" is subject to market fluctuations.*

## Water Paints

### "ARTDEC" WASHABLE DISTEMPER

In paste form, packed in kegs and tins. This is a thoroughly reliable distemper, sanitary and washable, lime resisting and sets hard in a few hours, and can be freely washed three or four weeks after application.

"Artdec" Washable Distemper may be painted or papered over at any time without preparation.

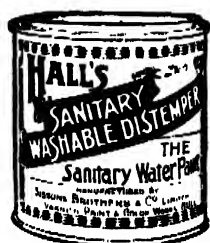

"Artdec" Washable Distemper for outside work should be used with special thinners, the use of which does not increase the cost, as it covers better if treated in this way instead of water.

Prices in charged packages, .. 1 cwt., **26/-**;  $\frac{1}{2}$  cwt., **26/-**; or 28-lb. kegs, **26/-** per cwt.

Prices in free tins, .. 14 lb., **28/-**; 7 lb., **29/-** per cwt.

Tints on application.

### HALL'S SANITARY WASHABLE DISTEMPER

Packed in kegs and tins.

Prices and shades on application.

### "MURALINE"

A powder which when mixed with an equal quantity of water produces a sanitary washable distemper.

**NET PRICES.****Decorators' Tube Colors****NET PRICES.**

Ground in refined linseed oil and packed in collapsible tubes, they have the advantage of being always perfectly clean and ready for use, whilst the required quantity being taken out the remainder is preserved from skinning and hardening.

For purity and permanence of color, fineness of grinding, and strength of staining power, these colors are unrivalled, and far and away excel ordinary painters' colors. The tubes hold a uniform quantity, but vary in weight according to the color.

**No. B2455. Graphite Paint****FOR STEEL AND IRON CONSTRUCTIVE WORK.**

Comparison of cost and surface spreading power on smooth iron-work free from rust:—One gallon of pure (natural color) graphite paint will cover 160 square yards, at a cost of  $\frac{1}{2}$ d. per square yard: weight per gallon, 12 to 13 lbs. One gallon of red or white lead paint will cover 80 square yards at a cost of  $\frac{1}{2}$ d. per square yard: weight per gallon, 24 to 30 lbs. One gallon of best quality oxide of iron paint will cover 100 square yards at a cost of  $\frac{1}{4}$ d. per square yard: weight per gallon, 18 to 20 lbs.

If the surface of the iron is pitted or corroded, about 25 per cent. must be deducted from the above figures.

Pure Graphite (natural color) and black, grey, bronze green, dark brown, dark red, .. 7/6 per gallon.

(Pure graphite and black are acid, alkali, and heat resisting.)

Large quantities are subject to special discounts.

Sold in drums containing one gallon and upwards; casks containing 40 gallons (casks free).

**No. B1105. Superior Preserved Paste**

For the use of bookbinders, newspaper publishers, paperhangers, manufacturers of paper bags, trunks, &c., and for general labelling purposes. It will keep good in any climate.

We claim that it is a decided improvement upon the common manufactured article, being fine, smooth and uniform in quality, and, as it is well preserved, all waste from souring or fermenting is avoided.

The Paste is of heavy body and will bear largely reducing with hot or cold water, and being then quite ready for use a considerable saving in time and labour is effected.

Put up in .. 2 cwt. 1 cwt. 56 lb. 28 lb. casks free.	
Prices, .. 9/6 5/6 3/9 2/9 each.	

Those who study convenience and economy will find it well worth their while to give it a trial.

**No. B3681.****The Sanitary Disinfectant Paint Remover Paste**

Is invaluable for removing old hard paint (any thickness), enamel, varnish, and wall paper from wood, stone, or iron. It is a disinfectant, and where used effectually destroys all insects or disease germs, and will not injure the surface of the paint or varnish afterwards applied, and is pronounced by first-class firms to be the cheapest and most effectual in the market. It is much liked for taking paint from baths for repainting, and is invaluable as applied to old wood carvings and all fine-art work. Will thoroughly clean and renew marble, &c.

Packed in .. 2 4 7 14 lb. tins (tins free).	
Prices, .. 10 $\frac{1}{2}$ d. 1/8 2/6 4/- each.	

Sample tins, post free, 6d. each.

LIQUID PAINT REMOVER,  $\frac{1}{2}$  gall., 4/9; 1 gall., 8/6 (tins free).

# Preparations for Damp Walls

## No. B2391. Damp Wall Sanitary Enamel

For Decorative Purposes.

This material is specially recommended to resist effectually the damp in new plaster work, thus admitting of prompt papering of walls without risk of injury to the papers, the Transparent Enamel being specially recommended for this purpose.

It has three times the covering power of ordinary paint, no sizing required, absolutely non-porous, dries quickly, leaving a surface resembling porcelain.

The Transparent is also specially useful where a colored preparation is not desirable.

Adaptable for all work, whether brick, stone, cement, or plaster, and particularly valuable for new work.

One gallon will cover about 100 square yards.

**STOCK SHADES.** White, Transparent, Light Stone, Dark Stone, Red, Blue, Green. Other shades made to order.

Price, .. 8/- per gallon, in free cans.

Small quantities extra.

A free sample slab illustrating its use sent upon application.

## No. B404. Damp Proof Spirit Varnish

This should be used as a substitute for damp solution on inside walls before papering or painting, when immediate completion of the work is required. The Varnish is applied in the usual manner, and dries hard within one hour. It must in all cases be applied to the bare walls, and all paint or paper must be removed before it is used. One coat is sufficient.

Price, 8/6 per gallon, in charged packages.

Apply with a flat varnish brush.

Brushes for above—2 ins., 1/6; 3 ins., 2/6

## No. B169. Solution for Damp Walls

For Preserving Stone and Brickwork, Priming Walls, and excluding Damp from Interior Walls of Houses.

This Solution soaks into the wall, and effectually fills up all pores through which damp can penetrate, leaving a good surface on which either paint or paper can be safely applied. It can easily be used, both internally and externally, with but little discoloration of the wall, and this soon disappears. It is also an excellent preservative for stone or brickwork. In cases of ground damp, caused by bad foundation to the walls, application of the Solution is sure to prove beneficial, even if it does not effect a permanent cure. Walls of unpainted brick, stone, or compo, affected by damp, should receive a coat of Solution in preference to ordinary priming. It has the same effect in preventing absorption in the succeeding coat of paint.

### DIRECTIONS FOR USE.

The Solution to be applied in dry weather, with an ordinary paint brush, and to be well rubbed into the work. Two coats are necessary, the second coat to be applied when the first is hard. An interval of twenty-four hours is usually sufficient.

One gallon covers about 20 square yards.

Price, .. .. 7/6 per gallon.

Packages charged and returnable.

Wire Brushes for cleaning outside walls, 4/- each.

Surface Brushes for applying Solution, 4/6 and 3/- each.

**SZERELMEY STONE LIQUID and PRODUCTS** Stocked. *Prices and full particulars on application.*

**LAMINATED LEAD** for damp walls, sheets 36 x 22 ins., 6d. per sheet, or 4/6 per box containing 10 sheets.

**LEAD FOIL** for damp walls, in boxes containing 36 sheets, 22 x 18 ins., 3/6 per box.

## Waterproof Paper.

**PITCH PAPER**, in 12-yard rolls, 22 ins. wide, 4d.; in quantities of not less than 60 pieces, 2½d. per piece.

**OIL WATERPROOF**, „ 12 „ „ 22 „ 9d.; „ „ „ 60 „ 8d. „

**BROWN PAPER**, „ 12 „ „ 22 „ 4d.; „ „ „ 60 „ 3½d. „

**WATERPROOF PAPER**, Canvas Backed, 54 ins. wide, 3d. per yard; 10/6 per 50-yard roll.

**FILLING VARNISH**

FOR POROUS PLASTER WALLS AND CEILINGS. DRIES IN TEN MINUTES.

Prevents the unequal absorption of the paint on plaster, or on walls which have been stopped. It assists to prevent damp or stains showing through the work on ceilings. Old work which has been clear-coled or sized, should invariably receive a coat of Filling Varnish, or the surface may dry out unevenly. One gallon covers from 60 to 100 square yards.

Price, 4/- per gallon. 1/6 per quart (can included).

**"VITROLITE"**

Supersedes White Lead Paint for the protection of conservatories, greenhouses and all horticultural buildings, and also for all kinds of decorative work.

Made in 2 shades, White and Light Stone. Price, 8/6 per gallon.

Prices of Packages: 1/2 gall., 1/6; 1 gall., 2/-; 2 galls., 2/6; 3 galls. and upwards, 1/- per gall. (returnable).

Also sold in non-returnable cans containing 1 quart, 2/6; 1/2 gall., 4/9; 1 gall., 9/- each. Also in 6d. and 1/- tins (tins free).

**"PLASTINE" The Imperishable Putty**

Specially manufactured to withstand exposure to heat, cold and moisture on horticultural buildings, glass roofs of every description, wooden or iron sashbars. It will not harden, flake, shrink, decay or absorb moisture.

Price, .. .. 16/- per cwt.

Prices of Packages: 1/2 cwt., 1/6; 1/4 cwt., 2/6; 1 cwt., 4/6 (returnable).

Also sold in non-returnable tins containing 7 lbs. net, 1/3; 14 lbs. net, 2/6 each.

**"COVERINE"**

One coat undercoating, for use with enamels as a means for securing a perfect surface on which to apply them.

Price, .. .. 48/- per cwt. in 7 and 14 lb. free tins.

**PAINTERS' SOAPS****"THREE POPLARS" BRAND**

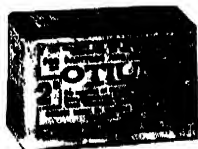

An extra strong sugar soap for painters and decorators.

Price, 3 1/2d. per packet or 24 6 per cwt.

**"OTIUM"**

For removing all dirt and grease from paint, enamel, and varnish work, plainwood wainscoting, stairways, &c. Price, 2d. per packet.

1 9 per doz. packets.

**No. B3681 A. "JELLOSO"**

A Jelly Soap for Washing down and Cleansing Enamel, Varnish, Paintwork, &c.

"Jelloso" will not injure the surface of the most delicate enamel or varnish. For all wall tiling, leaded glass and enamel work it imparts a brilliance which cannot be obtained by the use of ordinary soap and water.

Price, in 6d., 1/- and 2/6 tins.

Or in 28-lb., 56-lb. and 1-cwt. kegs.

Price, per cwt., on application.

# **“Lightning” Lime and Color Washer**

**Each Machine is an efficient Fire Engine. Always on hand.**

No. 6. A handy and compact Machine, supplied with 6-gallon removable pail, fitted with 5-ft. pole and single spraying nozzle, and 10 feet of special armored hose. The platform folds up against Machine. Gauge, **7/6** extra, if required.

Price, .. .. **£6 15 0**

No. 6A. Specially designed to meet the demand for a cheap and efficient Machine. Fitted with strong wooden base and a detachable tank of 5 gallons capacity. It can easily be lifted about complete by the tank handle. 8-ft. armored delivery hose, single spraying nozzle, and 5-ft. pole, as illustrated.

Price, .. .. **£5 5 0**

No. 7. Small pattern, to be used with an ordinary pail. Farmers and others will find this a useful and strong Machine at a very low price.

Price, .. .. **£3 15 0**

## **IMPROVED LIMEWASH**

Much superior to ordinary Limewash slaked with water. Quickly mixed. Leaves a good surface.

There has been a growing demand of late years for distemper, or cold-water paints as they are termed, for use in works, factories, and other places. Owing to the expense of these, many are deterred from using the various makes on the market.

We have brought out a cheap form of limewash which can be used in our Lime and Color Washers, and which, while having the main advantages of the more expensive distempers, can be applied at less than half the cost.

The material is in the form of a powder ready for mixing with water, and is supplied in barrels containing 1 or 3 cwts.

Price, **13/8** per cwt., Carriage Paid (in England and Wales).

If in lots of 3 cwts. at a time, **12/8** per cwt. Supplied in Colors if desired, **3/-** per cwt. extra.

**DIRECTIONS FOR USE.** Mix in cold water to a stiff paste, using about one measure of cold water to three of the dry powder; then thin with cold water to suit the surface intended for, and it is ready for immediate use.

## **“YEMART” CEILING WHITE**

A ready prepared Whitewash. No trouble, no waste; thin down and it is ready for use.

Packed in Free Packages, Casks, 1½ cwts., .. .. **8/-** per cwt.

“ “ “ Lever Tins, 28 lbs., .. .. **9/6** “

“ “ “ “ 7 and 14 lbs., .. **10/6** “

**CELIN-KOTO and FILICOL** -Stocked and sold at Manufacturers' Prices.

# Patent Portable Oil Blast Furnace

WITH ADDITIONAL IMPROVEMENTS.

Patented in the United States, Canada, Belgium, France, Germany, the Colonies, and the British Isles.

These Furnaces, of which we show four drawings, are fitted with movable tops, so that by taking off cover on Pipe Bending Furnace (Fig. A), it is suitable for heating pipes for bending purposes, or for heating copper bits, plumbing irons, branding irons, &c.; and placing on loose top, it is immediately converted into machine for melting lead, tin, solder, zinc, and other metals (Fig. B).

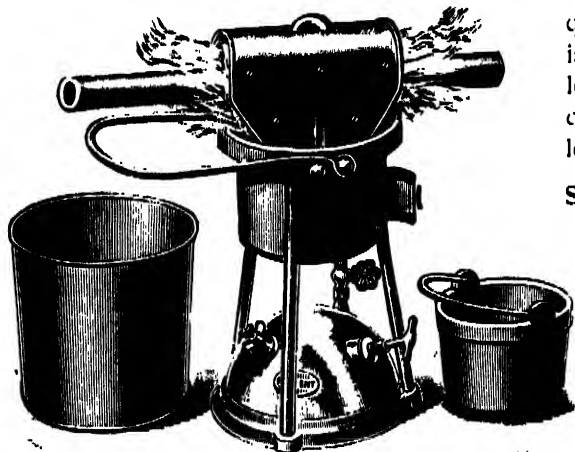

Fig. A No. B1469.

The SPECIAL ADVANTAGES are: It is portable, it can be carried to any place where heat is required, and at once got to work. Each machine is fitted with valve to regulate flame, so that a lower heat may be obtained, and metals or pipes can be kept at any desired temperature for any length of time.

Specially suitable for heating pipes for bending purposes and melting metals.

Always ready for use.

Perfectly safe and very powerful.

Requires little or no attention.

Fig. B. No. B1469.

Burns common paraffin oil, and will melt 1 cwt. of lead with only one burner.

## No. B3675. The "Caledonian" Paint Remover and Soldering Lamp

The simplest Lamp on the market.  
Price, .. .. 13/- each.  
Pure benzoline only to be used.

## The "London" Furnace

Burns Paraffin.

Specially constructed for Plumbers, Builders, Engineers, Hot Water Fitters, Lead Burners, Electricians, Water, Gas, Railway, Telephone and Electric Lighting Companies, Shipbuilders, Dockyards, Dentists, &c.

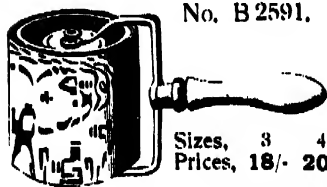

In the "London" Furnace we have combined many of the advantages introduced in our other furnaces, and have been able to make several further improvements. The Furnace is supported by three legs. The lamp itself is of brass. The burner of this lamp is of a new type, and equally as powerful as two ordinary burners. The lamp stove itself can be taken out for cleaning, repairs, &c.

Iron pipes up to 1½ ins. (inner diameter) can be heated for bending in the flame while the lead is being melted in the pot. In the same manner plumbers' soldering irons and copper bits can be introduced by the side doors as shown in the illustration.

CAPACITY.—Tank holds 3½ pints of paraffin. One filling will last 2½ hours. Pot holds 26 lbs. of plumbers' metal.

Every stove is perfect. Flame—atmospheric blue, without smoke or smell. No wick; burns paraffin or petroleum. Every stove is tested under very high pressure.

Price complete, with Melting Pot (without Soldering Irons), 49/6 each.  
.. of Fireclay Cover for Heating Pipes, .. .. 1/3 ..

## No. B2591. Bellamy's Graining Rollers

## No. B 037. ADJUSTABLE GILDING WHEELS

## Ribbon Gold Leaf and Adjustable Gilding Wheels.

For Railway and Tram Car Builders, Coach Builders, Ship Builders, Sign Writers, Bookbinders, Painters, Decorators, Picture Frame Makers, &c.

The finest 22-carat Gold Leaf is produced in the form of ribbon in lengths of 69 feet, in any width, and wound on bobbins, with a separating layer of transfer paper. By the use of this Gold Leaf 50 per cent. is saved in material and 90 per cent. in time and wages.

Suitable for flat or curved surfaces.

Complete Sets, with Brushes for Mouldings, . . . 5/6 each.

## No. B 038. Ribbon Gold Leaf, on Reels.

$\frac{1}{8}$	$\frac{3}{16}$	$\frac{1}{4}$	$\frac{5}{16}$	$\frac{3}{8}$	$\frac{7}{16}$	$\frac{1}{2}$	$\frac{5}{8}$	$\frac{3}{4}$	$\frac{7}{8}$	$1\frac{1}{8}$	inches wide.
25	16	12	10	8	7	6	5	4	3	3	reels per box.

May be put in Varnish, Turpentine, Water, &c., without hurt.

	Nos.,	4	6	8	10	12
Prices, . . .		7/9	13/6	23/6	46/6	75/9

## No. B 0964. SPECIAL "O.K."

"O. K." Brush after some use. Note the unique working shape.

Front View of same. First Bristle removed. Plate coming out with string.

Handle and Plates, showing ease of removal.

Brush with "O.K." Bridle, unused.

Gives an extra  $\frac{3}{4}$  in. of Bristle.

"O. K." Handle and Centre plates. Both Plates are slid out as wear renders necessary.

Not an "O. K." Handle. Note the wasteful blade. Some blades are longer.

	Sizes, ..	2/0	3/0	4/0	6/0	8/0
Prices, Pure Bristle, ..		58/-	69/-	80/-	88/-	96/- per dozen.

## The Removal of the Bridles is simplicity itself.

You wish to remove the top one first, naturally, as the brush wears. The illustration shows how the plate slides out when you have unwrapped the string bridle. **You just cut the string** and the plate slips out: no appliances for removal, no complications. You can draw out the plate on the end of the unwound string, if you care to cut the lowest lap. Could anything be quicker or simpler?

**The bottom plate comes out**, when you need it out, in just the same way. Think what this means—**three-quarters of an inch more available bristle**. However far brushes **without** the "O.K." can be worn, brushes **with** the "O.K." wear for at least another half inch.

The removable "O.K." bottom plate and the blade of the "O.K." handle are no deeper than the immovable blade of the ordinary brush.

## No. B 0965. 4/0 PURE BRISTLE BRUSH

As above, but with Fish-tail Handle.

Prices—No. B 0965, Unbridled, 57/- per dozen; No. B 0965A, Bridled, 62/- per dozen.

## No. B 2590. PATENT OAK GRAIN FINISHERS

Price, . . . . . 3/9 each.

For finishing the lines made by the Oak Combing Roller, so as to carry them close to the edge of a panel. The tool consists of a small brass pinion with ribs of irregular lengths and a rubber roller in contact with it, both turning on pins attached to the handle. Color is spread on the rubber roller and the brass pinion rolled across the end of the panel on which it prints the grain.

made and despatched on short notice.

of Truss and not the cap which projects over face and sides.  
quote number, do not cut out the designs.

## Window Decoration

At an inexpensive price, especially where it is desirable to obscure unsightly exteriors, such as back premises of an inornate character. It is a thin transparent substance, insoluble in water, and is easily affixed (not transferred) to the glass. It is supplied in sheets of varying size, and is so arranged that a continuous pattern can be affixed on glass of any dimensions. It can be used on any size, shape or style of window, fanlight or panel.

We will forward a Book of Designs with prices upon receipt of enquiry. A charge of 2/- is made when sending the Catalogue, but the amount is credited upon its return here in good condition, post paid.

"Yeardec" Window Transparencies, similar to above but of slightly cheaper cost, full particulars on application.

# The Patent Safety Extension Ladder

Invaluable to Builders, Painters, Sign Writers, Decorators, Window Cleaners, Gardeners, Hotel Proprietors and others, being simple, strong, safe and light.

THE SIMPLEST AND MOST RELIABLE EXTENSION LADDER MANUFACTURED.

This Ladder, owing to its special construction, is the simplest and most reliable extension ladder on the market. There are no complicated catches, springs, screws or hinges to work loose, and no mechanism to get out of order. The working of it is simplicity itself. There is no fixing or arranging in position; immediately the Ladder is raised to the required height (which can easily be done by ONE man with any ladder up to 56 rungs), a simple automatic retaining hook is set free and must necessarily fall into its proper position, firmly securing the Ladder. The best Archangel joinery deals and seasoned English oak rungs are used in the manufacture. The retaining hooks are made of the best malleable iron. Each Ladder is made in two detachable lengths. If a short ladder only is required the bottom length is used, when a longer one is needed the bottom ladder is first raised, the extension piece is then placed on the top and pulled up with the cord. The extension piece will slide easily up a wall or tree, or the Ladder may be held perpendicularly and raised without support, and adjusted to the desired height. All Ladders are sized and varnished before delivery so that the quality of the materials can be seen.

Ladders F to N have rope and pulley attachment as illustration. When extreme lightness is required, we supply a specially light make at the same price. Carriage paid to any station in the United Kingdom.

NOTE. The top section of Ladder K and all three sections of Ladders M and N have a steel cable inserted in the back. This adds greatly to the rigidity of the Ladder; for this no extra charge is made.

# The Patent Safety Extension Step Ladder

A LONG-FELT WANT SUPPLIED. COMBINED STEP AND EXTENSION LADDER.

ESSENTIAL FOR ALL ESTABLISHMENTS.

Used as steps, automatically opens and locks. When done with, closes itself. To use as a ladder, slide up the back part and let the hooks catch. Lowered just as easily. No complicated parts. Best materials used in manufacture. All stained and varnished before delivery. Light, strong and safe.

This Trellis is made of best Swedish yellow wood, the laths being about 1 inch wide by ½ inch thick in the centre. It closes and extends similar to ordinary trellis—but is stronger made, much easier to paint, and requires less paint.

TRELLIS RAILS. Of 2x1½ inch Yellow Deal. Prepared and grooved for flat trellis.

Prices, per 100 feet run - Top Rail, 10 -; Bottom Rail, 10 -; Outside Posts, 10 -; Inside Posts, 11 3

# Cleft Chestnut Paling Fencing

This Paling is of British material and manufacture throughout. The timber is home grown, the pales being cleft with the grain from hard slow grown chestnut poles. The wires are of best annealed drawn steel galvanized, which will not break in twisting. The fence is woven by machinery and made up in bundles containing 10 yards of any fence up to 4 ft. 6 ins. high, or 6 yards of any fence 5 ft. high or over.

**PALES.**—These are placed as near as possible at the distances apart stated on the list, which are calculated on the following basis:—

About 5 ins. apart = 84 Pales in 10 yards. | About 2 ins. apart = 86 Pales in 10 yards  
 " 3 " = 75 " 10 " | " 1 1/2 " = 117 " 10 "

If almost absolute regularity is wanted, specially selected pales can generally be put in at an extra cost of 10 per cent.

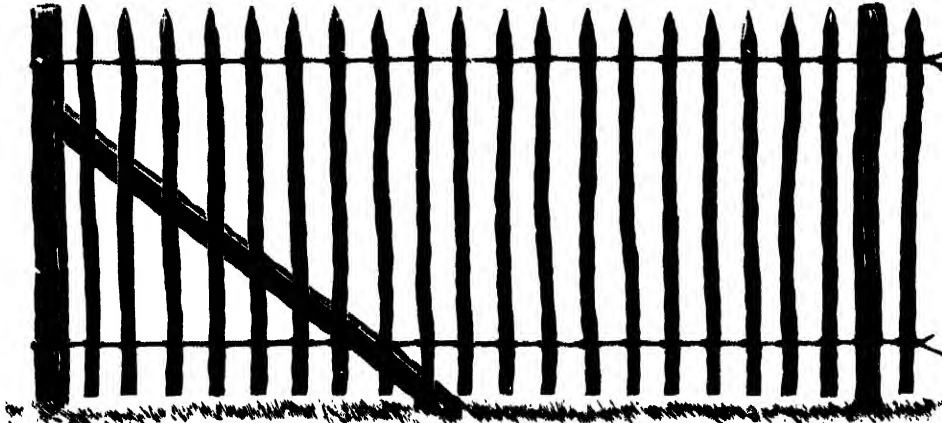

**WIRES.**—Four wires tightly twisted together form each complete strand. Every pale is stapled to one of the fence wires.

**INTERMEDIATE POSTS AND STRAINING POSTS.** If more posts are required than are included in price of fence, the price each of the additional ones will be as under:—

Height of Fence, .. 2 2 1/2 3 3 1/2 4 4 1/2 5 5 1/2 6 ft.  
 Intermediate Post, .. 7 1/2 8 1 9 11 1 1/2 1 3/4 1 3/8 1 1/2 1 7/8  
 Straining Post and Strut, 3 1/2 3 9 4 1 4 6 5 3 6 9 7 6 8 3 9

STAPLES for attaching wires to posts are included in price of fence including posts.

**No. T 6056. FENCING, with Two Lines of Wire. All pales full height of fence.**

6 " 0 "	2 0	2 0	2 0	2 0

This makes a particularly strong and rigid fence, the four lines of wire holding the pales tightly at short intervals. It can be confidently recommended against heavy stock, and it also makes an excellent boundary fence provided the pales are placed sufficiently close to afford no foothold between them.

Pales with blunt tops instead of points can be supplied without extra charge if specially ordered.

These prices include round Posts for placing 9 ft. apart, and one square Straining Post and Strut per 100 yards.

**No. T 6055. FENCING FOR SHEEP FOLDING, with Three Lines of Wire. All pales full height of fence.**

**PRICES PER YARD.**

Chestnut Stakes, Strong Angle Iron Stakes, with Thrust Plate.	7 6	8 3	9 6	10 6

Every Pale in this Fence, in addition to being very tightly stranded, is securely stapled to both top and bottom wires, so that the Fence can be readily taken up and refixed without injury, thus making it greatly superior to wooden hurdles or wire netting.

This pattern can also be recommended for enclosing building plots, or for any purpose where a cheap and easily removable fence is required.

## ENTRANCE GATE LATCH

Size, .. .. 6 inches.  
Price, .. .. 2/3 each.

## THE "STAYFAST" PATENT

Casement stay and fastener combined.  
Strongly made and well finished.  
Gives greater security than the ordinary fastener  
Cann or tongue cannot be forced with a knife or  
similar instrument.

It practically works as a fastener on a Mullin Plate  
The swivel is worked in a barrel joint and secured  
by a good rivet behind a strong washer, and  
the back plate has three screw holes, and thus  
out of line secure a good hold with the screws  
and the back plate is recessed and no cutting  
away of the woodwork required.

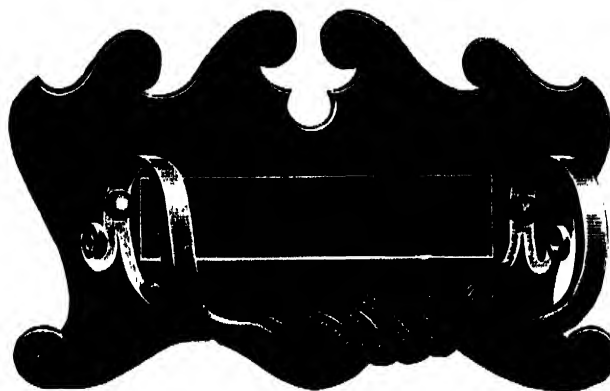

It is fixed in the centre of the casement, and offer  
very great advantages over the ordinary stay

Made in Malleable Iron or Art Black, Brass or  
Gun Metal.

side, looking from the **inside** of door.

No. Y 4758.

## PATENT DIRT-EXCLUDING SOCKETS

For Panic Bolts.

FLUSH WITH FLOOR AND GUARANTEED  
NOT TO CHOKE.

### ADVANTAGES :

Increased Security—Bolts always shooting  
to full depth.

No Dirt to Clean out.

Always efficient, convenient, easy to fix,  
simple and cheap.

Size of Holes, .. 1/2 1/4 3/8 1/2 in.  
Prices, .. .. **1/6 1/9 2/- 2/3** each.

# New Model Automatic Panic Bolt

(BRIGGS' PATENT).

LOCKING IN AN AUDIENCE IS IMPOSSIBLE.

This Bolt has been designed to meet the new requirements of the L.C.C. It embraces the maximum of mechanical efficiency in its working parts, with the minimum projection of about 1 inch, which no other Bolt on the market can approach.

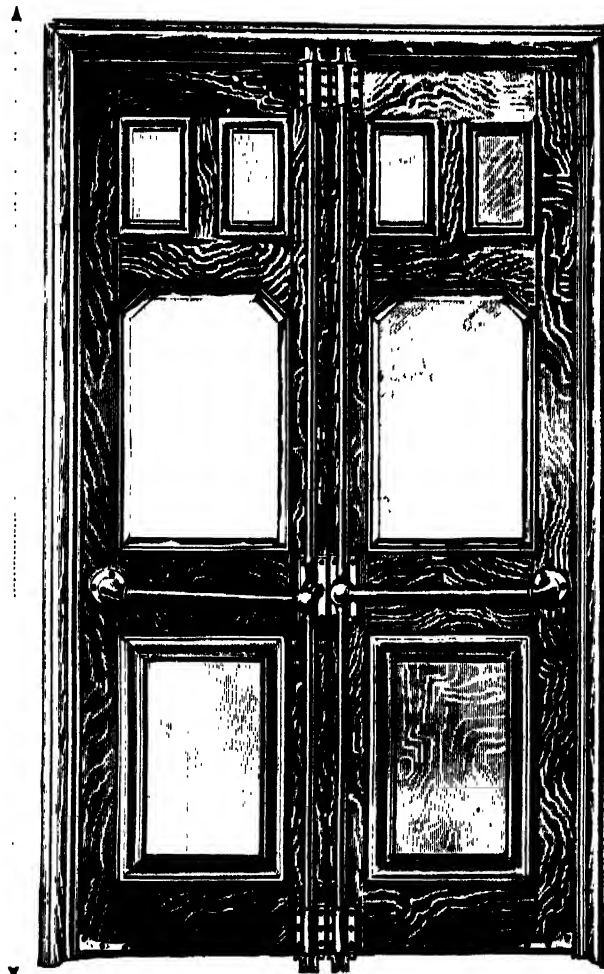

Doors fitted with this apparatus when closed are absolutely secure from unauthorised entry; at the same time, pressure from the inside instantly releases them.

**NO KNOB TO TURN,  
OR ANY OTHER FITTINGS  
NECESSARY.**

Suitable for any class of door, swing or folding, single or double.

APPROVED BY THE  
LONDON COUNTY  
COUNCIL  
AND OTHER PUBLIC  
AUTHORITIES.

MADE TO ORDER ONLY.

A. Bolt Secured. B. Bolt Withdrawn.  
INSIDE VIEW.]

By a novel device, any attempt to open the door from without by shaking, &c., causes the Bolts to **shoot further into the Sockets**; at the same time, the Bolt Rod Ends are so constructed that they fit the Sockets perfectly, and prevent any rattling in stormy weather; this arrangement also allows the Bolts to enter the Sockets freely, even if the door be warped.

The sizes required are widths from centre to centre of stiles, and height from floor to underside of door frame, as shown by dotted lines on drawing.

MADE TO ORDER ONLY.

MR. FRANK MATCHAM, the eminent Theatre Architect, of London, says:—

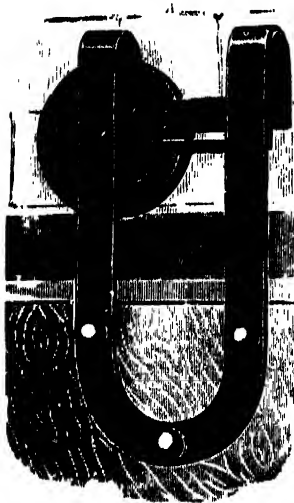

"I have examined and thoroughly tested your Panic Bolt, and, to my idea, it is the best in the market. I cannot show my appreciation of its worth better than by telling you I have specified it for various buildings now in hand."

4	6	13	4	1½	1½	410
4½	8	16	4½	1½	1½	66
6	7	18½	6	1½	1½	89
6	9	17½	6	1½	1½	129
6	10	18½	6	1½	1½	153
6	12	21	6	1½	1½	219
8	16	24	8	2	2	286
8	20	28	8	2	2	

When ordering Hatfield Rollers the following particulars are necessary:-

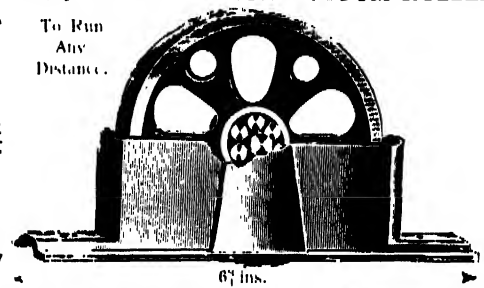

Width of doors, thickness of doors, and the thickness of walls of beam.

The length of run is usually the same as width of doors. When this is not so, a sketch should be sent.

Hatfield Rollers are only intended to run the distance specified above. If required for intermediate distances, the next size larger should be used; thus for a 5 ft. 6 in. door a 6 ft. roller is best.

## No. Y4453. ANTI-FRICTION BOTTOM ROLLER

▲ To Run Any Distance.

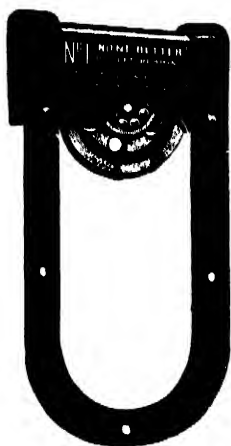

6½ ins.

# Mountings for Sliding Doors

FOR GARAGE, BARN, WAREHOUSE, AND PRIVATE HOUSE DOORS.

## THE "COBURN-YEMART" SYSTEM (All British)

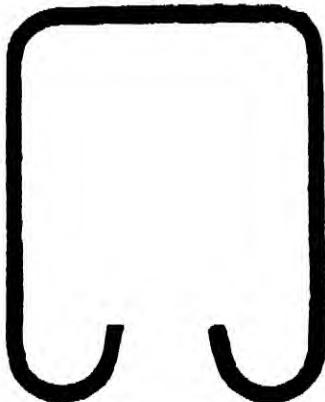

### SPECIAL ADVANTAGES.

THE SHAPE OF THE STEEL TRACKWAY is mechanically correct. the parallel runways ensure a dead true running line, free from the possibility of spreading or lateral movement. The section entirely envelopes the working parts, and protects it from dust, snow or ice. The Door when in use cannot possibly "jump" the track, which is a continual trouble with some systems. All sections are made to the full specified gauge of best steel.

OUR TROLLEY from which the Door is suspended, is fitted with SPECIALLY HARDENED roller bearings running in an unbreakable body; wheels are turned and properly centred to ensure smooth action. All parts have been made to anticipate hard wear and tear. With a few exceptions all patterns are now fitted with either a vertical or lateral ADJUSTMENT, which can be brought into action AFTER THE DOOR IS IN POSITION.

ADAPTABILITY. Single, or any number of doors filling one opening can be fitted by this system, the variation in the suspension brackets being stocked to suit all positions. When in any doubt, kindly give us a rough sketch shewing the proposed application, when we will quote for suitable fittings for the job. The variety in sizes are made to form a correct proportion when the work is in position.

INSIST on THE "COBURN-YEMART" and ensure good workmanship.

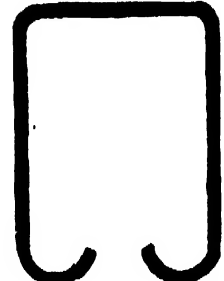

Full size of Track No. Y 5912.

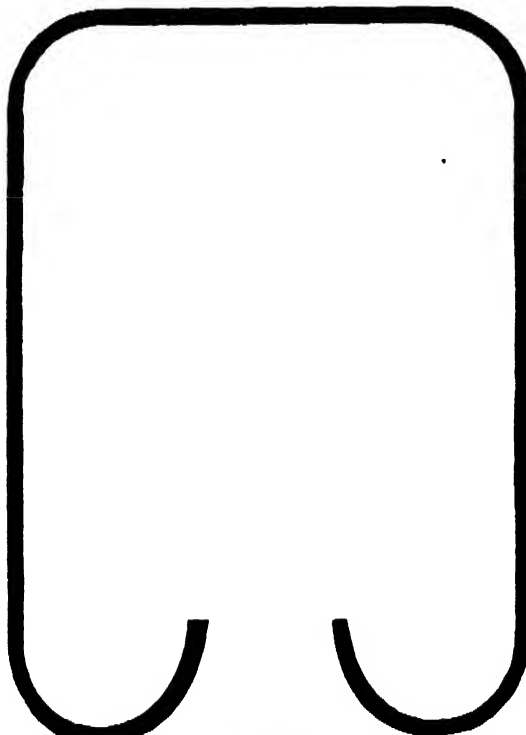

No. Y 5910. Steel Track is used for light cupboard doors only. It is stocked in lengths up to 4 ft. . . . per foot 8d.

No. Y 5912. Steel Track is made from 16 Gauge (full) material. It is stocked in lengths up to 5 ft., and is suitable for doors weighing up to about 3 cwt. . . . 10d.

No. Y 5914. Steel Track (16 Gauge full) is stocked up to 8-ft. lengths, and is suitable for loads up to 4 cwt., . . . 1/3

Full size of Track No. Y 5910.

Full size of Tracks Nos. Y 5916 and Y 5918.  
No. Y 5916, made of 16 Gauge Steel.  
No. Y 5918, made of 13 Gauge Steel.

No. Y 5916. Steel Track (16 Gauge full) is stocked up to 6-ft. lengths, and is suitable for loads up to 7 cwt., per foot 1/8

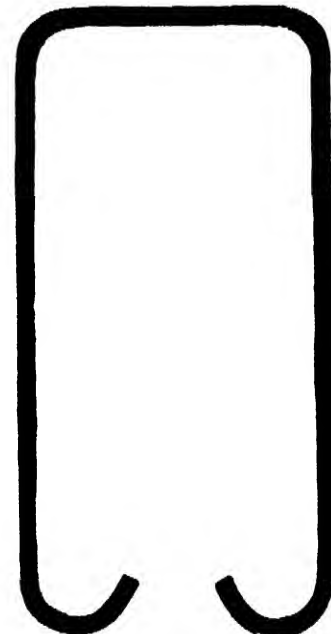

No. Y 5918 Steel Track is made from 13 Gauge material. It is stocked in lengths up to 6 ft. and is suitable for any type of heavy door, . . . 2/1

### SPECIAL NOTE.

We have recently added to the lengths of Trackways, the 4-ft. No. Y 5910, and 6-ft. Nos. Y 5916 and Y 5918 being a new length for the section. The advantage lies in the saving of joints in a long run.

Any length of Track can be made by butting end on end, inside the suspension bracket, provided for attachment work.

The end of a run is stopped with brackets provided for the purpose.

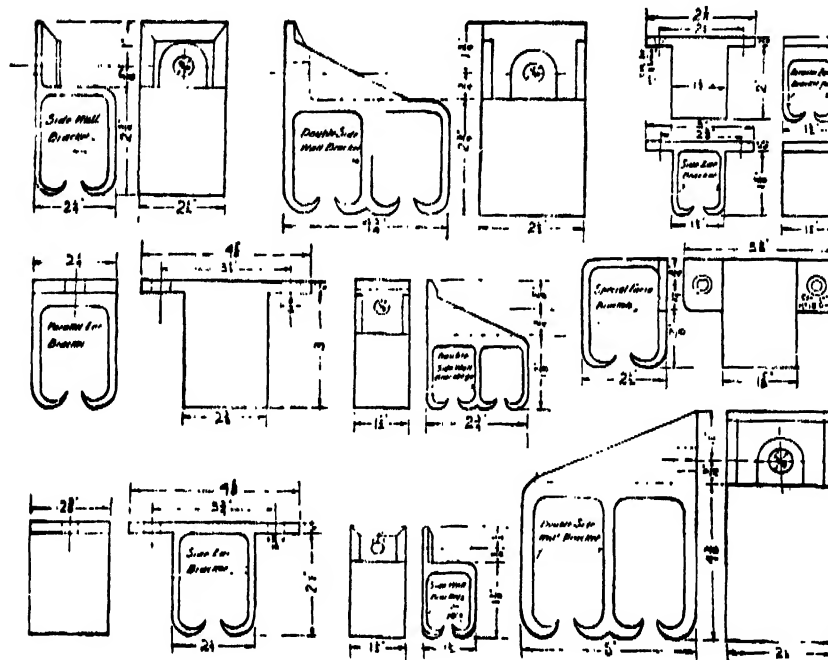

Full size of Track No. Y 5914.

# Mountings for Sliding Doors

## THE "COBURN-YEMART" SYSTEM—continued.

The Illustrations are for the purpose of showing the various types of Suspension Brackets in use.

Measurements for setting out purposes can be had from us on receipt of specification.

All Patterns are made from best materials only. The designs have been made with a view to strength and neatness in position. Patterns to carry any possible lateral strain are made in malleable material.

### PRICES AND NUMBERS OF SUSPENSION BRACKETS FOR ALL TRACKWAY SECTIONS.

*Prices for Stop End Brackets are the same in all cases.*

	For No. Y 5910 Trackway, Price, each.	For No. Y 5912 Trackway, Price, each.	For No. Y 5914 Trackway, Price, each.	For No. Y 5916 Trackway, Price, each.	For No. Y 5918 Trackway, Price, each.
No. Y 5920. Bracket for single lines of Trackway, suspended from face of work. (Wall side),	8d.	10d.	1/6	2/1	3/4
No. Y 5922. Bracket for double lines of Trackway, suspended from face of work. (Wall side),	1/6	2/11	4/2	7/4	7/4
No. Y 5924. Bracket for one or more lines of Trackway, suspended from under side of soffit,	8d.	1/1	1/8	3/4	3/4
No. Y 5926. Bracket for single lines of Track, suspended from underside of soffit,	8d.	1/6	1/11	6/3	6/3
No. Y 5928. Facia Bracket, for attachment to facia board. Special pattern where space is limited,	—	1/6	—	—	—

NOTE.—The distribution of Brackets depends on the load to be carried, but for general calculation a bracket every 3 to 4 ft. will meet the requirements of the case. Example: A 4 ft. door (width) could be hung on two 4 ft. lengths of track or one 8 ft., by one open and two closed stop brackets; a 5 ft. door by two 5 ft. lengths of track, three open and two closed brackets. In estimating the length of trackway required, calculate just double the width of door or doors filling an opening—this rule applies to any number of doors as generally arranged. Where time allows, we suggest that you let us give you the advantage of our experience with this kind of work.

# Mountings for Sliding Doors

## THE "COBURN-YEMART" SYSTEM—continued.

NOTE.—Any width of door can be suspended on this system. To enable you to approximate the cost of the system, we give below the cost of applying various types to a door 4 ft. 6 ins. wide, complete with track and brackets

No. Y 5930 Trolley is used in connection with No. Y 5910 Track only. It is suitable for light internal cupboard doors not exceeding 50 lbs. in weight.

Price per pair, 7/3

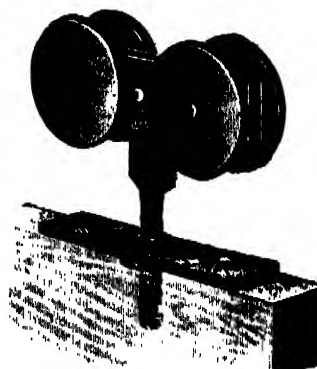

Price per set, for Track, Brackets and Trolleys, for a door 4 ft. 6 ins. wide, 16/7

No. Y 5932 Trolley is used with No. Y 5912 Track. It is suitable for doors weighing up to 2 cwt. It is fitted with roller bearings and malleable parts.

Price per pair, 8/4

Price per set, for Track, Brackets and Trolleys, for a door 4 ft. 6 ins. wide, 20/-

No. Y 5934 Trolley is fitted with a vertical adjustment, Roller bearings and malleable fittings. It is used with Nos. Y 5912 and Y 5914 Track.

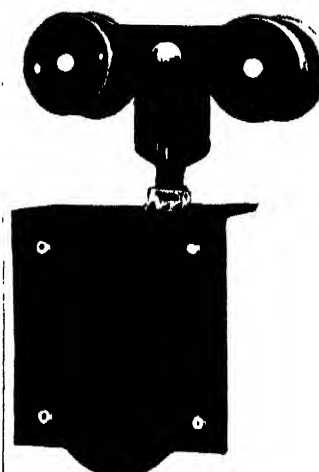

For No. Y 5912 Track, per pair 18/9

" " Y 5914 " " 24/9

Price per set, for Track, Brackets and Trolleys, for a door 4 ft. 6 ins. wide.

For No. Y 5912 Track, 30/6

" " Y 5914 " 43/6

No. Y 5936 Trolley is similar in all respects to No. Y 5934, with the addition of the face, as well as top fixing. Both types are used when doors run over the face of each other.

For No. Y 5912 Track, per pair 16/-

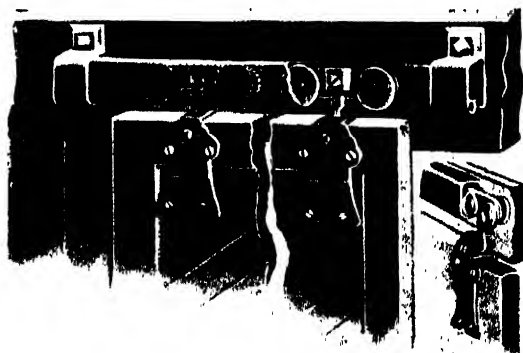

" " Y 5914 " " 18/-

Price per set, for Track, Brackets and Trolleys, for a door 4 ft. 6 ins. wide.

For No. Y 5912 Track, 27/9

" " Y 5914 " 36/9

Illustration shows a door hung in position with apron fixing. The hanger is fitted with a vertical adjustment. The No. Y 5920 Bracket is shown in position.

Read carefully the descriptive matter with advantages, shown on page 37.

No. Y 5938.	Trolley similar to Illustration.	for Doors weighing up to 2 cwt., per pair,	9/2	For a Door 4 ft. 6 ins. wide, set complete,	20/10
" Y 5940.	" " " " " " " "	3 " "	11/6	" " " " " "	23/2
" Y 5942.	" " " " " " " "	4 " "	14/7	" " " " " "	33/4
" Y 5944.	" " " " " " " "	6 " "	20/7	" " " " " "	46/-
" Y 5946.	" " " " " " " "	10 " "	22/8	" " " " " "	58/-
" Y 5950.	" " " " " " " "	30 " "	26/10	" " " " " "	62/-

NOTE.—The prices for complete sets given above are on the assumption that No. Y 5920 Bracket would be used. Any other type of Bracket would cost approximately the same. In calculating the cost of a pair of doors filling an opening, say, 9 ft. wide, you should nearly double the above figures. Doors of greater width—single, double, or treble—cost very little more, as the hangers are calculated at the same rate in all cases. When time permits, please give us details of the doors to be hung and let us send you an Estimate for suitable gear.

### No. Y 5952. HANGER

Is used exclusively for Sliding Accordion Screens. They are largely used to give temporary partitions of school and public buildings. Very little space is occupied by the partition when not in use, i.e., the width of the leaves and the total thickness of the leaves folded back. The action is fitted with ball bearings, so that all friction is obviated. This pattern contains special race cap.

To carry 200 lbs., Hanger for No. Y 5912 Track, ... each, 16/8

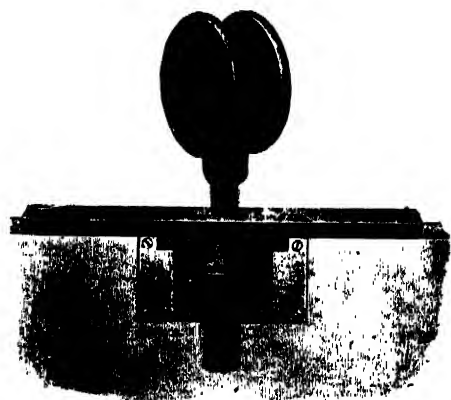

" 300 " " " Y 5914 " ... " 20/7

### DIRECTIONS FOR APPLYING No. Y 5952 STYLE HANGER.

Select size of Carrier and Track suitable for the thickness and weight of doors to be hung.

Track should equal full width of openings.

Any number of doors can be used, beginning with a half door, hinged to a strip attached to the jamb on one or both sides, according to the proposed way of folding the doors. The half door must be exactly one-half the width of the full-sized doors, less the thickness of the strip to which they are attached. The full-sized doors must be of an exact width top and bottom, and edges perfectly parallel. Hinge the doors together, fold them and strike a centre line across them all. Attach carriers on the centre of this line, having the centre of the pendant on the exact centre of the door, considering both width and thickness. Attach one carrier to each full-sized door if the thickness of door equals or exceeds the diameter of the carrier wheel (trolley); if less in thickness, then apply carriers to every other door. In case of very light screens carriers need only be applied to every other leaf.

# Mountings for Sliding Doors

## THE "COBURN-YEMART" SYSTEM—continued.

No. Y 5954 **Hanger** is fitted with a wrought iron fixing strap. This type shows little or no fixing work when in position. It can be fitted into the wood-work flush if desired. Customers should give us thickness of wood and say if they desire to fix into door flush.

### Prices per Pair :

No. Y 5954, for No. Y 5912 Track, ..	<b>20/7</b>
.. Y 5956 .. Y 5914 ..	<b>24/9</b>

Price for Complete Set for a Door 4 ft. 6 in. wide with Brackets and Track :

Y 5912, **32/3** ; Y 5914, **43/6** ; Y 5918, **65/-**

No. Y 5960 **Hanger** is similar to No. Y 5954, but is fitted with double wrought-iron fixing straps, and a vertical adjustment. In ordering please state thickness of wood.

### Prices per Pair :

No. Y 5960, for No. Y 5912 Track,	<b>26/10</b>
.. Y 5962 .. Y 5914 ..	<b>31/-</b>
.. Y 5964 .. Y 5916 ..	<b>41/2</b>

Price for Complete Set for a Door 4 ft. 6 in. wide with Brackets and Track :

Y 5912, **38/6** ; Y 5914, **49/9** ; Y 5918, **76/2**

NOTE.— Prices given for sets are intended as a guide only. It should be understood that any width, thickness, or weight can be carried by the "Coburn-Yemart." Architects should insist on the "Coburn-Yemart" and ensure satisfaction.

GUIDES for the bottom of doors. No guide should carry any weight of the door ; the joiner should see that the door is "pendent" from the hanger, the guide is only required to save a lateral move at the bottom.

Square Section

No. Y 5963. Channel, Plain per ft.	<b>7d.</b>
.. Y 5965. Drilled and Csk. ..	<b>1/-</b>
.. Y 5966. With Lugs for Concrete ..	<b>1/6</b>
.. Y 5976. Special Flanged Channel for wood ..	<b>6d.</b>

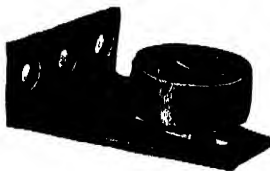

No. Y 5968. Malleable Guide to fix on bottom of Door and run in Channel.

Price, **7d.** each.

No. Y 5970. Roller Guide used with Iron Channel. The Roller takes up friction on sides.

Price, **2/-** each.

No. Y 5972. Roller Guide. It is screwed to face of wall or wood-work, the door sliding between fixing plate and wheel.

Price, **9d.** each.

No. Y 5974. Roller Guide to fix into stone or concrete in front of Door.

Price, **3/-** each.

Consider the saving of Floor Space by using Sliding Doors fitted with "Coburn-Yemart" fittings.

Bear in mind the fact that all positions can be fitted easily.

The Door cannot "jump" the trackway, and the Trolley is weatherproof.

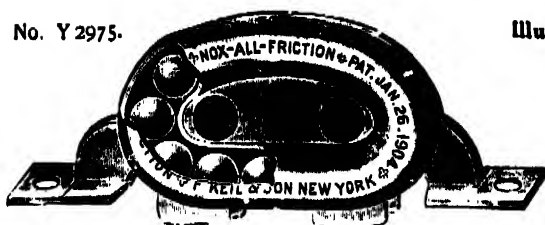

Ensure long life of gear, and easy running all the time.

When you want to Hang a Sliding Door let us quote you.

# Ball-Bearing Rollers for Cupboard and Thin Doors

Copper Plated; Solid Wrought steel Sliding Door Track in 10-foot lengths, for use in combination with No. Y 2977 Sheave. Price, 4d per foot.

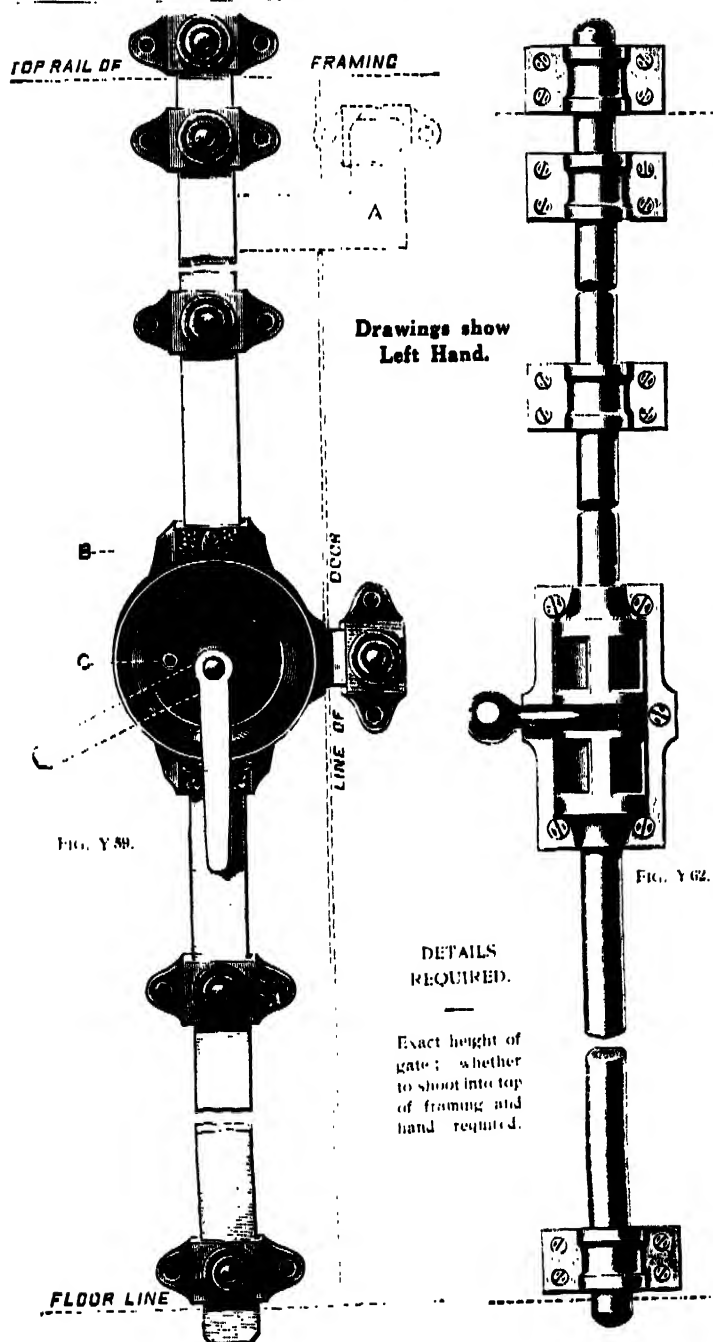

FIG. Y 59.

FIG. Y 62.

## Improved Lever and Spiral Bolts

AS USED FOR ALL KINDS OF SINGLE OR DOUBLE ENTRANCE AND COACH-HOUSE GATES, MAIN DOORS OF PUBLIC BUILDINGS, THEATRES, FIRE STATIONS, AND GOVERNMENT OFFICES, &c.

It will be seen in our illustration Fig. Y 59, by the simple operation of moving the handle to an angle of about 45 degrees, it is possible for a child to fasten or release the three bolts, a great improvement from the old style of releasing gates.

The dotted lines A show an extension of the Top Bar for the purpose of further securing a pair of gates, and it will be seen that this addition gives both a vertical and horizontal grip to the second gate.

The Top and Bottom Bar can be cranked to any angle either way, to suit any make of doors, and should it be required only to shoot one or two ways, middle bolt of the top one from B could be omitted.

The construction is very simple, and the bolt also forms a strong binding stay for weak door or gate.

### PRICES OF LEVER BOLTS

Made in three Flat Sizes, 1, 2, 3, 4, and 1 1/2, 2 1/2, and 3 1/2, and in three Round Sizes, 1 inch, 1 1/2 inch, and 2 inch.

## THE "CITADEL" PATENT DOOR FASTENER

MADE IN

**Solid Brass, Sanded.**

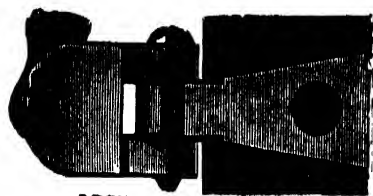

No. Y 2560, 18/- per doz.

**Solid Brass, Polished.**

No. Y 2561, 22/6 per doz.

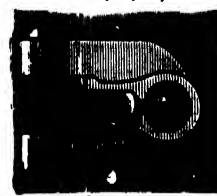

**Malleable Iron, Berlin Black.**

No. Y 2562, 9/- per doz.

OPEN, FIXED IN DOOR POST

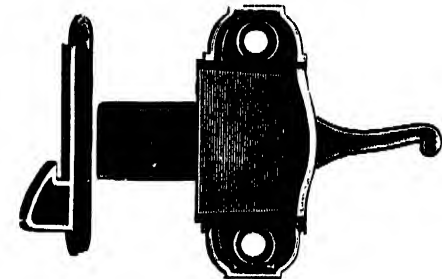

This Fastener marks a distinct advance in the interior fastenings of doors. It is very much stronger than a bolt, is simpler in action, cheaper, and is fixed in one half the time; as will be seen, ONE screw only is required.

CLOSED OVER DOOR.

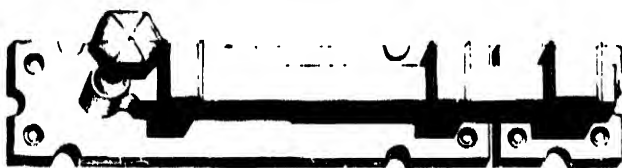

It is the **BEST** Fastener made for bedroom and all interior doors, whether they be **HEAVY** or **LIGHT**. The drawings do not adequately indicate these specially good features: we therefore solicit an order for a sample.

# Hinges

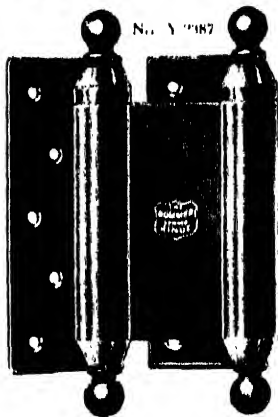

## PATENT SINGLE and DOUBLE ACTION REGULATING SPRING HINGES

SINGLE-ACTION SPRING HINGES (Two Spring Hinges to a pair).					
For Doors up to	1 1/2	2	2 1/2	3	ins. thick.
Size of Hinge,	3 1/2	4	5	6	ins.
No. Y2278 Japanned Iron Hinges,	2	23	36	46	6 each.
" Y2281 Polished Brass Hinges,	4	53	66	76	12 "

DOUBLE-ACTION HINGES.					
For Doors up to	1 1/2	2	2 1/2	3	ins. thick.
Size of Hinge,	3 1/2	4	5	6	ins.
No. Y2279 Japanned Iron Spring Hinge and Blank,	53	66	9	106	166 per pair.
" Y2279a " " " only,	36	4	56	7	113 each.
" Y2280 Polished Brass Spring and Blank,	106	119	166	21	27 per pair.
" Y2280a " " " Hinge only,	76	9	129	15	21 each.

These well known Hinges have recently been greatly improved, and possess advantages over the original pattern which will at once recommend themselves to the practical mechanic. By the introduction of a regulator to each Spring, the Hinge can now be fixed as easily as an ordinary butt, an improvement that will be appreciated by all who have fixed the old pattern. In addition to this, the power of the Spring can be adjusted to exactly close the door with any desired force. A pair of Double-action Hinges consists of one Hinge with Spring, and one Hinge without Spring (blank). In fact the Blank Hinge is made much smaller than the Spring Hinge.

### BOMMER SPRING BUTT HINGES

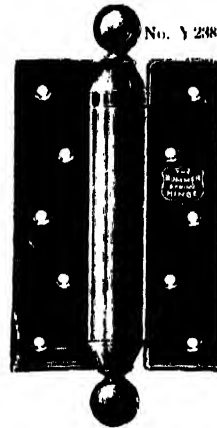

Two Spring Hinges per pair

#### REQUIREMENTS

The Thickness of Door

Width of Door	If the Earlets of the Hinge are partly embedded into the wood	If the Earlets of the Hinge are to clear the face of the door	Size of Hinge required	Thickness of Hanger Strip required
2 ft.	1 to 1 1/2 ins.	1 to 1 1/2 ins.	3 ins.	1 in.
2 1/2 "	1 1/2 to 2 "	1 1/2 to 2 "	4 "	1 1/2 "

# Door Checks and Springs

No. Y 4800. **"THE BRITON"**  
A NEW LIQUID DOOR CHECK AND SPRING (PATENT).

A principle has been introduced into this Check and Spring which has made it the most perfect and reliable Door Closer on the market.

## SOME OF ITS ADVANTAGES.

It is British made by British workmen.  
Every item of the material used in its construction is produced in England.  
It is made in sizes to suit any door—light or heavy.  
It suits either hand, right or left, without alteration of any part.  
Every Spring is tested before leaving our works.  
It can be fixed in five minutes by any ordinary workman.  
It can be adjusted to close the door quietly and slowly by simply turning a screw with the fingers.  
It is ornamental. It is cheap. It is warranted.

## PRICES.

Size A	For Light Doors,	1 1/2 inches thick,	.. .. .	21	each.

# Fanlight and Skylight Openers

## LEGGOTT'S SYSTEM

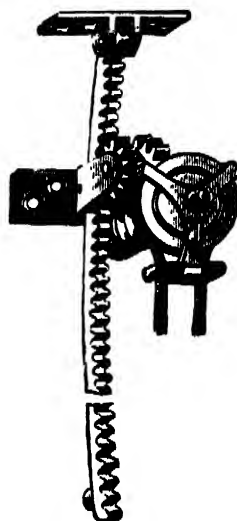

### No. Y 5416, FANLIGHT OPENER

Size No. 2, Malleable Iron, .. .. .	3/9 each.
" 2, Gun Metal, Polished, .. .. .	6 "
Size No. 2 opens 10 ins., and is suitable for windows about 2 ft. square, or similar area.	
Size No. 6, Malleable Iron, .. .. .	4 6 each.
" 6, Gun Metal, Polished, .. .. .	8 3 "
Size No. 6 opens 18 ins., and is suitable for windows about 3 ft. square, or similar area.	
Size No. 8, Malleable Iron, .. .. .	9 each.
" 8, Gun Metal, Polished, .. .. .	18 "
Size No. 8 opens 18 ins., and is suitable for large heavy windows.	

These are made to fix in almost any imaginable position, and are always locked when opened or closed.

### No. Y 5418, SKYLIGHT OPENER

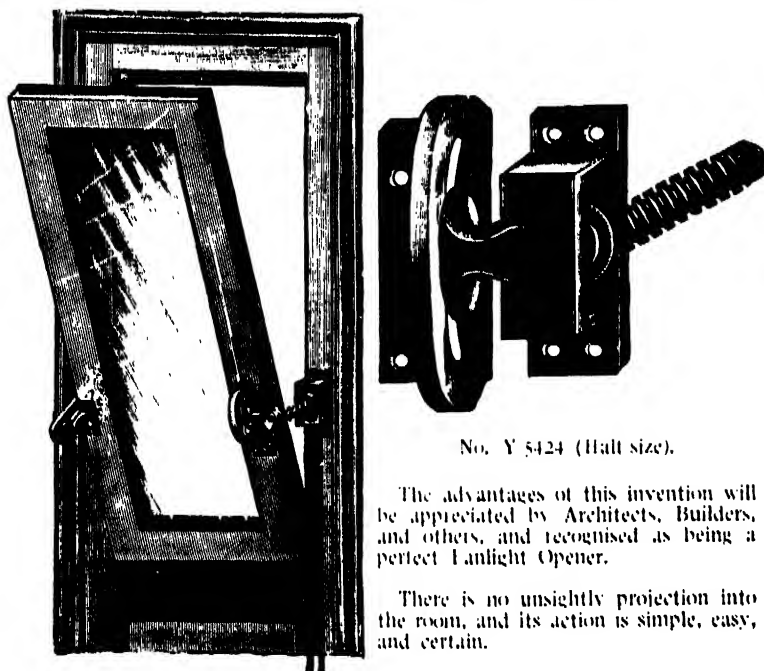

Size No. 3, Malleable Iron, .. .. .	4 6 each.
" 3, Gun Metal, Polished, .. .. .	9 "
Size No. 3 opens 10 ins., and is suitable for skylights 2 ft. long and 1 ft. 3 ins. wide.	
Size No. 5, Malleable Iron, .. .. .	6 6 each.
" 5, Gun Metal, Polished, .. .. .	10 6 "
Size No. 5 opens 15 ins., and is suitable for skylights 3 ft. long and 2 ft. wide.	
Size No. 7, Malleable Iron, .. .. .	10 6 each.
" 7, Gun Metal, Polished, .. .. .	21/- "
Size No. 7 opens 18 ins., and is suitable for skylights 5 ft. long and 3 ft. wide.	

For Roof Lights above this size we make a specially powerful opener.

### Endless Cords for above Measured Double.

Sizes, 6 7 8 10 12 feet.
Prices, 7½d. 7½d. 7½d. 1 1 3 each.

### CARTLAND'S PATENT "INVISIBLE" FANLIGHT OPENER

No. Y 5424 (Half size).

The advantages of this invention will be appreciated by Architects, Builders, and others, and recognised as being a perfect Fanlight Opener.

There is no unsightly projection into the room, and its action is simple, easy, and certain.

All the fixing required is a hole bored into the side frame, large enough for the screw to work freely, and when the Fanlight is closed the Opener is entirely out of sight.

	Brass.	Iron.
No. Y 5424, For Fanlight hinged at bottom, opening IN, ..	8 3	8 - each.
" Y 5426, " " hinged at top, opening OUT, ..	8 3	6 - "
" Y 5428, For Pivot Sashes, .. .. .	8 3	6 - "
" Y 5430, Side Adjustments, as illustrated, .. .. .	2 9	1 6 "

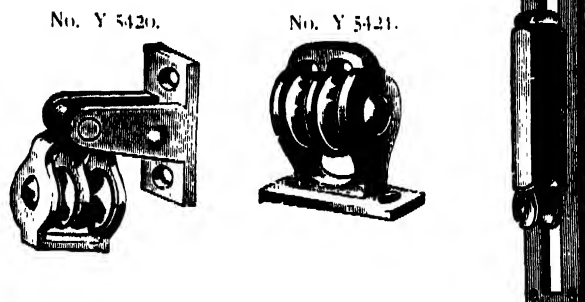

Endless Cords for above (same as for Leggott's System).

For Heavy Fanlights a Larger Screw is used, at ONE-THIRD increased cost.

### PULLEYS AND FITTINGS

To be used with above Openers.

### No. Y 5422.

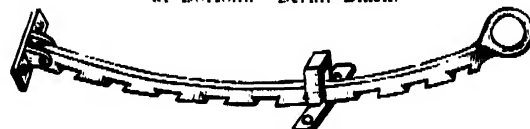

No. Y 5420, Double Swivel Pulley, Brass, .. .. .	3 - each.
" Y 5421, Double Upright Pulley, Brass, .. .. .	3 - "
" Y 5422, Weighted Sliding Handle, Brass, for endless cords, .. .. .	4 4 ..

### No. Y 4311.

### MALLEABLE-IRON FANLIGHT OPENER

Suitable for a Sash hung at Top or Centre, and opening outward at Bottom. Berlin Black.

Sizes, 12 14 16 18 21 24 inches.
Prices, 12 9 15 9 19 6 22 6 25 6 36 - per dozen.

Prices, 6/- 6/- 6/9 6/9 7/6 9/- 10 6 per dozen.

# Fanlight Openers and Fasteners

No. Y 5335.  
For Sashes opening OUTWARDS.

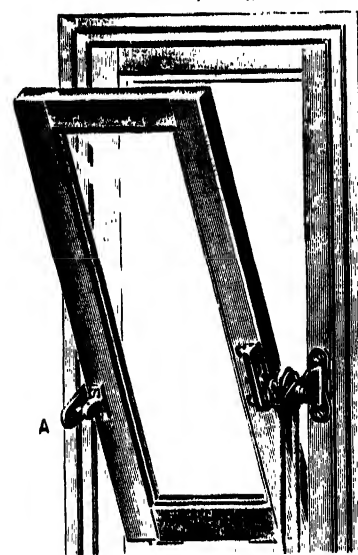

Showing Nos. 1 and 2.

## THE "FITALL" PATENT FANLIGHT OPENER

The "Fitall" Fanlight Opener, as its name implies, is suitable for Sashes hinged at **Top** or **Bottom**, or hung on **Central Pivots**; it is supplied in Malleable Iron, Black finish, or in solid Brass. We do not recommend it for very heavy Fanlights, but for small and medium Sashes. It is the best and simplest Opener on the market **AND THE CHEAPEST.**

Nos. Y 5335 and Y 5339.  
For Sashes opening INWARDS.

Showing Nos. 3 and 4.

No. Y 5335. IRON.				No. Y 5340. BRASS.			
No. 1.	For Sashes Opening Outwards	(Right Hand), ..	Price,	No. A.	For Sashes Opening Outwards	(Right Hand), ..	Price,

# Wood Working Machinery and Drilling Machines

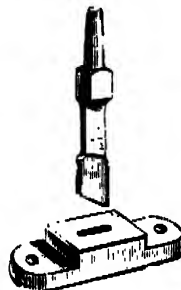

No. Y 2902.  
Centre Motion  
Mortising, Boring, and  
Tenoning Machine

No. Y 2903. Boring Apparatus

No. Y 2904.  
Venetian Blind  
Punch and Die

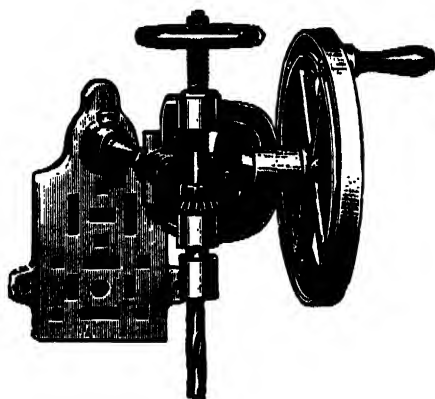

No. Y 2905.  
Tenoning Tool

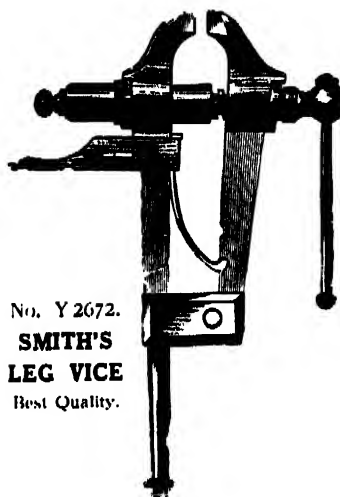

In the above Patent Centre motion and Direct action Mortising Machine, the lever (wrought from iron) is directly over the chisel, so that a large additional power is obtained, and the wear and tear consequent upon the usual side crank pinion wheels and toggle movement is entirely done away with. We have every confidence in recommending it as the simplest, cheapest, and best Mortising Machine made.

# Builders' Plant and Materials

**SCREENS (Best Make) for Gravel, Sand, Lime, Rubbish, Cinders, Coal, Malt, &c.**

No. Y 1234. **EXTRA STRONG LACED SCREENS**

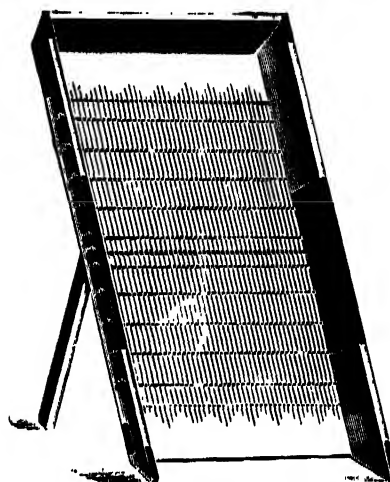

Well made and very strong, the sides, backs, toes and corners of frame are strongly clamped with iron, and strong iron bars at back. The frames are of yellow deal.

Size of Mesh, ..  $\frac{1}{4}$  ..  $\frac{1}{2}$  ..  $\frac{3}{4}$  ..  $\frac{1}{2}$  in. and larger.  
Prices, .. .. 25/6 .. 22/6 .. 21/- .. 21/- .. 21/- each.

N.B. Can also be had with galvanized wire work and sheet iron, at an advance of 6/6, 6/6, and 7/6 each, according to size of Screen. This increases their durability in a high degree, and is much recommended.

No. Y 1235. **EXTRA STRONG LOCKET SCREENS**

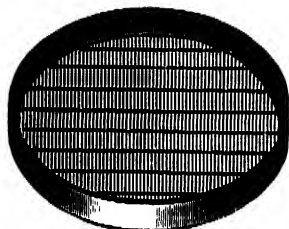

These Screens will be found very much more durable than the laced ones, as in their construction the upright wires are lapped round the crossbars.

The mesh is determined by the thickness of wire used and the number of laps, see illustration above. These Screens have a smooth sifting surface, and are the strongest and best screens made. The frames are of  $1\frac{1}{2}$ -inch yellow deal.

Size of Mesh, ..  $\frac{1}{4}$  ..  $\frac{1}{2}$  ..  $\frac{3}{4}$  ..  $\frac{1}{2}$  ..  $\frac{1}{2}$  ..  $\frac{1}{2}$  inch.  
Prices, .. .. 27/- .. 27/- .. 26/- .. 24/- .. 24/- .. 24/- each.

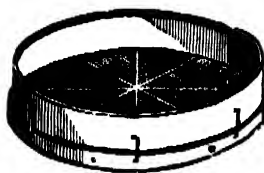

No. Y 1235. **GRAVEL SIEVE**

Extra Strong Oak Rims.

Size of Mesh, 1 to  $\frac{1}{4}$  ..  $\frac{1}{2}$  ..  $\frac{3}{4}$  ..  $\frac{1}{2}$  ..  $\frac{1}{2}$  m.

Letters or Figures—½ inch, 4/- per dozen; 1 inch, 6/6 per dozen extra.

## EXPANDED METAL

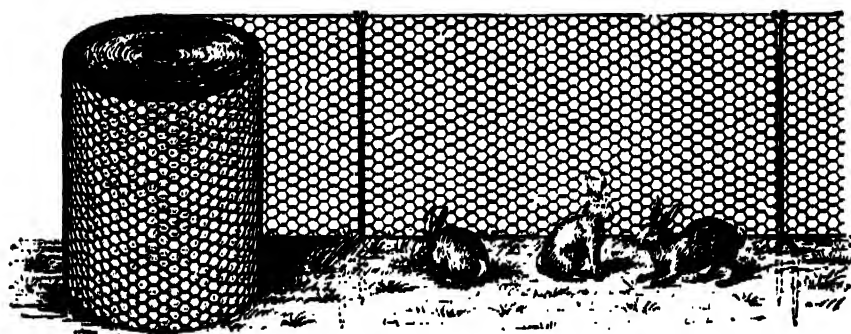

This material known as Expanded Metal is made from sheets of rolled steel of various thicknesses, cut and expanded into meshes of different shapes and sizes, varying from ⅛ to 6 inch mesh, embracing a range of nearly 300 variations. The size of sheets extends to 16 x 8 feet, and it is supplied in any size up to those dimensions. If the very large sheets are necessary, consideration must be given to the question of cost of carriage when price is an object, as the large sheets cost more per ton than the medium size sheets, and unless they are crated there is great risk of their getting buckled in transit. Expanded Metal is now being largely used in concrete reinforcement, and is specially suitable for foundations, walls, roofs, arches, bridges, reservoir dams, piers, &c. The lighter gauges are frequently used for encasing steel work. Full particulars upon application.

Orders of £4 net value and upwards Delivered Free in England and Wales, also to Glasgow, Dublin, Belfast, Cork, Waterford, and Wexford.  
Marked \* can be supplied in 25 yard rolls. Original rolls, uncut, only supplied.

N.B. -Special Terms on Application for Orders of 1000 yards and upwards, and your esteemed enquiries are respectfully solicited.

## PATENT MACHINE MADE Mixed Mesh Wire Netting GALVANIZED AFTER MADE.

This Netting is the best and cheapest rabbit fence extant, and is rapidly taking the first place in the Australian Colonies as the only effective means of dealing with the rabbit pest. It is also invaluable for enclosing warrens, plantations, &c., where small ground game have to be fenced against. The lower portion being of 14-inch mesh affords an absolute protection at the required point, while the upper portion being of 2 1/2-inch mesh gives the required height at a reduction of 20 per cent. on the cost of 14-inch throughout.

PRICE PER 50-YARD ROLL. (Original Rolls, Uncut, only supplied.)

N.B.—From the above table the list price of any of the combinations enumerated can be obtained, for instance:—  
 The combinations given in the table are those usually employed; quotations for any other will be sent on application, but no combination may exceed 3 feet wide of either mesh or 6 feet of the two combined.

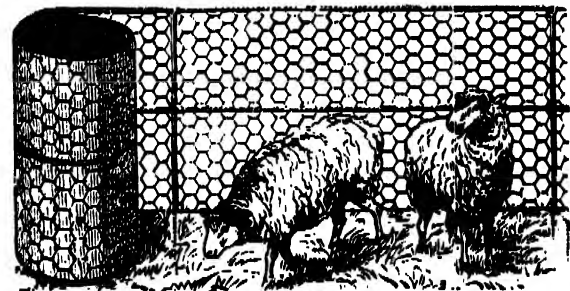

## EXTRA STRONG Galvanized Wire Sheep Netting WITH 3-PLY SELVAGES.

This Netting can be supplied with or without intermediate strands as desired, and with round or flat draught bars at ends of rolls. These latter very much facilitate handling in erection.

It is generally sent out in 50-yard rolls, but can be made up in 25-yard rolls, if desired, without extra cost.

## FOREIGN WINDOW GLASS, in Cases

BEST MAKE ONLY STOCKED.

"Cross Keys."

"Three Lances."

D. J. C.

"Lighthouse."

"Marine" or "Caduceus."

We have pleasure in drawing special attention to the above best brands of Foreign Window Glass, which for whiteness, evenness of surface and full weight, is not surpassed by any other make; whilst the prices are as low as ordinary selected brands. Large stocks of the following thicknesses and qualities are kept at our wharf in readiness for immediate despatch. We ask our friends to give us an order for a sample consignment. Once used, they will be appreciated and generally adopted.

Cases contain—15 oz. 300 feet super.; all other substances, 200 feet in each case. 2nd, 15 oz. 200 feet super. in each case.

Quality—	Coarse,	Fourth,	Third,	Best Third,	Seconds,	Substance,	15	21	26	32 ozs.
Coarse,	..	..	..	..	..	..	..	..	..	..
Fourth,	..	..	..	..	..	..	..	..	..	..
Third,	..	..	..	..	..	..	..	..	..	..
Best Third,	..	..	..	..	..	..	..	..	..	..
Seconds,	..	..	..	..	..	..	..	..	..	..

Current quotations will be submitted upon receipt of details of actual requirements.

N.B. The best 3rds in these brands is superior to ordinary 2nds; and the 2nds is equal to 1sts in ordinary makes.

## FOREIGN WINDOW GLASS, Cut to Sizes

FOR ORDERS OF 100 FEET AND OVER.

In Squares, ..	..	..	..	..	..	15	21	26	32	15	21	26	32 ozs.
Under 2 feet super.,	..	..	..	..	..	2½d.	4½d.	4½d.	6½d.	3d.	4½d.	5½d.	6½d. per foot super.
Larger Sizes,	..	..	..	..	..	3d.	4½d.	5½d.	7½d.	3½d.	5½d.	5½d.	8½d. " "

N.B.—Cut Sizes over 60 inches long or 40 inches wide at special prices, upon application.

## HORTICULTURAL GLASS, in Boxes

100 feet boxes—15 oz., —; 21 oz., — each. 200 feet boxes—15 oz., —; 21 oz., — each.

Current quotations will be submitted upon receipt of details of actual requirements.

A full stock of the following sizes in 21 oz. 200 feet boxes is kept at our wharf:—

12 × 10 ins.	18 × 12 ins.	16 × 14 ins.	18 × 16 ins.	20 × 18 ins.
	20 × 12 "	18 × 14 "	20 × 16 "	22 × 18 "
		20 × 14 "	24 × 16 "	24 × 18 "

## ENGLISH WINDOW GLASS, in Crates

We strongly recommend our friends to give English Window Glass a trial; it is full weight, full measure, and of superior surface quality.

	Substance,	15	21	26	32 ozs.
Fourth,	..	..	..	..	per foot super.
Third,	..	..	..	..	" "
Second,	..	..	..	..	" "
Best,	..	..	..	..	" "
Enamelled,	..	..	..	..	" "
Ground,	..	..	..	..	" "
Fluted,	..	..	..	..	" "

Current quotations will be submitted upon receipt of details of actual requirements.

The size of the sheets usually packed in crates as above is 50 × 35 inches, but may vary from 40 × 26 inches to 54 × 38 inches. Larger sizes, as under, are obtainable at an increased cost. Estimates given to specification of precise requirements. The largest sizes that can be made in the various substances of sheet glass are as follows, but the extreme limits of length and width cannot be combined in the same sheet:—

	Substance,	15	21	26	32 ozs.
Extreme Length,	..	..	..	..	75 ins.
" Width,	..	..	..	..	46 "
" Area,	..	..	..	..	20 feet.

The extreme area taken in connection with the extreme length or width required in any particular case will indicate approximately the corresponding limit of width or length.

[illegible]

Glazing in Country Estimated for.

In Lamp or Lantern Panes, which are wider at one end than the other, the width for measurement is taken at two-thirds up from the narrow end for quantities. (Bent and Opal Lamp Panes are charged full size of the extreme dimensions.) This rule, however, applies only to Lamp Panes; all other Panes of irregular shape, not rectangular, are measured as squares from extreme points; and when the shapes are very irregular, a special charge is made to cover risk and loss of time in cutting.

Diamonds are bought according to their weight and quality, and perhaps some information on the methods adopted in numbering them may be of interest. The Diamonds are divided into six sizes: Nos. 1 and 2, for cutting sheet glass, are lighter than Nos. 3 and 4 for cutting thick sheet and figured rolled, and all glass of a rough and uneven surface, like muffled or Hartley's, the No. 4 being the best "all-round" diamond made, capable of cutting any kind of glass; Nos. 5 and 6 are still heavier and larger stones, and are made for cutting polished plate glass only.

Any size Shelf supplied to customers' specification.

# Improved Circular Glass Ventilators

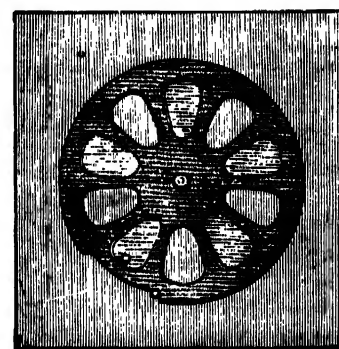

OPEN.

Including Glass.

The circles are about 9 or 10 inches in diameter.

Larger sizes extra.

N.B.—In ordering these Ventilators, the description of glass required and the height and width in rabbets must be distinctly stated; also, if the circles are desired in any particular position, such should likewise be mentioned, as we cannot be answerable for errors in same if such are omitted.

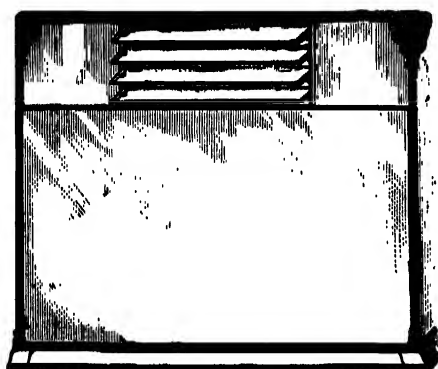

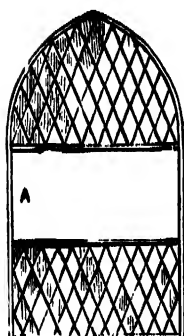

SHUT.

Superficial measurement,	..	..	12	18	24	30	36	48	60	72 inches.
26 oz. Sheet Glass,	..	..	13/6	17/3	21/-	24/-	27/9	33/9	37/6	40/6 each.

1st Quality,	..	..	52/6	58/6	63/-	67/6	72/- each.
2nd "	..	..	37/6	40/6	45/-	48/-	51/- "
3rd "	..	..	30/-	32/3	34/6	36/-	37/6 "

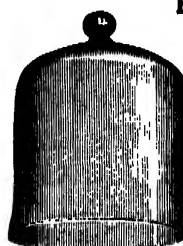

Intermediate sizes charged in proportion.

Church quarry ventilators made only of the 1st quality.

When ordering please state clearly if the measures given are in the clear (sight) or including rabbets. Are the rabbets inside or outside of windows? Are they to pull on right-hand side? Are they to be fixed on, under, or between glass? (This question refers to whether the outside of ventilator frame comes into contact with glass. By between glass is meant glass at sides, NOT top and bottom).

No. G 4066.

DETAILS FOR REBATES.

## PARTICULARS TO BE GIVEN WHEN ORDERING.

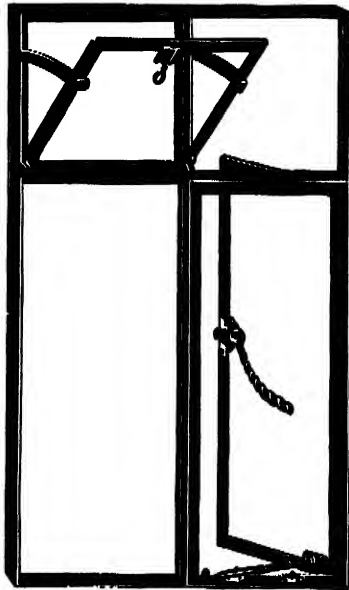

If possible, send sketch of head, cill and jambs, showing rebate or groove, and indicating where measurements have been taken. Height to be given first and so stated. For Casements—Sections L 4072, L 4075 to L 4077—state whether to be hinged on RIGHT or LEFT side, as seen from within. When for lead lights, state the number and position of saddle bars. If Hopper intended for insertion in leaded windows—instruct us to provide a rebate top and bottom. In all cases state whether plain sides with screw-holes or fixing fillets are preferred.

These are not stock articles, the sizes and details varying to requirements.

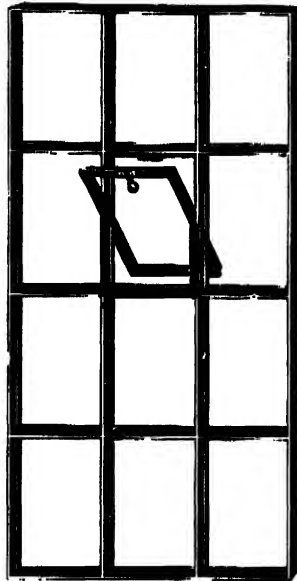

# Wrought-Iron Sashes

MOULDED SASH BAR, MITRE JOINTS.

No. L 6390.

# Straight Back O.G. Gutter

"WYANEM" SECTION.

The advantage of using our Straight Back Gutter is at once obvious, as owing to the increased water carrying capacity, even in time of excessive down-pour, the risk of overflow is reduced to a minimum. The prices we offer this excellent Gutter at are only slightly an advance upon those of the ordinary form, while the weights are in excess of the sections already upon the market.

The drawings give the exact sections and substances of 4 and 4½ inch sizes.

## "WYANEM" STRAIGHT BACK O.G. GUTTERS AND CONNECTIONS.

## Patent Gutter Adjuster

Patent No. 10791.

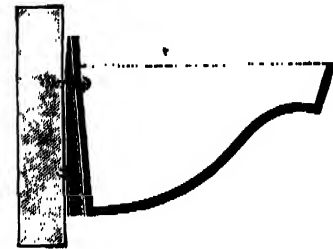

Exact Size.

Ordinary O.G. Gutter when fixed WITHOUT the ADJUSTER.

About one-third actual size.

The same Gutter when fixed WITH the ADJUSTER.

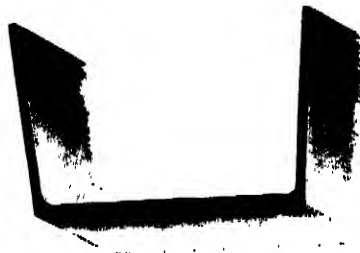

About one-third actual size.

IN the process of moulding it is more difficult, and consequently more expensive, to produce O.G. Gutters with a straight back. Although we offer our "Wyamem" Straight Back Gutter at the prices and weights which will compare favourably with the ordinary form, many of our customers have still stocks on hand of the ordinary section which they desire to utilize. The device we illustrate on this page in use adjusts the ordinary O.G. Gutter so that the front rim is raised to nearly a level with the back top edge, thus giving a smaller size gutter a water-carrying capacity equivalent to a larger size. The adjuster is manufactured of galvanized iron, therefore cannot rust, and is constructed with integral teeth to fix same upon the wooden fascia board in the desired position. A simple tap with a light hammer achieves this object. The gutter is then placed in position against the adjuster, and a fixing screw with a washer bedded in red lead prevents the possibility of water leakage through the screw hole. The screw passing through the interstice in the adjuster fixes the whole permanently in a rigid position.

This appliance is obtainable only from the patentees at the nominal cost of 5/- per gross.

# Manhole Covers and Frames

**Young & Marten's Patent No. 10825 Locking and Lift-off Manhole Cover**

APPROVED AND ADOPTED BY BOROUGH AND DISTRICT COUNCILS.

No. C 3931.

**Air-tight Manhole Cover, with Flange at Surface.**

## PARAMOUNT ADVANTAGES.

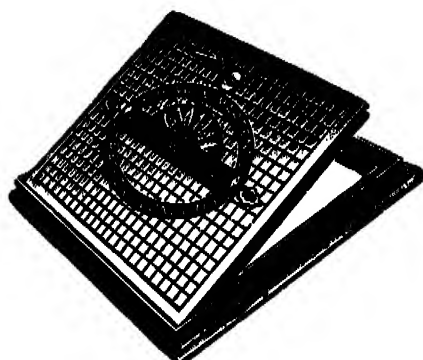

1. Perfectly air tight.
2. Absolute security.
3. Strongly made.
4. Nominal cost.
5. Triple locked.
6. Solid lug hinge.
7. Cover movable; but
8. Immovable without keys.
9. In case of breakage, Cover can easily be replaced without interfering with frame.

No. C 3932.

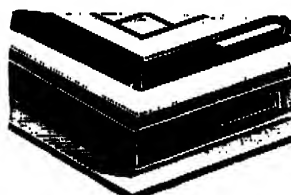

**Air-tight Manhole Cover, with Flange at Bottom.**

No. C 3933.

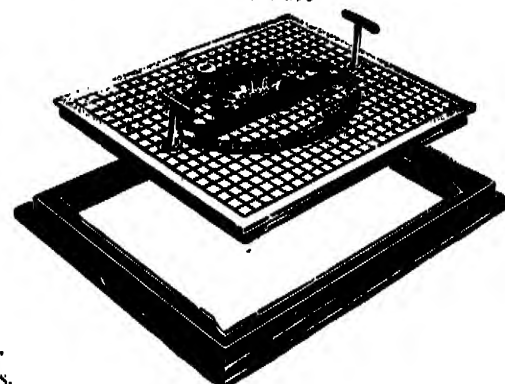

Showing method of opening.

This drawing shows the patent hinging arrangement.

No. C 3932.

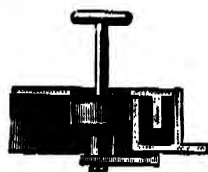

Showing Cover removed.

Prices (including Two Keys to each Cover).  
Size of Opening, 18 18 21 18 30 24 ins.  
Prices, .. .. 15/- 18/- 30/- each.

Locking arrangement is made with Gun-metal Liners and Wrought-iron Tongues.

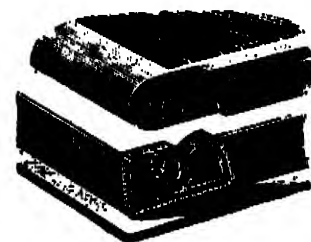

The turnbuckle cannot be unlocked without the aid of the key, thus the cover is securely locked and cannot be opened by children or unauthorised persons. The two keys are also applicable for the purpose of raising the cover on hinge, and again for its complete removal. The lower frame has a groove all round, which must be filled with sand, soap or grease, so that when cover is shut and locked it is both air-tight and secure.

Design No. C 4273.  
Showing Locking Arrangement.

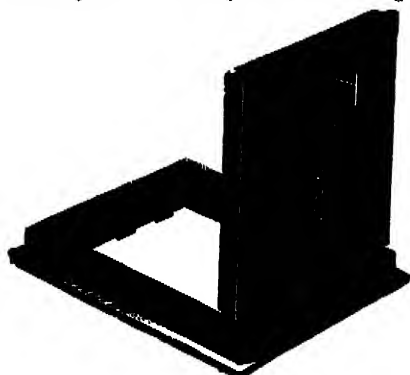

**Young & Marten's Patent No. 11146 Locking and Lift-off Manhole Cover**

Design No. C 4273.  
Showing Hinge Fitting in Frame.

Design No. C 4273.  
Showing Cover standing Vertical on Hinge.

## ADVANTAGES.

Cost—NOMINAL. Seal—AIR TIGHT.  
Cover—HINGED. Cover—LOCKING.  
Cover—REMOVABLE (with aid of key only).

Children and unauthorised persons cannot meddle with it.  
Will stand thorough examination.

Size of Opening, .. 24 18 24 24 30 24 ins.  
Prices, .. .. 18/- 22/6 30/- each.

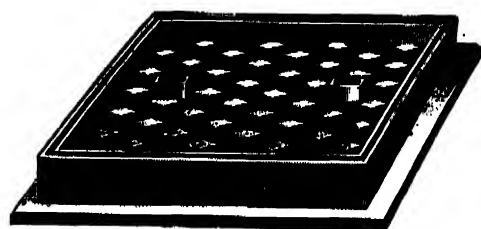

Locking arrangement is made with Gun-metal Liner and Wrought-iron Tongues.

Design No. C 4273.  
Air-tight Manhole Cover showing Cover Locked to Frame.

$\frac{1}{4}$ inch, ..	$3/9$ per ft. super.
$\frac{1}{2}$ " ..	$4/6$ " "
$\frac{3}{4}$ " ..	$5/3$ " "

Measurements all reckoned by height to top and width of Gate when fully extended.

# Gates and Railings

METAL READY FOR ERECTION, TO DESIGNS SHOWN ON THE FOLLOWING PAGES :-

The data in this Section is compiled with the object of affording at a glance to a prospective purchaser of Gates and Railings definite and inclusive prices ; thus obviating the uncertainty in calculating his cost, by computing same from the weights of the castings at price per cwt. ; for :-

- (a) **Gate Sets.** Single and double for piers or dwarf walls.  
(b) **Carriage Entrance Gates** for piers or independent fixing.

- (c) **Gates and Railings** complete with and without coping for specified frontages.  
(d) The requisite extra for extended frontages.

## SPECIFICATION.

**A frontage of 16 ft. consists of**—(c) One Gate fitted with Latch, one Gate Socket, Hanging Standard with Clip, Latching Standard, one pair of Braces and sufficient Panelling, and, when shown in drawing, wrought-iron horizontal bars.

**A frontage of 32 ft. consists of** (f) Two Gates, handed, fitted with Latches, two Gate Sockets, one double hanging Pilaster fitted with Clips, two Latching Standards, two pairs of Braces and sufficient Panelling, and, when shown in drawing, wrought-iron horizontal bars.

**SINGLE GATE SETS consist of**—(g) One Gate fitted with Latch, Gate Socket, hanging Batt for Brick Pier, fitted with Clip and Latching Batt for Brick Pier ; or (h) One Gate fitted with Latch, Gate Socket, hanging Standard fitted with Clips, Latching Standard and pair of Braces.

**DOUBLE GATE SETS consist of**—(j) Two Gates, handed, fitted with Latches, Gate Sockets, double hanging Pilaster, two Latching Standards, and two pairs of Braces.

**CARRIAGE ENTRANCE GATES consist of** (k) One pair of Gates, fitted with Striking Plate, Latch or Lock, Slip Bolt and Gate Stop, Gate Sockets and Hangings for Brick Piers ; or (l) One pair of Gates, fitted with Striking Plate, Latch or Lock, Slip Bolt and Gate Stop, Gate Socket and heavy Hanging Standards fitted with Clips.

**BUILDING DIMENSIONS.** The Gate spaces enumerated are those for (h) Single Gate with Standards ; (j) Double Gates with Pilaster and Standards ; (k) Carriage Entrance Gates for Brick Piers. Local requirements may necessitate the deviation from the measurements stated ; it is therefore advisable to have the "sets" on site to ensure accuracy in the construction of the brickwork.

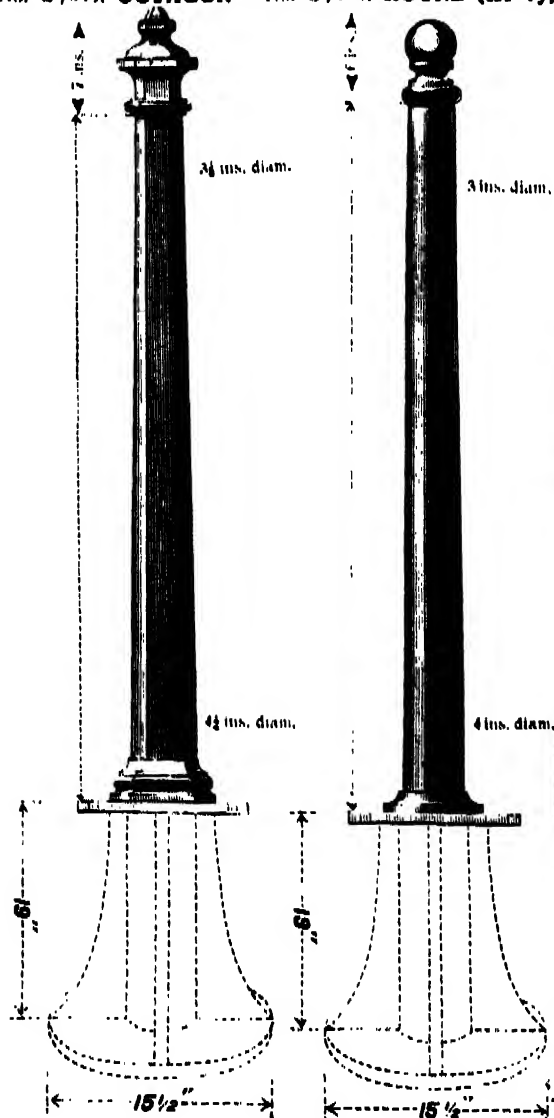

**EXTRAS.** Division Fencing, consisting of two wrought-iron horizontal bars  $\frac{1}{2}$ -in. diameter, and cast-iron standard with plate base supplied thus :-

6-ft. set, two horizontal bars and one standard,	7/6 per set.
10-ft. set, " " "	8/- "
12-ft. set, two horizontal bars and two standards,	12/9 "
16-ft. set, " " "	16/6 "

Bent Panels, Corner Standards, Ramps, Circled Corner Pieces, and any alterations from specified details are extra to any pattern railing. We shall be pleased to estimate to plans deviating in any details from foregoing description.

**FIXED RAILING AT SITE.**—Having a staff of experienced men we undertake for the trade the erection of any of our designs within twenty-five miles of the Tower, London. Estimates will be furnished, inclusive of supplying the materials and labour, upon receipt of details of actual requirements.

## Wrought-Iron Continuous Flat Bar Fencing

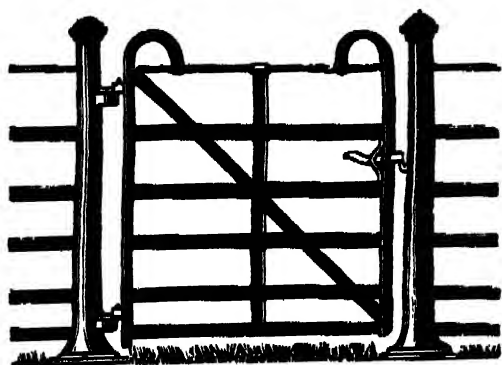

This Fencing is made with the top bar of round iron, and lower bars of flat iron, placed edge upwards. The standards are generally placed 3 feet apart, with a joining standard every 15 feet. The flat bars are secured to standards on the notch and wedge principle, which firmly holds the standards in their upright position. All the flat bars are notched and wedged at the joining standards, thus rendering the withdrawal of the horizontal bars impossible.

Fences suitable for	Estimate No.	Height above Ground.	Depth under Ground.	Distance apart of Standards.	Size of Intermediate Standards.	Size of Joining Standards, placed 15 ft. apart.	No. of Bars. ## COWELL'S PATENT AIR BRICKS OR VENETIAN VENTILATORS

Design No. C 3930.

Elevation of 12x6 Inch Ventilator.

THIS Air Brick is far and away superior to any of the ordinary designs, and at but very nominal extra cost. It needs only to be used once to ensure its continuity of adoption for all classes of buildings. Hitherto the main difficulty with air bricks has been the moisture driven through the interstices by the wind, damaging the fabric; this defect has been overcome by this invention. The above drawings very lucidly show this advantage. The louvers act upon the suction principle and induce a current of air. Strongly made of cast iron. Cheap, durable, and effective.

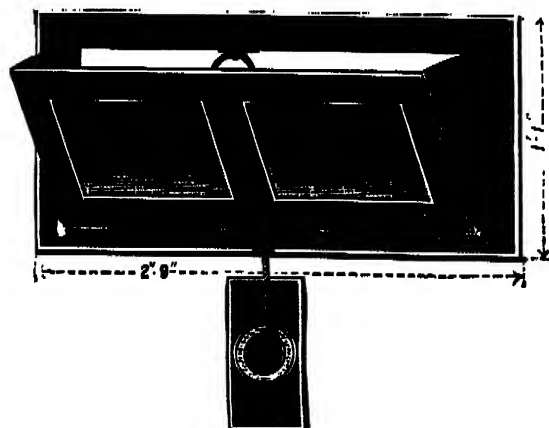

Section and Adaptation to Brick Work of 9x6 and 12x6 Inch Ventilators.

Sizes, ..	..	..	9x3	9x6	9x9	12x6	12x9	12x12 inches.
Fine Cast, ..	..	..	8/-	16/-	24/-	24/-	27/-	48/- per doz.
Galvanized, ..	..	..	13/6	27/-	37/6	37/6	49/6	75/- "

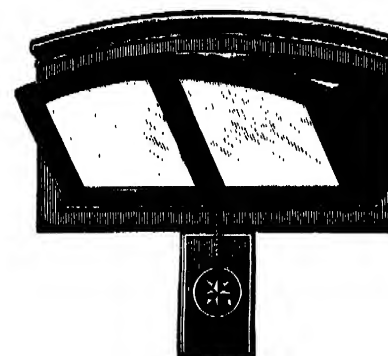

Arrangements can be made to pay carriage on quantities to any Railway Station in the British Isles.

No. C 4847. **AUTOMATIC DRAIN TRAP**

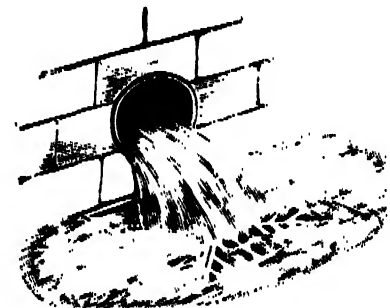

Excludes all stench, prevents splashing, and protects the wall from damp.

WHEN CLOSED (No Stench).

AS IN ACTION.

THE OLD-FASHIONED PLAN.

Its action is simple, automatic, and effective. Can be fixed to any ordinary drain pipe in a few minutes by using a little cement and driving in nails as supplied with trap. Price, 3/- each.

# Coal Plates and Pavement Gutters

## YOUNG & MARTEN'S PATENT AUTOMATIC - LOCKING COAL PLATE

DESIGN No. C 7101. Patent No. 13403.

SECTION.

Showing Stud and Automatic Grip in position, ready to close and lock.

DESIGN No. C 7101. Patent No. 13403.

SECTION.

Showing Automatic Grip near Locking Point.

DESIGN No. C 7101. Patent No. 13403.

SECTION.

Showing Automatic Grip and Eccentric Overbalance of Weight, securely locked.

Size of Plate, 12 inches diameter; over rim, 14 inches diameter. Price, including Plate, Rim, Locking Gear, and Chain, 7/6 per set.

**EXPLANATORY.**—It will be seen from illustration showing the section that on flange at one side is a stout lug cast on, which fits into slot in rim. At other side is locking lever, hung from underside of plate, having an easy movement—one which, as plate is lowered to its position in rim by its own eccentric weight, automatically grips the under portion of outer rim, and thus the plate is secured to the latter by an immovable Lock and Bolt. To open or release plate, a chain is provided, accessible from INSIDE only; a slight pull detaches the grip, and the Coal Plate itself can then be raised from INSIDE.

**NOTE.**—This Patent Coal Plate is offered to the public as a means of relieving householders and owners of property from responsibilities arising from the removal of an ordinary lift-off coal plate, either by children or unauthorised persons. By the use of this Patent Plate accidents are avoided, also possible litigation necessarily following. The invention being within the legal regulation, according to Act of Parliament, whereby a heavy penalty can be enforced. "If any occupier or occupiers do or shall leave open, or not sufficiently or substantially cover or keep covered and SECURED, to the satisfaction of the local authorities, any coal plate."

**ADVANTAGES:—SELF-LOCKING. BURGLAR PROOF. NON-SLIPPING. CANNOT BE OPENED FROM OUTSIDE. STRONGLY MADE.**

# Hot-Water Heating Apparatus

## THE "EVE TILL DAWN" BOILER

DESIGN REGISTERED, No. 446945.

RELIABLE, INEXPENSIVE, POWERFUL, ECONOMICAL. For Small Greenhouses, Motor Houses, Dog Kennels, Chicken Rearers, &c.

SIDE VIEW.

In most small boilers the HEATING SURFACE is too large, the FUEL SPACE is too small, the first cost is too heavy, or the RENEWAL OF FITTINGS too costly.

The "EVE TILL DAWN" BOILER has been designed to overcome these defects, it is simple in construction, NEAT in appearance, the parts are few and INEXPENSIVE, and the AIR REGISTERS control the DRAUGHT.

It will HEAT from 12 ft. to 40 ft. of 4-in. pipes, and can be banked to last from 12 to 24 hours. We have banked it up for 44 hours.

We have kept 40 ft. of 4-in. pipes hot day and night for a full week, 168 hours with 168 lbs. of fuel 1 lb. of fuel per hour.

It is RELIABLE and CHEAP, all parts are SUBSTANTIAL, and it has been subjected to EXHAUSTIVE TESTS before being placed on the market.

FRONT VIEW.

The No. C 5718 Boiler being 14 IN. HIGH, does not require a stoke hole.

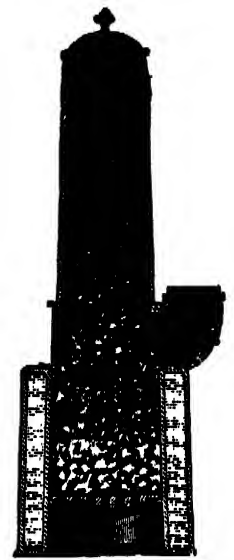

It is NOT suitable for building in wall, it should be erected in out-house. If fixed outside it should be protected from rain or snow.

Boilers Nos. C 5718 and C 5719 TAPPED at BACK (unless otherwise ordered) for 1½-in. flow and return, or in any other position to order.

Boiler No. C 5732 TAPPED at BACK (unless otherwise ordered) for 1½-in. flow and return, or in any other position to order.

The RING SECTION will SWIVEL round, so that smoke pipe may be fixed in any position.

The magazine is not supplied with No. C 5732 Boiler, the fuel space in body of same being large enough.

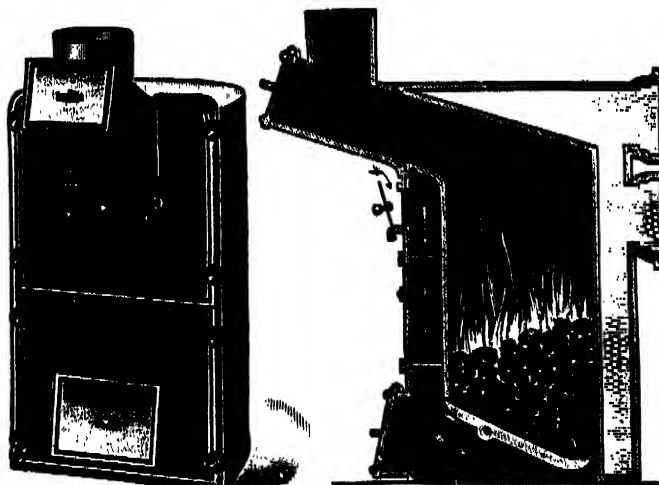

SECTION.

No.	Outside Dimensions of Boiler.		Grate Diameter.	Heating Surface.	Heating Power, 4-inch Pipes.	PRICE of Boiler with Fittings illustrated above.
	Height.	Diam.

C 5732	24 × 19 "		11½ "	5 "	120 "	5 5 0

## THE "CRESCENT" BOILER

CAST IRON.

ELEVATION.

SECTION.

The "Crescent" Boiler has been designed to obtain the fullest amount of hot-water heating power from a small consumption of fuel. With the exception of the front, the whole internal surface, sides and top comprising the waterway, is exposed to the heat of the fire, thereby ensuring at the minimum of cost the maximum of results.

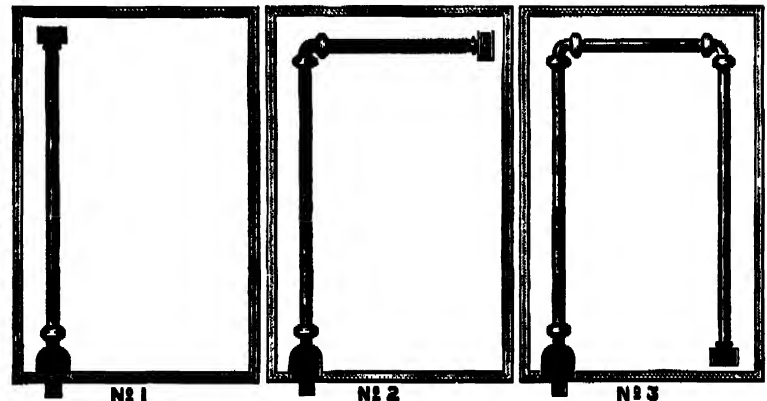

No.	Outside Dimensions.			Heating Power in 4-in. Pipe.	Size of Socket.	PRICE.
	Height.	Width.	Depth.			
5522C7.	27 × 12½ × 12 ins.			50 ft.	4 ins.	£4 4 0

# New Type of Expanded Metal

(Patented)

FOR REINFORCING BRICKWORK, SLAB PARTITIONS,  
CONCRETE BLOCK CONSTRUCTIONS, &c., &c.

This material is made in three strengths, from 24 Gauge, 22 Gauge and 20 Gauge best mild hoop steel, and can be supplied in coils of practically any length, or flat in bundles cut to any desired length up to 16 feet. The standard coil is 270 feet long and  $2\frac{1}{2}$  inches wide, but shorter or longer coils can be supplied, and coiled material is to be preferred in most instances, not only for convenience in handling on the job, but also because coils occupy less space for storing and transhipment.

## "Exmet" Brickwork Reinforcement $2\frac{1}{2}$ inches wide,

in coils, or in bundles of flat strips of any length up to 16 feet, containing approximately 270 feet lineal :

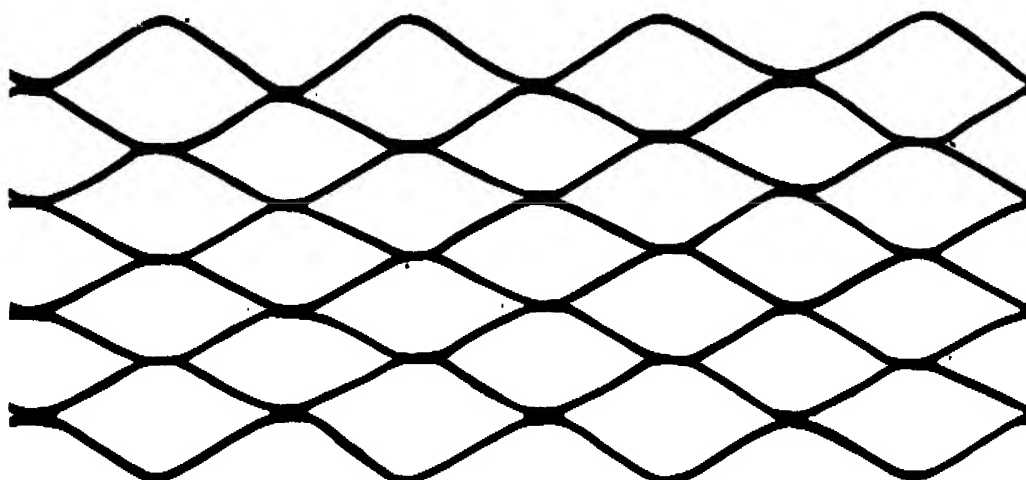

24 Gauge, weighing approximately 14 lbs.,	.. ..	5s. 0d. per coil or bundle.
22 Gauge, weighing approximately 18 lbs.,	.. ..	6s. 6d. per coil or bundle.
20 Gauge, weighing approximately 23 lbs.,	.. ..	8s. 6d. per coil or bundle.

Other quantities, either coiled or bundled, are supplied at the proportionate price per foot run, and no extra charge is made for cutting to special length either in coils or in flat strips.

All material is dipped one coat of paint before leaving the Works.

## DELIVERY.

Orders of the net value of £2 and over are delivered carriage paid to nearest Railway Station in Great Britain or F.O.W. Dublin, Belfast or Cork, unless specially quoted otherwise. Carriage is not paid on orders of a less net value than £2.

Made in lengths of 270 feet.

Actual Size of Meshes of "Exmet" Brickwork Reinforcement.

No. 24 Gauge Stocked. Other Gauges direct from WORKS.

# NEPONSET Paroid Roofing

A high grade prepared roofing for factories, car sheds, railroad buildings, and in fact, all kinds of buildings where a good permanent prepared roofing can be used.

**NEPONSET PAROID** has a long record of service on buildings owned by the United States Government, leading railroad systems and manufacturers throughout the United States and Canada, and more recently on British railway, factory, colliery and farm buildings.

**AN EXPERIENCE.**—Galvanized roofing after six years required preservative treatment, and after ten years, replacement. **NEPONSET PAROID** Roofing is sound after 25 years, and has been taken up and re-laid on another structure after 10 years.

**NEPONSET PAROID ROOFING** is made in one and two ply, and is put up in rolls **36 inches wide**, containing 216 square feet (sufficient to cover two squares), and 108 square feet (sufficient to cover one square).

## NEPONSET PAROID ROOFING, Grey. 36 inches wide—

One Ply, Light Quality.				Two Ply, Heavy Quality.			
			Price.				Price.
Rolls of 108 square feet,	..	..	10/6 each.	Rolls of 108 square feet,	..	..	15/- each.
" 216 " "	..	..	21/- "	" 216 " "	..	..	30/- "

Galvanized caps, nails, waterproof cement, and complete directions for laying are packed inside of each roll.

# NEPONSET Proslate Roofing

COLORS EITHER RED OR GREEN.

An attractive prepared roofing, designed especially for cottages and residential work of all kinds. It is made either in rich red or deep green, which makes it an especially attractive roofing for pitch roofs; is a thoroughly tested material, and there is no uncertainty about the durability of **NEPONSET PROSLATE**, for its base is our regular **NEPONSET Paroid Roofing** a time-tested material.

It is particularly suitable for piazza roofs, where shingles cannot be used.

**NEPONSET PROSLATE ROOFING** and **SIDING** is put up in rolls 18 inches wide, containing sufficient roofing to cover 100 square feet of surface. Rust retarding clips, nails and cement of the color of the material, with complete directions for laying, are packed inside of each roll.

## NEPONSET PROSLATE ROOFING, Dark Green or Dark Red, 18 inches wide Heavy Quality, Rolls of 108 square feet, 20/- each.

Can also be supplied showing a hexagonal design and also an ornamental edge, same quality and prices. Carriage paid on all above Roofing on orders of £5 and up. Samples and descriptive literature sent upon application.

# NEPONSET Wall Board

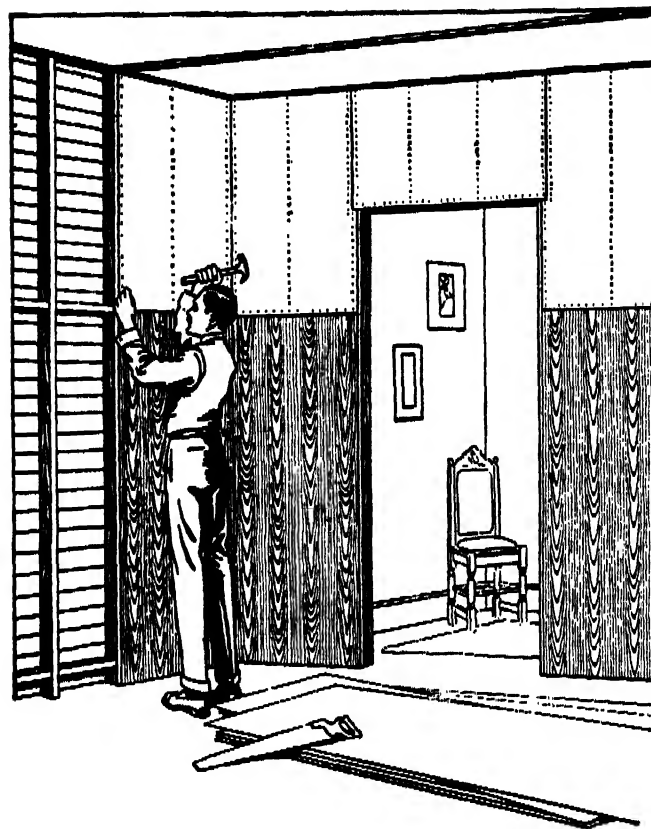

**NEPONSET** Wall Board is supplied in 32-inch widths and 8, 9 and 10 feet lengths. The Cream White finish is also made in lengths of 12 feet, especially for ceilings.

## NEPONSET Wall Board Battens.

### SIZES:

1½-inch wide, and  
8, 9 and 10 feet long.

Cream White finish also  
furnished in 12-foot lengths.

**NEPONSET** Wall Board is packed in bundles containing quantities as follows:

8 feet.

14 panels—about 298 sq. feet.

9 feet.

12 panels—about 288 sq. feet.

10 feet.

10 panels about 320 sq. feet.

12 feet (Cream finish only).

10 panels -about 320 sq. feet.

**NEPONSET** Wall Board is a tough fibre board about one-eighth of an inch in thickness. It requires no decoration. Primarily it is intended for walls and ceilings, to be used in place of laths and plaster, but it is also largely used over old cracked plaster and for partitions. It is therefore of interest not only to the person who is building, but to everybody who owns a house, garage, bungalow, or building of any description. It can make an unfinished or plaster cracked room attractive and liveable.

## ADVANTAGES OVER PLASTER

Its principal advantages over plaster are:

1. It preserves waterproof and washable surface.
2. It is less expensive.
3. Easily fixed with unskilled labor.
4. It requires no further decoration.

5. It can be applied quickly and without dirt and litter incidental to laths and plaster. No waiting for plaster to dry out.

6. It can be applied in winter as well as in summer.

## ADVANTAGES OVER OTHER WALL BOARDS

1. It is the only Wall Board with waterproofed surfaces that requires no further decoration.
2. It is made in a variety of finishes Plain Oak, Cream White, and Burnt Leather.
3. Battens of the same materials are furnished for covering joints.

## HOW IT IS APPLIED

**NEPONSET** is nailed directly to the wall studding and ceiling joists. It can be cut with a sharp knife or saw to fit any space. Anyone who is at all handy with tools can apply it quickly and easily. When applied over plaster a longer nail is used in order to fasten it to the studding joists.

**NEPONSET** Wall Board Battens are used to cover the joints between panels. Wooden battens may be used for this purpose, but of course are more expensive.

Either Finish—Plain Oak, Cream White, or Burnt Leather, .. .. .

In Original Bundles.

1½d. per sq. ft.

Less Quantity.

1½d. per sq. ft.

Battens to match, for covering joints, panelling, &c., 1½ ins. wide, 3/- per 100 lineal feet.

Carriage paid to most Stations on orders value £2 and upwards.

SAMPLES AND DESCRIPTIVE LITERATURE SENT UPON APPLICATION.

# The "Yemart" Embossed Steel Ceilings

High Relief. Painted one coat, both sides.

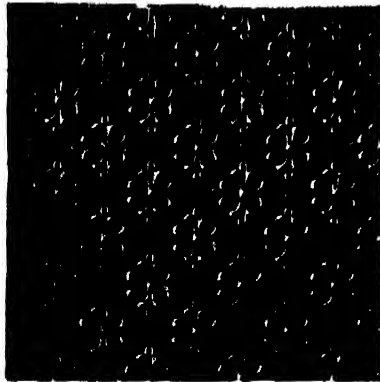

**Fire-proof. Saves Lathing and Plastering.**

Easily cut with Tinmen's Shears, and usually fixed with 1-inch Galvanized Wire Nails on 1-inch Battens, spaced to come under each Joint.  
The Joints of the material have a slight lap.

**The cheapest form of Decorative Ceilings.**

## Protection:

In case of fire it checks the spread of flames.

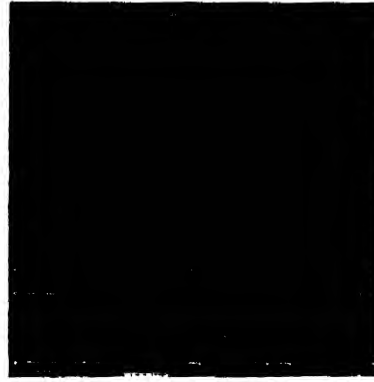

No. PA 480.

Price, 1/6 per yard, 24 ins. wide - 3d. per square foot.

Stocked  
in Sheets  
8 x 2 feet.

Scale:  
One Twelfth.

No. PA 481.

Price, 1/9 per yard, 24 ins. wide - 3½d. per square foot.

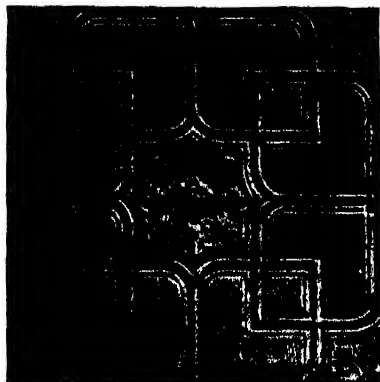

## Sanitary.

Non-absorbent and free from microbes and bacteria.

Fixed with the least possible inconvenience, without mess.

Never cracks or falls down.

Has the best effects of relief papers.

No. PA 482.

Price, 2/- per yard, 24 ins. wide - 4d. per square foot.

Joints practically invisible.

A Ceiling 16 x 14 feet of No. PA 480 Pattern costs only 56/-

No. PA 483.

Price, 2/- per yard, 24 ins. wide - 4d. per square foot.

Not affected by vibration nor the settling of buildings.

Reduces the strain on joists to a minimum.

Is not susceptible to damage from leakage through roof or waterpipes.

## Coves and Cornice Mouldings

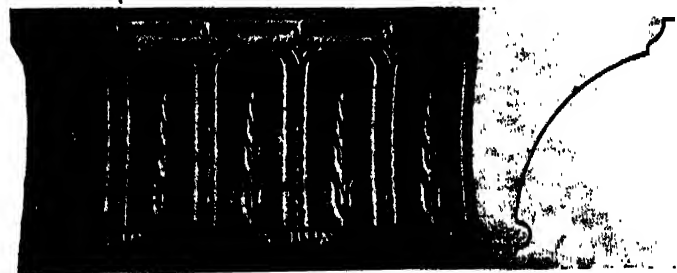

Stocked in 8 feet Lengths.

No. PA 490. 2½ x 2½ ins. Price, 3d. per lineal foot.

No. PA 491. 5 x 6 ins. Price, 4½d per lineal foot.

No. PA 492. 12 x 12 ins. Price, 9d. per lineal foot.

The above are representative of patterns stocked at our Stratford Warehouse.  
Samples and Descriptive Catalogue supplied upon application.
